

TALK TIME

Discuss with your family a tourist attraction in the UK. It could be one you have been to, but wouldn't it be more interesting to research a new one? Discuss the possibility of going as a family to visit this site and the preparation needed to do so. You can record what was discussed in your homelearning book.

Feel free to go if you want.

CREATIVE

Draw a map of a location you know very well (such as your house, your property, your school, your trip to school, etc). Research "Legends" and "Keys" from maps and create one of your own to add to your map. These maps should show evidence of care and effort. Rushed or careless work will be redone during school hours.

PRACTICE MAKES PERFECT

Have an adult test you on your times tables. If you cannot recall the answer in 3 seconds or without using your fingers, you do not know them! Create a set of flashcards for the times tables you find tricky. For every day you practice this term, receive 5 dojo points! **(must have parent signature)**

Maple Class Home-Learning

Term 1

PRACTICE MAKES PERFECT

Find a chapter book you are currently reading (or get one from the library/classroom). Take it home and find a page that has some great description, action, dialogue, or all of the above. Bring it to school and we'll photo copy the page. Finally, you will analyse the author's writing style and explain how you can incorporate this style in to your own writing.

CREATIVE

Please make a colourful poster showing place value with digits ranging from the thousandths (decimals) all the way into the millions.
Take pride in this poster! It could serve as a helpful visual tool and be hung up in the classroom.

TALK TIME/ SHOW AND TELL

Set a timer for 5 minutes. Write down a list of jobs you can think of (exact titles aren't necessary). Then sort the jobs into 2 columns: "**No University required**" & "**University Required.**" Now discuss the jobs you see yourself doing when you get older. Discuss the importance of your education.
