

What is on the Moon and Underneath Antarctica

Human Moon Bases and Colonies

This is approximately what the Lunar Operations Command base looks like on the moon that the highest tier of the Secret Space Program is in charge of. The base is made up of polymer none destructible biodegradable materials and shield reflective plexi-glass windows.

As well there are dome cities on the moon with human colonies. These cities have a sustainable atmosphere and gravity so human populations can live in them for prolonged periods of time.

Originally there had been domed cities built on the moon by the ancient builder races, and the SSP reverse engineered the architecture of these cities in order to build their own bases as well as livable habitat colonies.

What is on the Moon and Underneath Antarctica

Moon Dome Cities High Rises

These are images of the moon dome cities. The cities are high rise buildings with living quarters, hydroponic and aquaponics gardens, parks, research facilities, working offices, small shopping malls, etc.

There are electromagnetic elevators and lifts that travel up and down between the various floor levels of the domed cities. As well there are tube tunnels for subway trains and hover cars to transport people or equipment throughout the cities.

The cities having walking trams for those individuals who prefer to walk or use the cycle hover scooters throughout the city instead of taking transportation.

There is clean air and recyclable water that is continually self filtered making it safe to live in the eco friendly sustainable cities.

What is on the Moon and Underneath Antarctica

Ascension technology left behind on the moon by the ancient builder races. This tech allows human beings to energetically evolve to higher dimensional states of existence through the light ray crystal bio modules imbedded in the ascension chairs.

The ascension technology is located in the ancient ruins on the moon. All the ruins are off limits for visitors only select people who are assigned to study them can have entrance access for research purposes. The ascension chamber chairs have energetic key code sequences that when activated can still create ascension time dilation windows which can change the molecular structure of the human body to rapidly evolve to a different dimensional level then what they used to be before sitting in the ascension chair.

What is on the Moon and Underneath Antarctica

Location of Atlantis Base and City currently covered by continental ice sheet

What is on the Moon and Underneath Antarctica

Largest Atlantean Base in Antarctica

This is one of the largest Atlantean bases along with cities that is located in the middle of Antarctica. The location of this base outpost is shown in the previous slide image of the Antarctica map.

There are other Atlantean outposts and cities that were built on the continent of Antarctica. These outposts and cities are still covered by the continental ice sheets that is why they cannot be seen on the surface of Antarctica with satellites.

These bases, outposts, and cities are still functional and are being used by the Secret Space Program as their operational facilities on Earth in conjunction with the Moon and Mars bases/colonies.

In the below two slides there is information provided about what type of Ancient Builder Race technology was found in the Atlantean outposts in Antarctica.

Hidden Truth About Antarctica

There are ancient Atlantean city bases under the Antarctica ice in tunnel chambers, as well there is a crystal skull there that various scientist expeditions want to retrieve.

Free energy crystal power generator station.

Scientist teams are going to Antarctica to retrieve the builder races (ET) advanced technology like crystal power generators, psychic chairs that allow neural link interfaces with multiple people at the same time, cryo-genic sleeping pods, and advanced micro – computer technology.

Tunnel systems to the Atlantean city base outposts.

Hidden Truth About Antarctica

Secret tunnel entrances for the stealth propulsion powered submarines to enter Antarctica. These submarines travel close to the speed of light under water.

Psychic chairs that allow to create neural links for forms of telepathic communication and bilocation travel.

This is what the Atlantean city outposts looked like in Antarctica before two of the last ice ages covered up the outposts. The advanced technologies of the builder and guardian races are still located in these outposts. This technology has free energy source power and also star gateway portals that are still active, allowing for space travel to nearby planets or galaxies.
