EL Race Descendants of the Ancient Builder Races

The EL's are a 12D and upper dimension (Builder/Creator) race who inhabit the unknown space universe. They have light bodies and can change body forms, they can have both a corporeal body and a non-corporeal body. This race has the ability to change their appearance to whatever they want to look like, and they are shape shifters. Their third eye is psychically developed so they have many telepathic and psychic abilities, as well they can manifest anything at will with their thoughts as the mind is connected to the heart center, allowing to create or make anything as a possibility. The EL's have surpassed time and space and have ascended to the highest dimensions possible so they no longer need physical bodies and often exist as pure energy. This race is twelve feet to fourty feet tall in height, they have both male and female genders. Once the EL race colonized a planet they created great libraries that were housed in deep underground empires of enormous cities. In the libraries tiny crystal records contain the history of the Universe from the EL's vast travels, and this information is enclosed in a magnetic field, which at times, finds an affinity with some sensitive person living on the Earth today.

The EL's were one of the very first races to have once lived on ancient Earth a long time ago from about 250,000 - 300,000 years in the past and they left remnants of their advanced technology on the planet. Back in the ancient times the EL's were called giants because of their tall stature compared to humans who were at that time about 7 feet tall. The EL's created various colonies on Earth and they knew how to make stasis chambers so some of the giant guardians remained behind on the planet in cryo-sleep to wake up thousands of years later when Wave X energies come to the planet which is happening now, so these giants might awaken at some point to witness the evolutionary process currently happening on the planet.

Descendants of the Ancient Builder Races

Akashen EL Universe Starship

The Akashen is an exploration vessel that comes 13,000 years from the future in the EL universe. This ship can open up time dilation portals with its spinning matrix vortex drives which are located at the back of the ship. The Akashen has 20 sections on the ship, with living spaces, research labs, two engine rooms, parks, libraries, etc. This ship is half the size of Earth so it is very large.

The crew compliment of the Akashen is 2000 + members and it is a combination of the EL's, Pleiadian's, Andromedans, some Arcturian hybrids, and also some Lyran species. As well there are a few Sirian crew members. The Akashen is here to help with maintaining the positive timelines so the Milky Way Galaxy receives its incoming electromagnetic waves which are helping with human rapid evolution, and that Earth experiences its ascension process.

Descendants of the Ancient Builder Races

Akashen Time Gateway Corridors

The Akashen has time gateway corridors that allow people to view various different timelines as well as seeing what is going on in different galaxies.

These time gateway corridors can accelerate time so what seems like two hours of Earth time is actually two month's time on the Akashen.

When one of the walls of the corridor is touched then the wall opens up holographically to become a medium sized window and the viewer can see what is happening outside of the ship. There are views of space and the viewer can see the various types of planets or galaxies that the Akashen is passing by when the ship is traveling through space at slower warp speeds.

Descendants of the Ancient Builder Races

Akashen Ship Architecture

This building is an example of being similar in its design structure of how the Akakshen has tall and spiraling hallways, curving ceilings, and rising archways.

The Akashen has blue lighting throughout the ship that creates a calming and soothing atmosphere.

The energetic levels on the ship are that of the eighth dimension and higher as the ship has bio-living components that it was built from.

The operations on the ship are done telepathically and are based on holographic technology.

Descendants of the Ancient Builder Races

Interior of the Akashen Ship

The interior of the Akashen has designated locations for park type gardens as well as hydroponics and aquaponics gardens where organic foods are grown.

All the locations on the ship have bio-living lighting which creates day light which looks and feels natural.

The Akashen is designed for long distance travel for a couple of thousand years. There are cryo-genic sleeping pods where the crew is in stasis when the ship is traveling for long periods of time in space. Even when in stasis the Akashen crew is psychically aware of what is going on in the ship and in the areas of space where they are traveling towards.

Descendants of the Ancient Builder Races

Akashen Doorways and Platforms

The Akashen has doorways and platforms on the ship with elaborately decorated ancient sacred geometry symbols which regulate the flow of fluidic space time on the ship.

The crew on the Akashen is part of the Ancient Builder Races that had colonized Earth billions of years ago. Some of the Akashen crew are two thousand years old and range in height up to thirty feet tall. The EL crew are the ones that are descended from the Ancient Builder Races. They have light pale blue skin or silver skin tones.

Descendants of the Ancient Builder Races

Anishen EL Universe Starship

The Anishen can create neutron and proton particle proto blasts from its bio feedback emitters. This creates new universes out in space.

The EL's were one of the seed races that created the big bang blast which formed the known universe where the Milky Way Galaxy was made.

All the neutron and proton blasts have bio-living matter in them which create the beginning blocks of living matter for human life to form. Seeding the human building blocks of life in different universes is part of what the EL races used to do.

The Anishen is half the size of what the Akashen ship is and the Anishen helps to retrieve star seed souls which are incarnated extraterrestrial humans on Earth who are from other planets. When the time comes these extraterrestrial souls get to go home once they have completed their mission(s) on Earth.

Descendants of the Ancient Builder Races

Shuttle Craft from Akashen & Anishen Ships

This is what a large shuttle craft looks like that are housed on the Akashen and Anishen for short term space exploration expeditions when the ships are orbiting around newly explored planets or traveling near unknown galaxies.

The shuttle craft have solarized weapons for defense purposes and impenetrable shielding, so weapons are almost never used when the shuttles are doing research out in space.

All of the shuttles that come from the EL starships have distinct sacred geometry symbols on them and that is how they are distinguished as EL craft traveling out in space.

Since the EL races exist in the higher dimensions from the 12th to the 28th levels they are rarely seen in the known universe. There is a protective force field erected around the known universe that separates it from the EL universe which only the higher dimensional or multidimensional beings can access who have the highest spiritual vibrational frequencies.

EL starships are usually cloaked so they cannot be seen by telescopes or sonic radar out in space.

Descendants of the Ancient Builder Races

Akashen Crew Members

Name: Anaya
Species Race: EL
Dimension: 16th level
Skin Color: Blue/Silver
Hair Color: Blue/Silver
Height: Ten feet tall
Job: Inter species communication, wisdom teachings, and timeline interpretation, soul records.

Akashen Crew Members

Name: Arina
Species Race: EL/Pleiadian
Dimension: 14th level
Skin Color: Purple/Blue/Green
Hair Color: Blue/Purple
Height: Twenty feet tall
Job: Spiritual wisdom teachings, galaxy historian, communications specialist, inter species contact protocols
