Atlanta, GA, September 18, 2018 - Artist/Songwriter Swayze Jones announces the official follow up to most recent single, "**Suicide**" with a standout a new record! **The newest release "Lately"** is filled with Swayze's smooth voice, complimented by exceptional production and an unbiased openness about love and relationships. This song features a signature collaboration with the well known composer The Beat Plug and Audio Engineering & Production by Smoovie J. of New Hitzville, USA.

***"Everything about Swayze Jones is dope. Her image, music, personality and energy are contagious."* - TeamBiggaRankin.com**

The single pays homage to singer/songwriter Janet Jackson with a penetrating sample of her 1989 single "Lonely" mixed with undeniable percussion, sophisticated melodies and complex rhythms. Swayze Jones states, "The idea behind the record came from a real life experience. Most people at some point have had that friend with benefits that ends up becoming the only one they really mess with. In the record I say *"nobody's safe"* because more times than not this type of situation leads to feelings you can never ignore. Listening to the record I hope the fans will catch on to the deeper meanings. For example, the idea of the *"breakdown"* in the record is referring to the act of breaking down marijuana but also the moment when I break down exactly how I'm feeling about the situation on the record."

"Lately" is available now on all digital platforms. Links to the release on ***iTunes, Apple Music, Spotify, Google Play*** more are now available. **For more information, promo requests, or to set up an interview, please contact:**
