The Neuter Agreement Constraint in Lithuanian

Luke Adamson and Milena Šereikaitė†
University of Pennsylvania

CLS 54 April 26, 2018

1 Introduction

• Lithuanian has been reported to have three genders reflected on adjectives: masculine, feminine, and neuter (Ambrazas et al. 1997:134).

(1) Kėd-ė buv-o graž-i.
Chair-NOM be.PST.3 beautiful-NOM
‘The chair was beautiful.’

• The neuter, however, is unusual: there are no lexical nouns with inherent neuter gender, only pronouns and quantifier-like elements (cf. other languages with three genders, such as Greek, Icelandic, and Russian) 1

(2) Neuter pronouns: 
  - tai (‘it, this’); 
  - viskas - ‘everything’
  - viena/kita (‘one/another’ for events), 
  - visai/viša tai (‘everything’), 
  - kas (‘what’), 
  - kaškas (‘something’), 
  - niekas (‘nothing’)

• This study analyzes gender and agreement properties in Lithuanian, with a focus on neuter pronouns and adjectives.

• We demonstrate that in Lithuanian, there exists what we call the Neuter Agreement Constraint (NAC):

  – Neuter Agreement Constraint: Neuter arguments are compatible with nominal predicates, but they fail to control agreement on adjectives, yielding ungrammaticality.

(3) a. Karas padarė miest-ą tikra betvarke.
‘The war made the city (into) real chaos.’ Nominal Predicate

b. Karas padarė miest-ą neatpažišta/na neatpažištamu.
War.NOM.M.SG make.PST.3 city[ACC.M.SG] unrecognizable[ACC.M.SG] [INST.M.SG]
‘The war made the city unrecognizable.’ Adjectival Predicate

(4) a. Karas padarė viska/tai tikra
War.NOM.M.SG make.PST.3 everything[ACC.NEUT]/that[ACC.NEUT] real[INST.E.SG]
betvarke.
chaos[INST.E.SG]
‘The war made everything/that (into) real chaos.’ Neuter + Nominal Predicate

*We would like to thank several people for their insight on this project, including Elena Anagnostopoulou, Jonathan Bobaljik, Željko Bošković, David Embick, Julie Anne Legate, and Rolf Noyer, members of the Penn reading group FMART, and audiences at PLC 42 and the University of Connecticut LingLunch. All faults herein are our own. Some data come from our consultants, including one of the authors, who is a native speaker of Lithuanian, and some data come from the Lithuanian corpus at tekstynas.lt.

†You can contact us through email: adamsonl@sas.upenn.edu, milenas@sas.upenn.edu

1 Don Ringe (p.c.) reports that Lithuanian is not unique in having a set of pronouns like this; the neuter in Tocharian was inherent only for pronouns referring to events or propositions, and Spanish has something similar.
b. *Karas padarė viskà/taĩ
War.NOM.M.SG make.PST.3 everything/that. ACC.NEUT
neatpažįstama/neatpažįstamu/neatpažįstama.
unrecognizable. ACC.M.SG/unrecognizable. INST.M.SG/unrecognizable. NEUT

Int. ‘The war made everything/that unrecognizable.’ Neuter with Adjectival Predicate

• The existence of the NAC is striking because neuter forms exist in various positions and cases, indicating that the NAC is not a result of the language lacking certain agreement forms.

Proposal:
(i) The NAC is due to a failure of obligatory agreement.
(ii) When agreement is obligatory between an argument (‘controller’) and an agreeing expression (‘target’), the target must receive gender features. (terms from Corbett 1991, ia.)
(iii) NAC agreement fails because neuter pronouns lack gender features altogether.
(iv) Lacking gender is distinct from ‘default’ gender, which is masculine in the language.

• Our proposal has implications for the representation of gender: i.e., default vs. its absence.

• Our analysis also shows that agreement failure can result in ungrammaticality rather than in default forms. This is incompatible with the Failed Agree approach of Preminger 2011.

• Road Map
  – Section 2 Neuter Pronouns and Neuter Adjectives
  – Section 3 The Neuter Agreement Constraint
  – Section 4 Analysis
  – Section 5 Implications

2 Neuter Pronouns and Neuter Adjectives

• In this section, we demonstrate that both neuter pronouns and adjectives occur in different case positions and configurations.

