

Innovative, Reliable and Affordable

Pivotal Payments is a leading provider of technology-driven global payment processing solutions to the point of sale, B2B and ecommerce industries. Our proprietary solutions include card not present, integrated POS and mobile payments that deliver efficiency and profitability to businesses across all sales channels and platforms. With a focus on security and fueled by continuous investment in research, product development and innovation, we are shaping the future of payments. Our goal is to maximize our clients' revenues and performance by empowering them with safer and smarter transactions.

Boost Your Sales with Apple Pay™

Canadians are joining the mobile wallet revolution with Apple Pay! Pivotal Payments is offering its valued clients access to Apple's easy to use, secure and innovative payment service today. Deliver a superior purchase experience by upgrading to our modern point-of-sale solutions and begin accepting credit cards and Interac from your customers' Apple devices.

Affordability Meets High-Tech

Attract new customers and delight your current ones with Apple Pay. Pivotal Payments makes it affordable for you to offer best-in-class payment processing solutions.

Make Faster Checkouts a Reality

Add speed and service to the purchase experience. A faster and easier checkout gives you more time to focus on your customers, with less time waiting for them to pay.

Bullet-Proof Security for You and Your Customers

Your customers can rely on Apple Pay for secure, simple and private transactions. Coupled with our latest terminals, your business can also limit exposure to fraud and chargebacks.

CONVENIENCE MEETS SECURITY

Apple Pay provides convenience and highly secure transactions for merchants and their customers. Consumers first load their credit card information onto their iPhones. Based on the latest encryption standards, payment data is kept private in the "Secure Element" of their Apple devices, providing piece of mind for your customers while protecting your business from fraud.

TRANSACTIONS MADE SIMPLE

- Apple Pay works with a microchip and antenna contained inside every compatible Apple device.
- To make a payment, customers simply wave the iPhone over the compatible terminal while keeping a finger on the Touch ID (the home button).
- A slight vibration and beep signify the transaction was successful.
- There is no need to open a specific app. An Apple Pay transaction is fast, secure, and easy.
- Apple Pay costs the same as if your customers paid using their regular credit or debit card.

HIGHER SALES ARE A TOUCH AWAY

Apple Pay makes accepting credit card payments a breeze! And Pivotal Payments is making it easier than ever for you to begin offering digital wallet payments such as Apple Pay with our state-of-the-art terminal solutions. Apple Pay is compatible with every new iPhone, iPad and Watch, paired with our NFC (Near Field Communication) enabled payment hardware.

FUTURE-PROOF YOUR PAYMENTS

With technology built for the future, there's no need to upgrade your hardware when new payment types become available. Our range of innovative terminals feature cloud-based software updates. Add the latest technology to your business at the most affordable prices, today. Contact us to learn more.
