2. ESI Dispensary, O Block, Near Water Tank, Mongolpuri

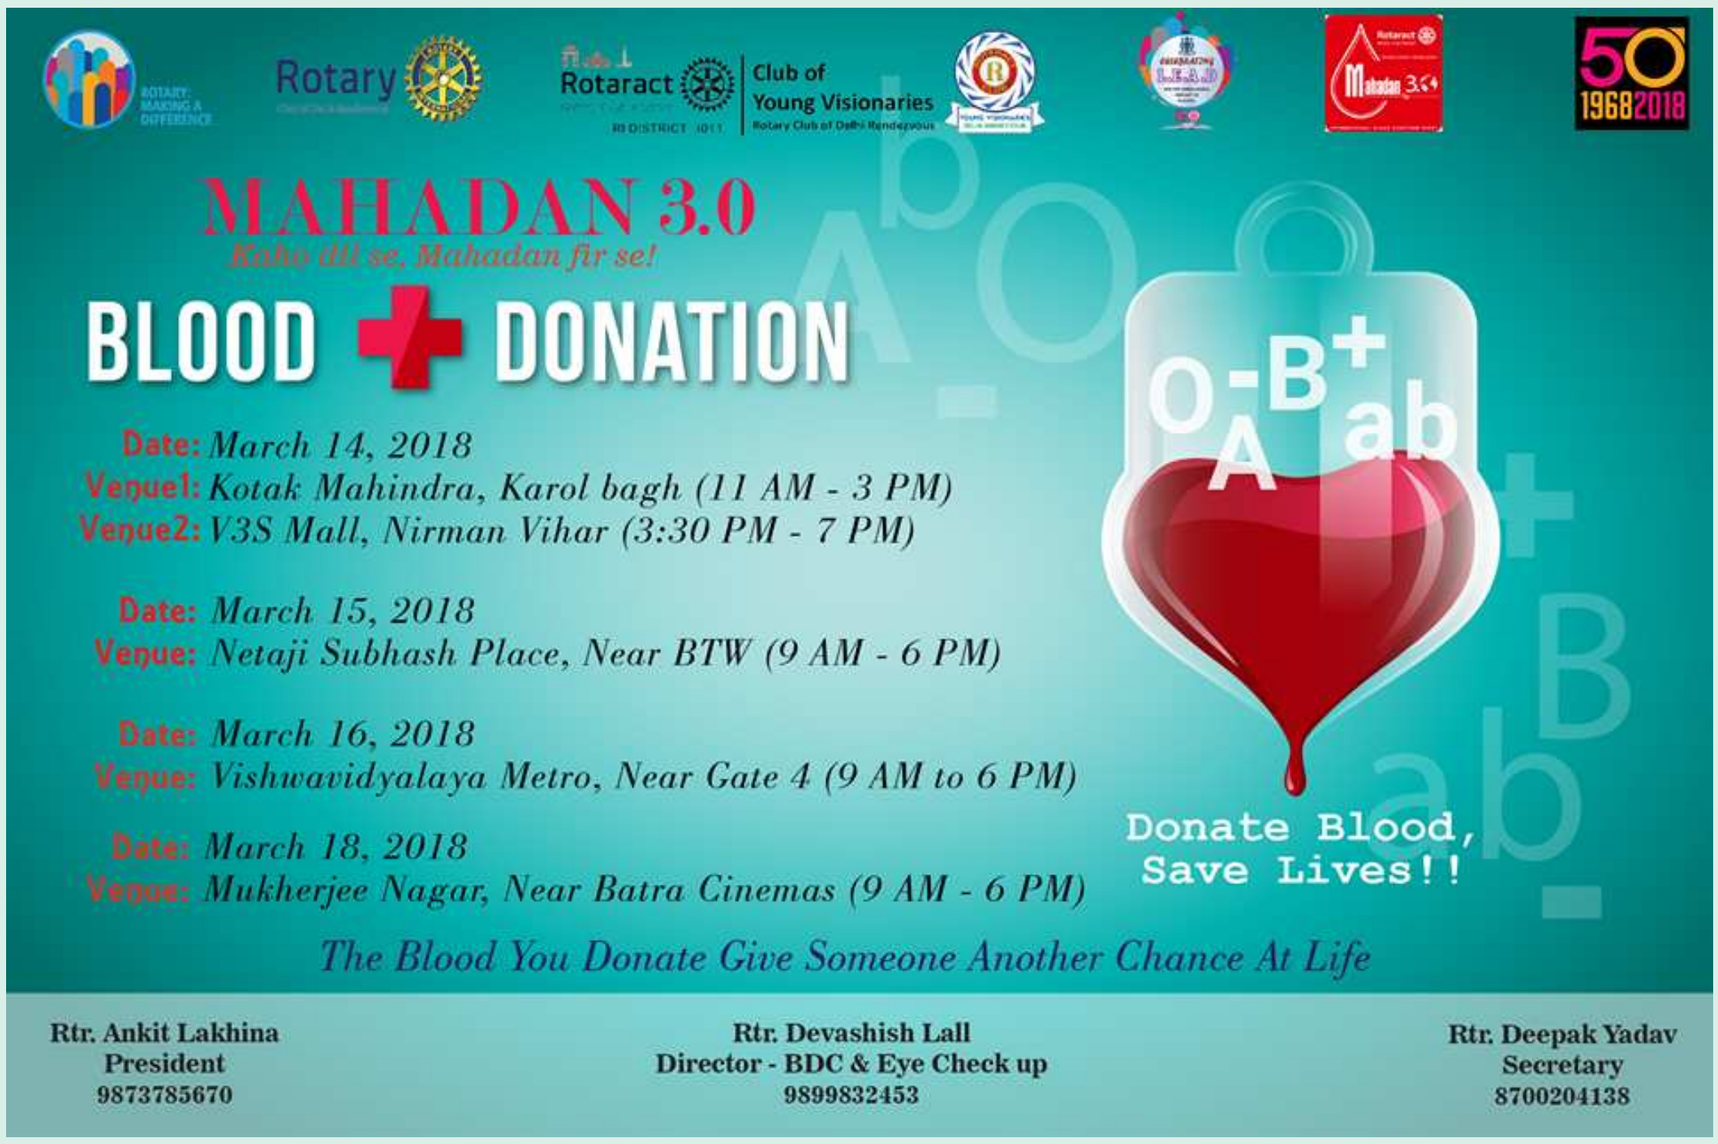

MAHADAN 3.0

Blood is the most precious thing, a red treasure that a human being has in this world. And, to share such a precious thing makes him a hero; a hero to someone, somewhere who receives this precious gift of life.

Beleiving in this, Rotaract Club of Young Visionaries organized the following blood donation camps under the banner of MAHADAN 3.0 and with the coordination of Rtr. Nishtha Jain, District Coordinator of Mahadan and collected 313 units in total.

AAROPAN 2.0

(March 17, 2018)

"If you cut trees, you cut life but if you plant trees, you plant lives."
Even the nature is based on the principle of "give and take". So, believing in this principle, Rotaract Club of Young Visionaries in collaboration with Rotaract Club of New Delhi did it's bit for the nature through its event "AAROPAN 2.0" where the Rotaractors planted 50 saplings at Sainik Vihar Society Park, Pitampura on March 17, 2018 under the district theme of ECOSYSTEM.

