BELTEX

THE STANDARD OF EXCELLENCE

General Appearance

The Beltex is a medium sized sheep, long in body. It is wedge shaped from a narrow shoulder to a distinctive large double-muscled hind quarter.

Head

The head is generally white in colour but may have black, blue or brown shadings or patches. Colour is irrelevant to quality. The fore face is short and thick.

Neck

The neck is thick and short.

Body

Well muscled shoulder. A wide back and long barrel shaped body

Gigots

The distinctive characteristic of Beltex Sheep is the double-muscled hindquarters, sloping pelvis, low set tail, deep flushed, well rounded and full of meat. The excessive hindquarter development when compared to the line of the shoulders gives a wedge shaped appearance.

Legs

Sheep should be mobile and capable of natural service. Joints should be straight and sound. Legs are usually white but colour is relevant. Feet tight. Pasterns upright. Fine bone structure.

Fleece

Tight, dense of medium staple length, affording a good protective birth coat to the lamb. A medium to tight fleece is tolerated.

Bone

Fine bone is a desirable characteristic.

Teeth

Teeth are scored on a 1 to 5 scale, where 1 is extreme and 5 extreme overshot, with 3 being perfect. Only animals with a score of 2, 3 or 4 are considered acceptable.

Inspections

16. Tags which do not comply with UK legislation and Society requirements will result in the sheep being rejected at inspection. From 2008 all registered lambs must carry tags with the Society logo. - e. All prize winners must be offered for sale at auction by the exhibitor at the sale following the show. Awards may be withheld and prize monies will be forfeit unless prize winners are sold by auction.
- f. The decision of the judge is final.

Dispersal, production and reduction sales to be held at the end of the collective sale and no sheep to be shown in the pre-sale show.