2.1 Neuter Pronouns

(5) Neuter pronouns: taĩ (‘it, this’); viskas - ‘everything’ šitaĩ (‘it, this’), viena/kìta (‘one/another’ for events), visais/viša taĩ (‘everything’), kas (‘what’), kaškas (‘something’), niekas (‘nothing’)

• First, we demonstrate that neuter pronominal forms of taĩ and viskas inflect in all cases.

Table 1. Paradigms of taĩ and viskas

<table>
<thead>
<tr>
<th>Case</th>
<th>taĩ - this/it.NEUT</th>
<th>viskas- everything.NEUT</th>
</tr>
</thead>
<tbody>
<tr>
<td>NOM</td>
<td>tai</td>
<td>viskas</td>

<tr>
<td>DAT</td>
<td>tam</td>
<td>viskam</td>
</tr>
<tr>
<td>INST</td>
<td>tuo</td>
<td>viskuo</td>
</tr>
<tr>
<td>LOC</td>
<td>tame</td>
<td>viskame</td>
</tr>
</tbody>
</table>
• We provide neuter pronouns in NOM, ACC, and GEN in context. (See Appendix 1 for more cases)

• Copular Sentences, Nominative subjects

(6) Viskas/tai yra tikra nesamonė.
Everything/NOM/this.NOM, NEUT be.PRS.3 real.NOM nonsense.NOM
‘Everything/this is real nonsense.’

• Accusative object

(7) Jis valgė viską/tai.
He.NOM eat.PST.3 everything.ACC/that.ACC, NEUT
‘He ate everything/that.’

• Genitive objects under negation

(8) Jis ne-valgė visko/to.
He.NOM NEG-eat.PST.3 everything.GEN/that.GEN, NEUT
‘He didn’t eat everything/that.’

2.2 Neuter Adjectives

• We demonstrate that neuter adjectives can appear in different case environments when substantivized.2

• Nominative subjects3

(9) Gėra eina toli, blōga dar toliau.
Good.ACC, NEUT go.PRS.3 far, bad.NOM, NEUT still farther
‘Good goes far, evil goes still farther.’ (Ambrazas et al. 1997:136)

• Accusative objects

(10) Jis matė gėra ir blōga.
He.NOM see.PST.3 good.ACC, NEUT and bad.ACC, NEUT
‘He saw good and bad.’

• Genitive objects under negation

(11) Blōga ne-patyr-ęs, gėra ne-pažin-si.
Bad.GEN, NEUT NEG-experience-ACT.PRT.NOM.M.SG, good.GEN, NEUT NEG-know-FUT.2.SG
‘Having experienced no evil, you cannot recognize good.’ (Ambrazas et al. 1997:136)

INTERIM SUMMARY: Forms exist for both neuter pronouns and neuter adjectives in various cases. There are no morphological gaps.

2This is not ellipsis, which takes on the gender of the antecedent.

(i) Aš mėgstu žalią automobilį labiau nei raudoną/raudona.
I.NOM like.PRS.1.SG green.ACC, M.SG car.ACC, M.SG more than red.ACC, M.SG red.NOM
‘I like the green car more than I like the red.’

3Note that the neuter adjectives resemble the NOM.FEM.SG in form, but the two have distinct accentuations: gėra ‘good’ is neuter while gerą ‘good’ is feminine.
3 The Neuter Agreement Constraint

- **NAC**: While both neuter pronouns and neuter adjectives exist independently in different case positions, they cannot co-occur in agreement environments.

- Neuter pronouns fail to control obligatory agreement in gender and number with adjectival predicates.

- We demonstrate that this results in ineffability in various environments.

3.1 Neuter Pronouns + Adjectives

3.1.1 Nominative

- Depictives – agree in gender, number, and case (GNC) with NOM subjects. Neuter pronouns do not allow depictives.

(12) Ėčeburekai atkeliau šaltį.  
Chebureki[NOM.M.PL] arrive.PST.3 cold[NOM.M.PL]  
‘The chebureki arrived cold.’

