## **OPT Sync Interface**

All of our events are specially coded to give you maximum control over the look and feel, as well as the content of your event.

	Message 1	No Message		
	Message 2	Test Message	1/1/2000	1/1/20
	Message 3	No Message		

Create customized profiles for event groups, where we give you control of fonts, colors, and the table styles. Create headers and footers for your events that contain your logos and signatures.

Want to re-run that last event? No problem! Our interface allows you to run any enabled event manually with the press of a button.

Messages are a great way for you to attach a sales or general message to an event.
Select a start and end date, and the message will only show during that range.

Now you can access your dashboards from within the OPT Sync Interface allowing you even easier access to your data, and restrict access by user too!

Our custom notification API allows you to notify custom third party providers with Sync. You can choose the mapping to allow a seamless connection to your service.

Add email addresses for:
Branch, Vendor
Warehouse, Install Co,
Sales Departments
for event delivery. You can
also set the Email Reply To.