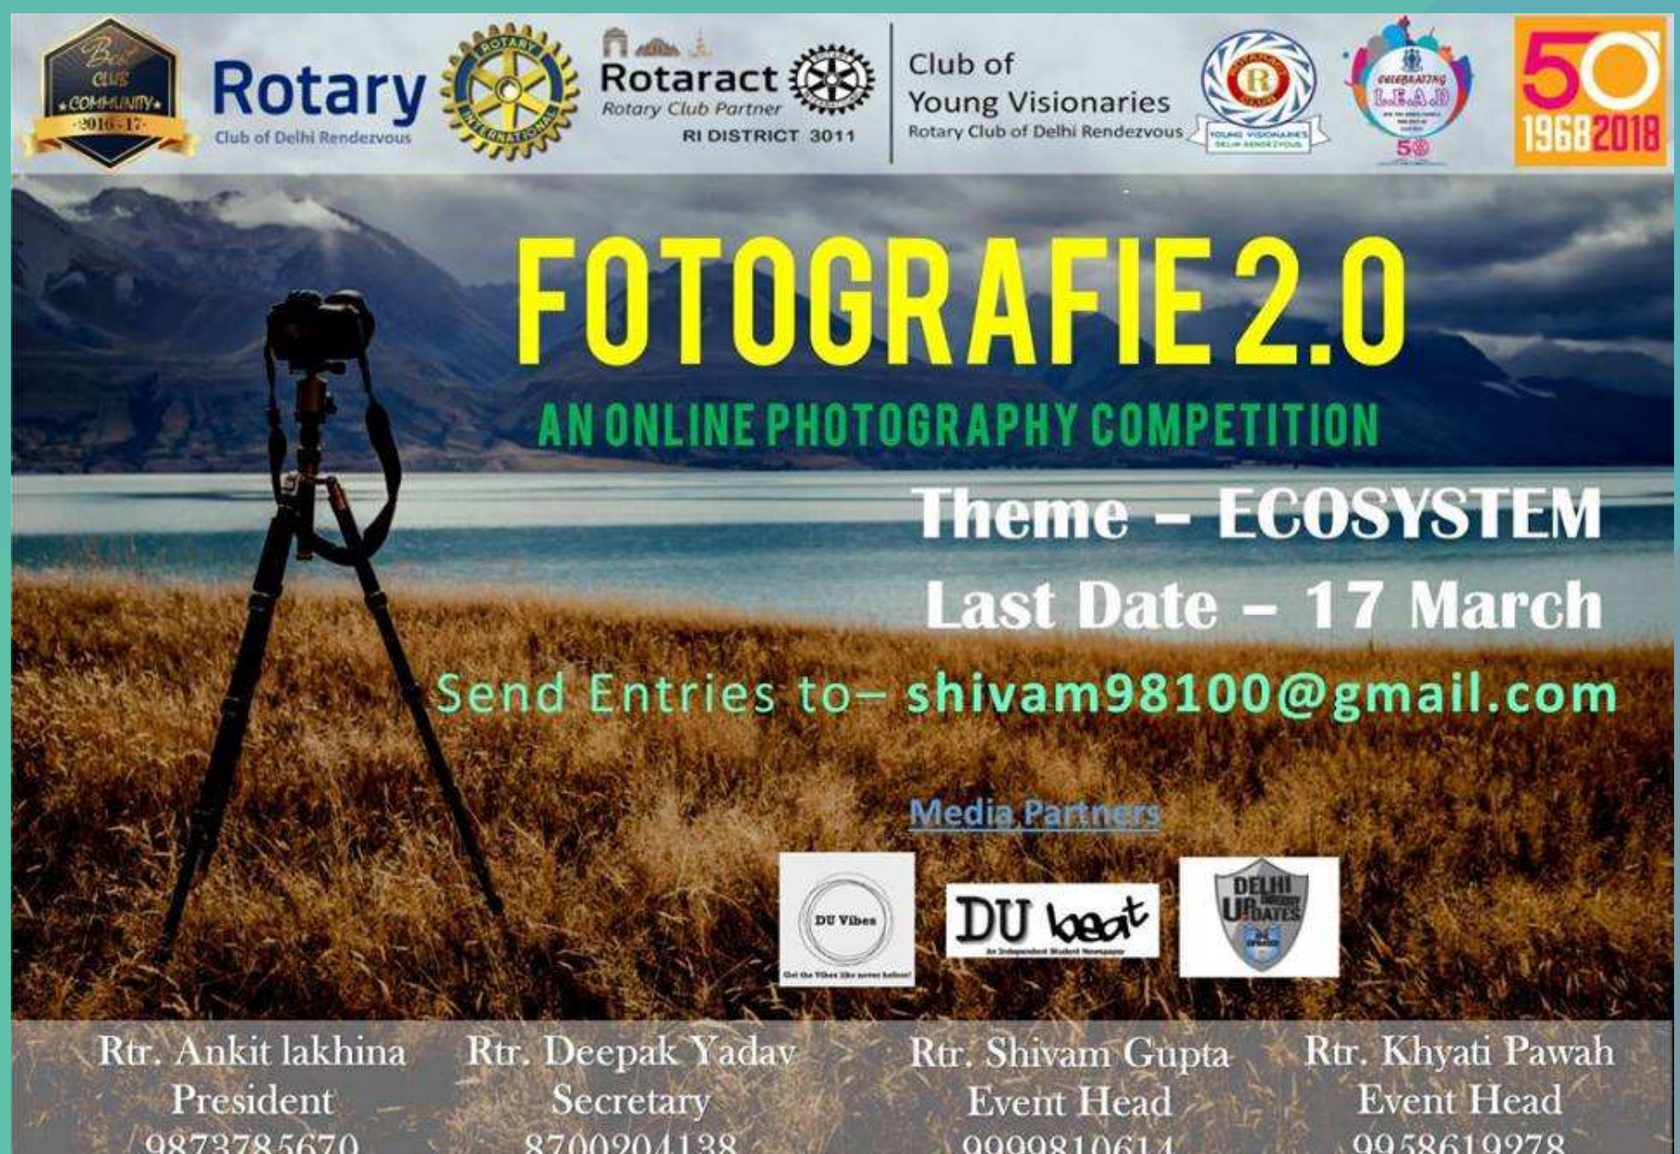

FOTOGRAFIE 2.0

Rotaract Club of Young Visionaries organised the second edition of their online photography event- 'Fotografie 2.0'.

After receiving an overwhelming response from all the participants, we are delighted to inform about the results of FOTOGRAFIE 2.0 - An Online Photography Event

We thank all the participants for sending such amazing entries.

The winners and participants will be contacted within the coming week for their certificates.

The winning entries are as follows :

1st - Vasu Aggarwal

2nd - Tushar Mehta

3rd - Mohit Arora

BLOG WRITING COMPETITION

Countless times we've been told that "climate change is real".
We've seen it, it happens before our eyes.
But let's figure it out, it is across the board. We are not apart but a part of the ecosytem that we interact with and it impacts us all. It's time to reflect on our interaction with the environment around us.