(13) **Viskas**/that atkeliau  
Everything/NOM.NEUT arrived.PST.3  
(*šalta/*šaltas/*šaltà)  
cold[NEUT]/cold[NOM.M.SG]/cold[NOM.F.SG]  
‘Everything/that arrived cold.’

3.1.2 Accusative

- Depictives agree in GNC with ACC objects. Neuter pronouns do not allow object depictives.

(14) Jis valgė daržoves žalias.  
He.NOM eat.PST.3 vegetables[ACC.M.PL] raw[ACC.M.PL]  
‘He ate the vegetables raw.’

(15) a. Jis valgė **viską** (*žalia/*žalią/*žalia*).  
He.NOM eat.PST.3 everything[ACC.NEUT] raw[NEUT]/raw[ACC.M.SG]/raw[ACC.F.SG]  
‘He ate everything (raw).’

b. Jie valgė tai iš vienos lėkštės  
They.NOM eat.PST.3 that[ACC.NEUT] from one plate  
(*žalia/*žalią/*žalia*)  
raw[NEUT]/raw[ACC.M.SG]/raw[ACC.F.SG]  
‘They ate that from one plate (raw).’

- Causative ‘make’ constructions require GN(C) agreement between object causees and resultative adjective. Neuter pronouns cannot occur with resultative adjectives.4

(16) Karas padarė miestą neatpažįstamą/neatpažįstamu.  
War.NOM.M.SG make.PST.3 city[ACC.M.SG] unrecognizable[ACC.M.SG]/[INST.M.SG]  
‘The war made the city unrecognizable.’

(17) *Karas padarė **viską**/that  
War.NOM.M.SG make.PST.3 everything[ACC.NEUT] that[NEUT]  
neatpažįstamą/neatpažįstamu/  
unrecognizable[ACC.M.SG]/unrecognizable[INST.M.SG] unrecognizable[NEUT]  
‘The war made everything/that unrecognizable.’

---

4 Note that (17) is ungrammatical with both masculine and feminine inflections of the adjective in both accusative and instrumental.
3.1.3 Accusative/Instrumental

- Small Clauses with ACC objects and INST adjectives. With neuter pronouns, adjectival predication is ungrammatical (19).

(18) Mes laikėme ji išmintingu.
We.NOM consider.PST.1.PL him [ACC.M.SG] wise [INST.M.SG]
'We considered him wise.'

(19) *Mes laikėme tai/viską
We.NOM consider.PST.1.PL it [ACC.NEUT] /everything [ACC.NEUT]
gražu/gražiu/gražia.
'We considered that/everything beautiful.'

3.1.4 Genitive

- Genitive of Negation: While object depictives can bear genitive case, neuter pronouns yield ungrammaticality with depictives.

(20) Jis ne-valgė daržovių žalių.
He.NOM NEG-eat.PST.3 vegetables [GEN.M.PL] raw [GEN.M.PL]
He didn’t eat the vegetables raw.

(21) Jis ne-valgė visko to
He.NOM NEG-eat.PST.3 everything [GEN.NEUT] /that [GEN.NEUT]
'He didn’t eat everything /that raw.'

3.1.5 Dative

- ‘Let’ takes dative objects. Neuter pronouns are ungrammatical with agreeing secondary predicates.

a. Jie leido jam būti veinam.
they.NOM let.PST.3 him [DAT.M.SG] be.INF alone [DAT.M.SG]
'They let him be alone.'

b. *Jie leido viskam būti šalta/šaltam/šaltai.
'They let everything be cold.'

3.2 Neuter Pronouns + Nominal Predicates

- However, neuter pronouns can occur in the same environments when the agreeing predicate is nominal rather than adjectival.

- This is because the gender and number of the nominal predicate do not come from the neuter pronoun.

5 Adding ‘in the kitchen’ before the depictive aids the relevant interpretation. The reduced relative reading is possible, but irrelevant.
3.2.1 Accusative (Instrumental)

(23) Karas padarė miest-ą tikra betvarke.  
War.NOM.M.SG make.PST.3 city.ACC.M.SG real.INST.F.SG chaos.INST.F.SG  
‘The war made the city (into) real chaos.’

