

# RF Lighting Controls

## THE RIGHT LIGHTING DOESN'T JUST TRANSFORM A ROOM

it changes the way you live in it. From brightening a space to work with speed and ease, to dimming things down as you settle in and relax, Legrand enables users to manage a home's lighting with incredible precision and convenience. Featuring simple, sophisticated design and offering multiple access point control, the On-Q line of universal dimmers and switches can help users be productive, feel safe, save money, even rest well, all at the touch of a button.

And, with integration options for superior control, homeowners can set scenes and program activities, weaving the right level of lighting in with locked doors and cooler temperatures at bedtime, or with the right zones of audio for celebrating with guests. Unite your lights with control of entertainment, security, comfort and convenience, for a smarter home and better living.

### Associated Skus:

- Perfects your home's mood lighting with programmable scenes to match any activity
- Available in Legrand's radiant fit and finish for clean, consistent color and design
- Installs easily, with simple and intuitive programming

### BENEFITS

**Light it Right:** Set the best level of light for any activity or event, easily maximizing productivity or creating the perfect atmosphere.

**Security through Illumination:** Whether scheduling times while you're away, or ensuring you come home to a well-lit house at night, the appropriate lighting can help your home feel, and be, safer.

**Save Energy... & Money:** Conserve energy and cut down on utility cost by remotely turning off the lights when not in use.
