

Construction Consultant

LJP Construction Services is a results-driven company of real estate experts possessing substantial direct development, construction, and management experience in a wide variety of residential product types. We serve the building and insurance industries providing construction risk management services on a variety of housing types, from low density, single-family detached homes to medium density townhouses and condominiums, and to high density mid- and high-rise buildings. The extent of our market covers projects throughout the United States.

We are looking for a Field based Construction Consultant with a strong skillset to conduct Quality Assurance observations in the Los Angeles area.

This position is responsible for coordinating and performing Quality Assurance site observations, technical reporting, & managing client expectations & scheduling challenges. Including evaluating client construction practices relative to plans and specifications, building codes and industry standards of care; attending professional and trade association meetings; and meeting with clients and prospects to represent Company's services as needed.

Ideal candidates for this position have a college degree in Architecture, Building Technology, or Construction Management and a minimum of 10 years of experience in construction and management or equivalent. Candidates must be proficient with Microsoft Office Suite and project management software. This position involves daily local travel and occasional out of state travel. Candidates must be able to safely access scaffolding and roofs as needed. A valid Driver's license is required. A contractor's license, QSP, ICC and Green certifications are a plus.

Compensation: \$73K to \$82K annually with 2 weeks PTO. Medical, Dental, Vision, Life, Disability and 401K matching.
