

Canine Atopic Dermatitis Immunotherapeutic*

TRACK YOUR DOG'S ITCHING TO SEE HOW WELL THEIR ATOPIC DERMATITIS IS BEING CONTROLLED

Use the Itch Tracker tool to track your dog's success

Understanding how your dog's itch has improved over time will help your veterinarian ensure that your dog receives the appropriate care. The Itch Tracker on the other side of this page will help you keep track of the change in your dog's itching.

How to use the Itch Tracker

Each day at the same time, make a note of how severe your dog's itching has been in the past 24 hours. Rate the severity based on the scale shown. Place a dot at the appropriate spot in that day's column. Connect the dots to show how your dog's itching has changed over time. When you return to the veterinarian, show him or her the results you have recorded on the chart.

*This product license is conditional. Safety and efficacy studies are in progress.

How to rate your dog's itch

100 EXTREMELY SEVERE ITCHING

Dog is scratching, chewing, licking almost continuously. Itching practically never stops, regardless of what else is happening around the dog.

80 SEVERE ITCHING

Prolonged episodes of itching when the dog is awake. Itching occurs at night and also when eating, playing or exercising, or when otherwise distracted.

60 MODERATE ITCHING

Regular episodes of itching when the dog is awake. Itching may occur at night and wake the dog. No itching when eating, playing, exercising or being distracted.

40 MILD ITCHING

Moderately frequent episodes of itching. There may be occasional episodes of itching at night. No itching when sleeping, eating, playing, exercising or being distracted.

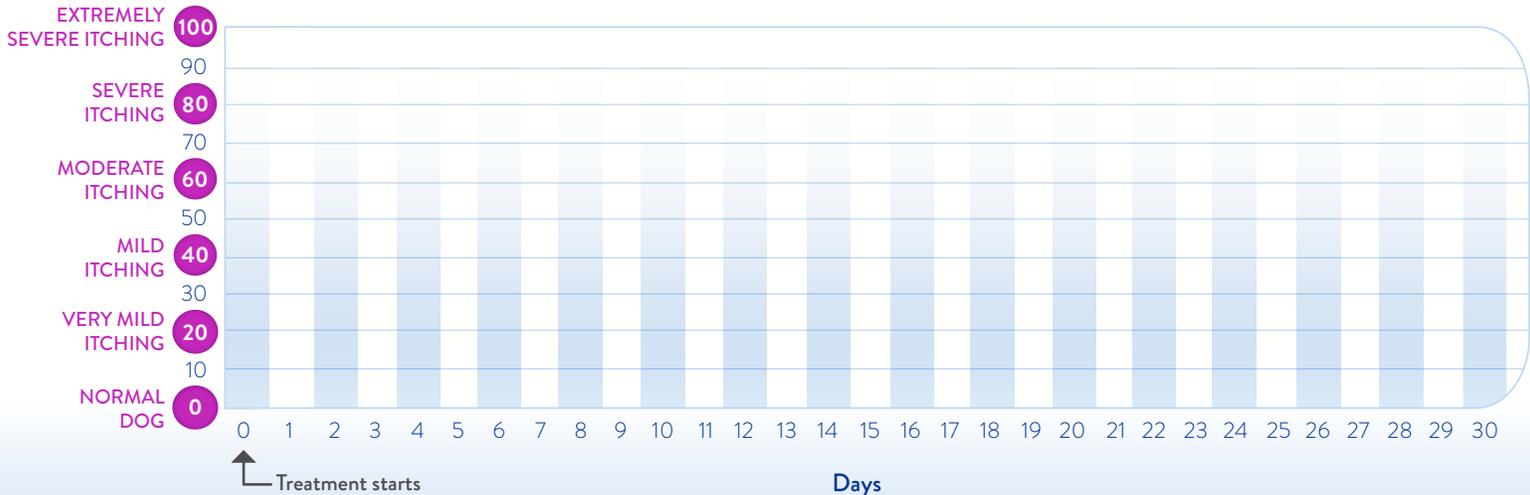

20 VERY MILD ITCHING

Occasional episodes of itching. The dog is slightly more itchy than before the problem began.

0 NORMAL DOG

Itching is not a problem.
