Issue: October 2008

A look at the latest cutting-edge products in the industry.

Gait Harness System

The Total Transfer Gait Harness System by Second Step Inc, Eugene, Ore, combines therapeutic intervention with gait and balance intervention. The Total Transfer Gait Harness System offers therapists a combined transfer and therapy system that helps patients sit, stand, and walk without complex transfer setups. In addition, the system benefits both therapists and patients by helping to eliminate injury through lifting and patient falls.