(24) Karas padarė viskų/tai tikra betvarke.  
War.NOM.M.SG make.PST.3 everything.ACC.NEUT that.ACC.NEUT real.INST.F.SG  
‘The war made everything/that into real chaos.’

3.2.2 Accusative Instrumental

(25) Mes laikėme jį išminčiumi.  
We.NOM consider.PST.1.PL him.ACC.M.SG wise.man.INST.M.SG  
‘We considered him a wise man.’

a. Mes laikėme tai savaime suprantamą dalyku.  
We.NOM consider.PST.1.PL it.ACC.NEUT self understood.INST.M.SG thing.INST.M.SG  
‘We considered that an understandable thing.’

b. Jis laikė viską visišką nesamone.  
He.NOM consider.PST.3 everything.ACC.NEUT absolute.INST.M.SG nonsense.INST.M.SG  
‘He considered everything absolute nonsense.’

3.2.3 Genitive Instrumental

(27) Mes ne-laikėme jo išminčiumi.  
We.NOM NEG-consider.PST.1.PL him.ACC.M.SG wise.man.INST.M.SG  
‘We did not consider him a wise man.’

(28) Jis ne-laikė to savaime suprantamą dalyku.  
He.NOM NEG-consider.PST.3 it.ACC.NEUT self understood.INST.M.SG thing.INST.M.SG  
‘He did not consider that an understandable thing.’

3.2.4 Dative

(29) Jie leido miestui sugriūtį šipulius.  
they.NOM let.PST.3 city.DAT.M.SG fall.INF to pieces.ACC  
‘They let the city fall to pieces.’

(30) Jie leido viskam sugriūtį šipulius.  
they.NOM let.PST.3 everything.DAT.NEUT fall.INF to pieces.ACC  
‘They let everything fall to pieces.’

3.3 Primary versus Secondary Predication

• It may seem that the NAC only applies to instances of secondary predication. However this is not the case.

• Evidentials take genitive quirky subjects6 and allow primary predication.

6Evidence for the subjecthood of the genitive comes from binding of the subject-oriented anaphor savo (Šereikaitė 2017).

(i) Ingos nuramin-ta vaikas savo namuose.  
Inga&GEN calm.down-NEUT child.NOM self&GEN house.LOC  
‘Inga must have calmed the child down in her own house.’
(31) Jo būta nuostabaus.
He,GEN.M.SG be.NEUT wonderful,GEN.M.SG
‘He must have been wonderful.’

• While neuter pronouns can appear as evidential subjects (32-33), copular adjectives yield ungrammaticality in the construction (34).

(32) Juk kiekvieno jaunystėje visko būta.
of course each youth.LOC everything,NEUT be,NEUT
‘And of course a lot of things must have happened in each of our youths.’

(33) To tikrai būta mano gyvenime.
That,NEUT definitely be,NEUT me,GEN life,LOC
‘That definitely must have happened in my life.’

(34) *Visko/to būta nuostabu/nuostabaus/nuostabios.
everything,GEN.NEUT/that,GEN.NEUT be,NEUT
nuostabu/nuostabaus/nuostabios.
‘Everything must have been wonderful.’

3.4 Summary

• We summarize the adjectival agreement facts below.

<table>
<thead>
<tr>
<th>Type of Agreement</th>
<th>viskas - everything</th>

<td>*</td>
<td>N/A</td>
<td>✓</td>
</tr>
</tbody>
</table>

• Neuter pronouns cannot co-occur with adjectives, but allow nominal predicates.

4 Analysis

• Given these facts, we propose the following:
  – We analyze the NAC as “agreement failure.”
  – We propose that adjective agreement requires gender to be transmitted from the controller to the target.
  – Crucial to this account is the idea that ‘neuter’ is the absence of gender in Lithuanian.
  – Neuter pronouns lack gender and therefore fail to transmit gender features to the adjective.
4.1 Neuter as the absence of gender

- Neuter adjectives lack gender. Evidence comes from:
  - Nonfinite subjects. Cross-linguistically, clauses take default morphology and (when not nominalized) have been analyzed as lacking gender. (See Kramer 2015 and references therein.)
    
