YOGA THERAPY FOR THE AGEING POPULATION
PROFESSIONAL TRAINING

◆ evidence base for yoga therapy with seniors
◆ chronic diseases associated with ageing population and sedentary lifestyle including osteopenia & osteoporosis, sarcopenia, arthritis, fall prevention, anxiety & depression, sleep problems, cognitive functioning, caregiver fatigue, breathing problems, and more
◆ recommended yoga practices with modifications and contraindications for prevalent health conditions in Ageing population (asana, pranayama, meditation, mindfulness, laughter yoga)
◆ how to plan and guide a chair yoga practice
◆ spirituality (Acceptance, gratitude and compassion)
◆ translating research into practice (special considerations for working with this demographic and barriers/challenges to implementing yoga therapy programs for seniors)

Prerequisites: This training is open to yoga teachers, therapists and other professionals and healthcare practitioners working with seniors. A 200 hour YTT is recommended but not compulsory.
