

## Personal Statement

In my last two years at School my favourite and most successful subjects have been I.T, History, Maths and English. I have particularly enjoyed IT as I have had the opportunity to use Microsoft PowerPoint to create and deliver presentations. In addition, during this class I have frequently used Microsoft Excel to conduct data analysis. I have also found English interesting as I enjoy writing stories and have received good grades and feedback from my teacher on my comprehension. In addition to gaining knowledge in these subjects I have also learned many new skills that will be useful in the future. For example, through taking these subjects I have developed my word processing skills as well as my written communication skills. During my time at school I have achieved good attendance, punctuality and behaviour certificates, good mock exam results and good homework and class-work grades.

I am a prefect in school which includes many responsibilities, such as supervising the canteen corridor and queues as well as supporting teachers during events such as parents evening. These experiences have helped me to become more responsible and reliable.

I recently gained some useful volunteering experience at Green Flag. Some of my duties involved supporting my manager to fix car tyres by helping to fill in the required paperwork. At first, I found it quite difficult because I did not know anything about cars. However, I found using the Internet and speaking with my manager useful in order to gain more information about cars which made completing my duties a bit easier for me. I was also good at speaking with customers. This experience allowed me the opportunity to work on my own initiative and develop my verbal communication skills.

My other achievements, both in and out of the school, have been in sport. The sports I like are cricket and football. I have received certificates in cricket for being a good captain for my club. For relaxation, in my leisure time I enjoy being a member of a Cricket Club. I like being a member of the club because in cricket you stay fit, and it also helps you to do more hard work.

After finishing school I intend to go to the 6th Form to study A Levels. The subjects I hope to study are English Language, Maths, Physics and Business Studies. I know that as I mature my decisions in career may change, therefore I would like my A level studies to reflect a wide range of opportunities. Once I finish college I hope to attend university. Overall I think I would be a great asset to the 6th form college. I am really looking forward to attending college so I can concentrate on my studies and fulfil my potential. I am also eager to take part in social activities, and am greatly looking forward to meeting new people.
