

Payment Gateway Solution

Secure and Cost-Effective Electronic Payment Processing

Make the Right Move for Your Business!

Pivotal Payments is a leading provider of merchant services to point-of-sale merchants, mail order/telephone order and Internet businesses. We provide credit & debit card payment processing, gift/loyalty/stored value card programs and card-not-present services in both the US and Canada.

Our success can be measured by the thousands of satisfied new merchants that choose us each year and is driven by our unwavering commitment to offer exceptional merchant services and support.

Empower your business by integrating the Pivotal Payments Gateway. Enjoy unparalleled reliability, scalability and security features.

Our gateway is certified with multiple U.S. and Canadian payment processors and uses the Internet as a low-cost, high-speed and secure communications network for delivering lightning fast transactions while enabling payments to be processed on any device, at any time, from any location!

Its main features include:

- Supports signature capture and retrieval.
- Widely certified with major U.S. payment processors and banks.
- High reliability and outstanding performance.
- Easy to integrate web services API and platform-independent SDK.
- Strong security; Meets VISA CISP requirements.
- Virtual Terminal that supports peripheral devices like PIN-pads, check readers, etc.
- Easy upgrading, deployment and administration.
- Complete security and privacy features.

The Pivotal Payments Gateway is designed for retail, mobile, wireless, e-commerce, mail and telephone order electronic payment processing with state-of-the-art performance, reliability, security, and privacy.

Ease of Integration

You don't need to change your existing setup. Pivotal's Virtual Terminal integrates with any existing system or customized setup. You can easily import/export your existing customer database files.

Real-time Reporting

Follow your business performance anytime, from anywhere. Export business reports in your preferred file formats (XML, Excel, PDF and more).

Security

Use our sophisticated fraud and security tools to protect your business and your clients.

PCI Compliance

Our Virtual Terminal meets all PCI standards, allowing your business to benefit from additional credibility.

Customizable User Access Levels

Assignable security levels let you control employee access to information.

Recurring Billing

Avoid errors by letting the gateway manage recurring payments.

Re-billing

Immediately process transactions from repeat customers, without re-entering customer information.

Dedicated Merchant Support

We can help you deal with any issue, including chargeback resolution, risk monitoring and more.

Fully Redundant System

Forget about downtime. Our backup servers keep your business up and running 24/7.

Ask about our FREE no-obligation pricing analysis!

We can provide a no cost, no obligation analysis to evaluate your current payment processing situation, and offer better pricing and improved services. Pivotal Payments helps you increase your sales, no matter what your business is.

Pivotal's client base spans a wide range of industries, including: restaurants, retailers, chain stores, franchises, lodging establishments, healthcare facilities as well as e-commerce and mail order / telephone order businesses, in both the US and Canada.