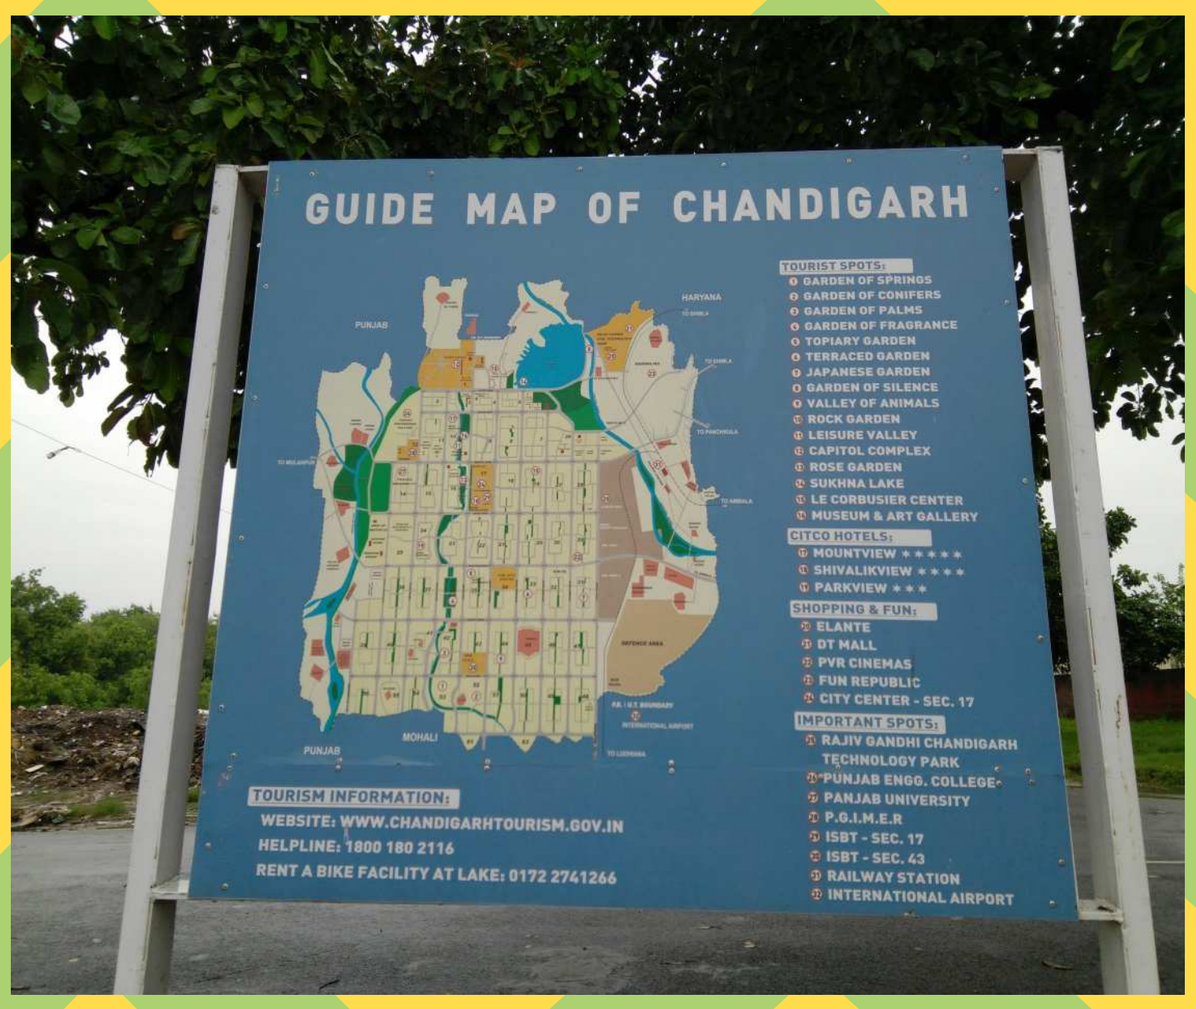

In consonance with the 'Theme Ecosystem' of the World Rotaract Week, Rotaract Club of Young Visionaries presented you an opportunity to interact and affect change with your words. Share Your story in a blog.

We invited entries on any issue related to environment that perturbs you. Your experience, your endeavor, that you saw and felt, that unsettled you.

GREEN HEART

BY ASHISH GUPTA

I love visiting gardens and parks whenever I can, last year after 15-August-2017; on Friday 18-August-2017 finally, I got the confirmation email from ICC Young Arbitration Forum India Chapter. I was so excited and immediately book the IRCTC Ticket to Chandigarh (Venue of ICC Young Arbitration Forum India Chapter Event). Unknown too many, this place (Chandigarh) is still untouched by pollution and address of many beautiful gardens like Rose Garden, Japanese Garden, Garden of Springs and so on. Next Morning I was with a bag packed and ready, to go by train to Chandigarh from New Delhi. Around 10:30 A.M. I reached the destination place i.e. Chandigarh. I felt a soft, cold breeze. I explore the road route to The Japanese Garden.

