

Elma Kay, Ph.D.
Science Director (Terrestrial)

Dr. Elma Kay is a Belizean scientist and a co-founder of the University of Belize Environmental Research Institute. She is the current Administrative and Science Director (Terrestrial) for the Institute. Dr. Kay, who is a field biologist, is also an Assistant Professor in the Natural Resources Management Program at the University of Belize. She holds a doctorate from Saint Louis University and prior to working in Belize held a postdoctoral position at the University of Missouri–St. Louis in the E. Desmond Lee and Family Laboratory of Molecular Systematics. Her research has focused on the ecology, evolution and systematics of plants and forest ecology and management.
