
Concord Crossroads Receives the United States Army Special Operations Command Re-compete Award

ABOUT US

Concord Crossroads, LLC (C3R) is a Service Disabled Veteran Owned Small Business (SDVOSB) and is an SBA Certified 8(a) company. C3R was founded by retired Army Colonel Claude A. Wood with the purpose of providing expert solutions to the federal government in the areas of Force Protection and Mission Assurance.

C3R's core strengths are supporting antiterrorism strategic planning and program management, physical security, intelligence operations and analysis, cyber technology, defense critical infrastructure program management, emergency management, biometric security program management, terrorism vulnerability assessment planning and execution, training and program support services, administrative personnel security and adjudication, and operational infrastructure support. C3R is headquartered in Dumfries, Virginia and is providing innovative solutions on military installations both CONUS and OCONUS.

DUMFRIES, VA

JUNE 2016

On June 21, 2016, CONCORD CROSSROADS, LLC [C3R] was awarded the Antiterrorism and Physical Security contract to support the United States Army Special Operations Command, [USASOC] and its subordinate unit locations. As the incumbent contractor for this effort, C3R offered extensive force protection, antiterrorism, and physical security program experience to USASOC by providing deterrence, prevention, active security, passive defense, and mitigation services that exceeded expectations of the Command. In serving this Command, C3R will continue to use proven techniques, tools, training, procedures, and best business practices to provide USASOC with critical protection services supported by a solid management and staffing methodology, a thorough understanding of program technical requirements, a seamless and sustainable mobilization and life support process when required, and a proven quality assurance program. According to our satisfied USASOC customer, our contract performance is characterized as being 'very proactive' with 'reliable, professional and mission oriented' service. The leadership within USASOC shared with Claude Wood, CEO and President, that the C3R USASOC PS/DCIP Analyst saved USASOC an average of \$10,000 annually by utilizing extensive institutional knowledge during performance in the Security Engineering Program alone." Because of identified successes such as this, C3R continues to provide holistic, centralized, and highly focused force protection, antiterrorism, and physical security program management support, cradle-to-grave project development, funding and resource management and control, and multitask contract management for the successful continued implementation of the mission for USASOC.