The Japanese Garden dedicated and open to the public Phase wise by Shri Shivraj V. Patil H.E. the Governor of Punjab & Administrator of Chandigarh in presence of Shri H.C. Kalyan, Mayor and Shri Davesh Moudgil, Deputy Mayor on Friday, November 7, 2014 (Phase one) and June 4, 2016 (Phase two). The Japanese Garden is a park located in Sector 31 in the U.T. of Chandigarh and it is open to visitors year-round and consists of water bodies, pagoda towers, waterfalls meditation centre, a Buddha idol and golden bamboos. The highlight, as well as UVP of the Japanese garden, is that this is first ever garden in Chandigarh with Japanese Touch.

BLOG WRITING COMPETITION

My visit to Japanese Garden was an artistic, creative and environment-friendly experience as the garden was so beautiful as well sprawling into many acres including two phases and both the two phases of the park are connected by an underground tunnel decorated by beautiful Japanese Paintings on both sides. The garden is designed using Japanese architecture and each of the elements in the garden is given a unique Japanese Touch.

I encourage all the readers to make a stop at The Japanese Garden to see the first ever garden in Chandigarh with Japanese Touch and interact with your inner Green Heart, nature as well as an ecosystem in Indo-Japanese way.

It was a remarkable experience and lovely tour of Japanese Garden at Chandigarh and at last, I silently said full of environment-friendly green heart goodbye and capture the same in my Smartphone Megapixels Camera as a token of memory from the Garden in the visit.

END CORRUPTION NOW

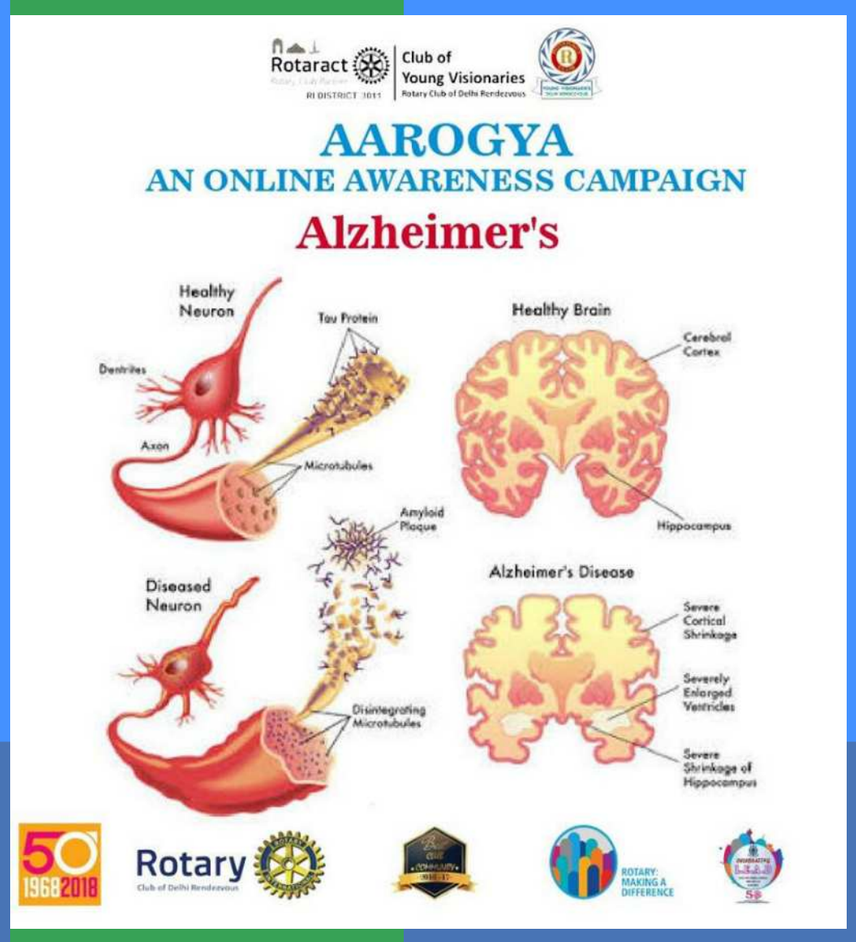

Rotaract Club of Young Visionaries in collaboration with Rotaract club of Sonepat Midtown carried out the “End Corruption Now Campaign”, in which zero rupee notes were distributed symbolizing that we neither take or give bribe.The event was a great success with the amazing feedback and appreciation from everyone for carrying out this event.

