- Be proficient in MS Word, Excel, Outlook
- Be willing to work in a team-centered, *consensus emphasis* environment
- DOT certification (or ability to quickly acquire)
- Current driver's license in good standing
- Willing to travel for projects as required
- Competence in project coordination skills

Position responsibilities include but are not limited to:

- Lead electrical delivery of new solar power generation
- Design and draft electrical one-line diagrams
- Check and sign off on electrical designs
- Specify and order electrical parts for jobs
- Submit electrical permit paperwork
- Manage all correspondence with inspection community
- Work with utilities for system testing and commissioning
- Driving electrical truck to and from project sites
- Track parts used on jobs and report to team
- Maintaining safe working environment, including keeping work area and truck neat
- Communicate with clients, utilities, inspectors professionally
- Hands-on work as a part of the installation team
- Manage registered unlicensed individuals as part of installation team
- Be the qualifying person for REAL Solar's electrical contracting license
- Project acceleration, cost reductions, troubleshooting, and monitoring

Professional Qualifications:

- Current Master Electrical license in good standing – required
- Experience in solar design-build – strongly preferred
- Salary commensurate with experience and qualifications. Inquire for details.

Send resume AND cover letter to REAL Solar Inc., 3963 8th St. SW Backus, MN 56435 or email to jason@rreal.org by February 8. Interviews immediately thereafter.