    (35) Pavargti už tėvynę (yra) 
    suffer.INF for homeland.ACC be.PRS.3 
    gražų/*gražus/*graži. 
    beautiful.NOM.M.SG beautiful.NOM.F.SG 
    ‘To suffer for one’s homeland is beautiful.’ (adapted from Ambrazas et al. 1997:643)
  - Adjectival subjects, which we assume lack n (Bošković 2013), and therefore lack gender (Kramer 2015)
    
    (36) a. Saldū (yra) gardu/*gardus/*ardi. 
    sweet.NOM.NEUT be.PRS.3 delicious.NEUT delicious.NOM.M.SG delicious.NOM.F.SG 
    ‘Sweet is delicious.’
    b. Raudóna (yra) gražū. 
    red.NOM.NEUT be.PRS.3 beautiful.NEUT 
    ‘Red is beautiful.’ (adapted from Ambrazas et al. 1997:136)
  - Sentences that lack projected subjects
    
    (37) (Lauke) šalta. 
    Outside.LOC cold.NEUT 
    ‘It is cold (outside).’
    (38) (Miške) tamsu. 
    Forest.LOC dark.NEUT 
    ‘It is dark (in the forest).’

- Note, however, that neuter is distinct from the default gender in the language.
  - The default gender is masculine, as shown by coordination of gender-mismatched DPs.
    
    (39) Kédė ir stalas yra 
    chair.NOM.F.SG and table.NOM.M.SG be.PRS.3 
    purvini/*purvinos/*púrvina. 
    dirty.NOM.M.PL dirty.NOM.F.PL dirty.NEUT 
    ‘The chair and the table are dirty.’

4.2 Gender Representation

- We propose that in Lithuanian, neuter pronouns lack gender.
- Lacking gender is distinct from default gender in feature geometric terms (Harley and Ritter 2002).
- Neuter pronouns only have Root; they do not have Class, while masculine nouns do. This is consistent with the fact that neuter is not inherent to any lexical noun.

(40) a. Feature Geometry (modified from Harley and Ritter 2002) 

```
                  Root
                   ↑
                   Class
                   ↓
Masculine  Feminine
```
• For coordination between unlike genders (including inanimates), the coordinate phrase will project the value shared by both conjuncts: CLASS. The Vocabulary will distinguish between CLASS (a ‘masculine’ form) and the neuter, which is the elsewhere item.

• Vocabulary Insertion proceeds by the familiar Elsewhere Principle (Halle 1997).

(41) a. Kėdė ir stala yra purvin/*purvinos/*pūrvina.
    The chair and the table are dirty.

b. Chair [CLASS] + Table [CLASS] → CoordP [CLASS]

    |                              |
    | +fem | +class | +pl  |
    | ↔    | -os    |      |
    |      | {√PURVIN...} |      |

d. [class] + [pl] → -i / {√PURVIN...}

• This correctly predicts the coordination resolution facts: both conjuncts will have CLASS, and therefore the overall coordinate phrase will as well, triggering the masculine default on the agreement target.

• Because neuter pronouns lack gender, they give a rise to the NAC.

• The agreement between the neuter pronoun and the adjective fails and results in ungrammaticality.

(42) a. *Karas padarė viska/tai
    'The war made everything/that unrecognizable.'

b. "viska/tai" "unrecognizable"

5 Implications and Remaining Issues

• The study also indicates that agreement can ‘fail’ in a way that yields ungrammaticality rather than default (cf. Preminger 2011).

• This study has broader implications for the representation of gender, particularly for ‘absence’ versus ‘default’.

• A remaining complication is that neuter pronouns can occur with neuter adjectives in copular constructions.

(43) Viskas/tai buvo gražu.
    'Everything/this was beautiful.'
• We speculate that finiteness is the relevant factor that ‘licenses’ neuter adjectives, allowing adjectives not to agree. This is supported by the fact that neuter pronouns are ungrammatical with predicative adjectives in gerunds.

‘Everything being in a constant movement, things look relatively stable.’ (Internet)

(45) *(Viskam [DAT.NEUT] būnant gražu), ne viskas yra gera.

‘While everything is beautiful, not everything is good.’

• Thanks for listening!