AAROGYA

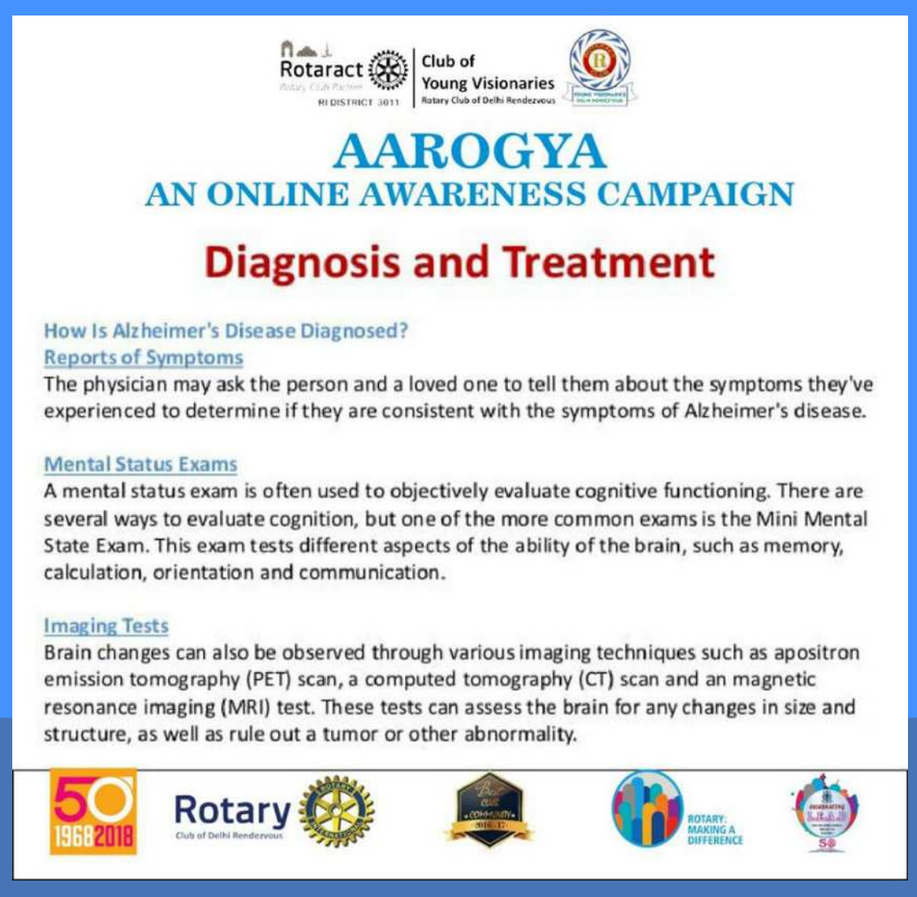

Alzheimer's Disease

Alzheimer's disease is a progressive disease that destroys memory and other important mental functions. At first, someone with Alzheimer's disease may notice mild confusion and difficulty remembering. Eventually, people with the disease may even forget important people in their lives and undergo dramatic personality changes.

Alzheimer's disease is the most common cause of dementia- a group of brain disorders that cause the loss of intellectual and social skills. In Alzheimer's disease, the brain cells degenerate and die, causing a steady decline in memory and mental function.

DRR'S OFFICIAL VISIT

(March 24, 2018)

On March 24, 2018, the DRR's official visit was organised at Sambookas Cafe, Hudson Lane, GTB Nagar from 3:30 PM onwards
