“American Dietetic Association Foundation Kids Eat Right Gala”

Douglasville, GA - (PRWEB) October 11th, 2011 – Denine Rogers Rd, Ld has been recognized as one of the American Dietetic Association Foundation Kids Eat Right Gala – Tribute to Everyday Heroes.

Denine Rogers Rd, Ld is being recognized for her work with Dorsett Shoals Elementary School for the Kids Eat Right program. Denine Rogers demonstrated her significant strides in improving the environment of the school by including a school teaching vegetable and herb garden and having nutritional educational classes on eating healthy with dairy, whole grains, vegetables and fruits. She was interviewed and videotaped for the Tribute to Everyday Heroes segment which was broadcast at the American Dietetic Association Foundation Kids Eat Right Gala 2011.

The American Dietetic Association Foundation (ADAF) is the world's largest charitable organization devoted exclusively to nutrition and dietetics. The generous support for ADAF allows providing scholarships, awards, research grants and managing public education campaigns.

The ADAF is celebrating the Kids Eat Right campaign first anniversary. The Kids Eat Right is a member-driven campaign designed to motivate and empower American Dietetic Association members to become active volunteers in their community and raise awareness surrounding the need to help children meet their total nutrient requirements as part of all childhood obesity prevention efforts.

About two thousand ADA members have enrolled in the Kids Eat Right Campaign Volunteer program. Over the 2012 year the ADAF will be celebrating these every day heroes and the actions they're taking in their communities. Campaign Volunteers select actions to execute that educate key audiences about the necessity of a quality diet and the consequences of poor nutrition; advocate on behalf of a quality nutrition

approach to promote growth and development; and demonstrate the food and nutrition expertise of registered dietitians through educational programming and advocacy.
