## COLLECTIVE ACTIONS FOR PEATLANDS RESTORATION IN INDONESIA

---

*As part of the Nationally Determined Contributions (NDC), Indonesia is committed to reduce its national emissions as much as 29% (390 million tons) by 2030. Among the actions taken is to restore 2 million hectares of degraded peatlands.*

*What does it take in terms of collective actions?*

*Who participate?  
What is the progress?  
How can it be monitored and improved?*

*This event will provide opportunities to negotiators and participants to learn ways and means to meet the targets.*

---
