THREE ACES

About "Three Aces"

ThreeAces is a service for distribution of digital video games related to gambling industry.

ThreeAces acts as a service for downloading games and applications through internet to your personal computer or any other gadget as well as updates and news from gambling world.

Besides ThreeAces provides a unique opportunity to make payments to a game and withdraw real money.

ThreeAces creates a safe content for a player and at the same time it controls access areas for gambling worldwide.

1. Opportunities

1.1 ThreeAces serves as technical means for protection of authorship rights.

1.2 As ThreeAces downloads games directly from servers, it supersedes necessity to use an originator – an intermediate chain between a developer and a consumer.

1.3 A developer is more flexible to respond to the needs of the gambling society and fully control distribution of games.

1.4 A system of instant messages exchange with friends is integrated in to the software

1.5 Automatic games update function

1.6 Customers can enter societies, exchange achieved levels, sell and buy them through ThreeAces.

1.7 Each and every customer can submit payments to his/her account and buy any game or gambling currency.

1.8 Earn money in one game and spend it in another. Also achieved levels can be sold to other customers/players.

1.9 The software will provide access to all latest gambling news – hot news, release dates, exhibitions, popular tournaments etc.

1.10 In games which are a part of ThreeAces system you can implement awards and achievements. For example a box or a case, or it can be a jewel-box or a purse to open which you need a key, that key can be purchased for real money. By opening the box a player can obtain unique awards, for instance pictures of your card, a present which other players do not have, a sticker to avatar and so on.

1.11 ThreeAces monitors all games of a player and based on his/her achievements and time spent in the game, it grants levels to the players. As a result while crating lobby ThreeAces more thoroughly picks opponents. As compared to poker rooms when group game is over, ThreeAces determines those who risked more than others, those who had bigger points, who had luck, as well as all-in risk and grants awards and achievements to those who deserved them.

2. Project realization.

2.1 This project will be realized as a software installed to a user's computer, which will be linked to the main server.

The software will have different sections in particular sections for gambling, profile, news, community etc.

By this software a customer will get all advantages listed above.

2.2 This software can also be downloaded to basic mobile operation systems, thus a user will automatically have access to his/her purchases, statement of balance etc.

Server data base will have a base of game zones to control game access for real money.

3. Multiplayer game

ThreeAces functions responsible for gambling through internet will be to derive a server list, check client versions and server to maintain compatibility between them as well as provide a server ThreeAces user account and block accounts found in unfair gambling by means of Anti-Cheat service, and to access all multiplayer ThreeAces games.

4. ThreeAces Cloud

This function allows saving game data such as personal configuration, settings.

5. ThreeAces Community

ThreeAces-chat.

5.1 ThreeAces Community creates personal web pages in ThreeAces system, creates groups and joins the group. In each group there is a chat, the number of people in the chat is displayed in the group page.

5.2 Status of each user is displayed in his/her page. On line, off line, away, busy, in game (specifying the game) and asleep (inaccessible status for personal selection, which will be displayed automatically after two hour of idle time – in case mouse or keyboard are intact). Also personal web page displays time statistics for last 2 weeks separately for each game played.

6. ThreeAces inventory

A process for changing items from your inventory.

While playing a game a player can get some awards in the form of an item, or a player can get a virtual realty, which can be accumulated in his/her inventory.

7. Updates and off-line mode

When launching a ThreeAces client checks for updates for himself and all installed games on his computer. If ThreeAces starts installation of updates, a user can initiate a game but the installation of updates will be stopped. For multiplayer games updates are compulsory, as for single mode games ThreeAces provides an off-line mode in which you can play in ThreeAces games without internet and installation of compulsory updates.

8. An opportunity for promotional events

Examples:

Weekend sales

Every weekend there are sales for one of several games, As a rule this is 50-75% discount. Thus, any gambling currency can be purchased much cheaper than usually.

Midweek event

Each Wednesday ThreeAces offers significant discount for one or several games. As a rule this is a 50-75% discount.

Deal of the day

Each day a game is selected for a discount. Besides the deal of the day on Wednesdays there is also a midweek event.

Week of a publisher

Occasionally in ThreeAces there are significant discounts for a whole week for games of a particular publisher.

9. Account operations

9.1 Creation of account

A user can create an unlimited number of accounts. When ThreeAces is run for the first time, account creation button will be displayed automatically. A user must specify account name and a password, e-mail address can be used to restore the password as well as a secret question with an answer in case the user forgot the password. Account can be created through ThreeAces or through the store, however password restore request can be sent only through ThreeAces -client. Account name can contain Latin letters, digits and underscore "_" Besides account name must not be already registered as well as it must not contain such words as **ThreeAces and company names** — this is done to prevent any possibility to misrepresent oneself as the Company employees and administrators with a purpose of potential theft of a password.

9.2 Games purchase

ThreeAces user is eligible to download free and purchased games from ThreeAces servers from any place where ThreeAces -client can be used. Games can be purchased both separately (with some exceptions) and as a 'package' of games (in case there are such), which can be cheaper than the total cost of the same number of games purchased separately sometimes even several times cheaper (whereas one can download only a part of games from the package).

All purchases are made from the desktop of ThreeAces -client or on the website of the store through any web browser whereas data are transferred through encrypted

links. To provide more security, payment data are not stored, therefore each time a purchase is to be made one have to introduce credit card data. Purchases are made with the help of virtual cart. In ThreeAces you have a wallet, to which you can transfer money and keep it there. Payments are possible either through this only wallet.

9.3 Statistics

9.3.1 Selling statistics

ThreeAces provides selling statistics of the products (including retail if a game requires obligatory registration). As a result the developer receives prompt information regarding selling, which can be used to assess the success of the game as well as efficiency of promotional actions.

9.3.2 Software and hardware

ThreeAces gathers specific information from users' computers.

- Statistics of computers 'core' is gathered. Once a several months the statistics is reset and another query is done. Information on computers is sent to the Company only with the users consent. When statistics is being gathered a special window is displayed requesting users information on internet speed, availability of microphone. Results are published by the Company in public access on official ThreeAces web site.
- Besides ThreeAces gathers information on availability or absence of such software as Mozilla FireFox, OpenOffice.org etc.

9.3.3 Gaming process

- Data on methods of passing the game, places in games, which caused most complexity. This information for example can be used by the developers to make decisions on revising balance.
- If a game uses achievement system linked to ThreeAces system, then statistics page displays a percentage of players who made one achievement or another. Part of this statistics is accessible by the users on official website.

9.4 Withdrawing winnings.

The Project implements possibility to withdraw winnings, which can be accumulated on the player's account.

Withdraw is possible only if a player is directly in game zones.

Thus, this condition will provide withdrawing and replenishment of money only under legislative framework.

There is minimal established amount for withdraw as well as maximal, after which the managers of the Company will have to check fairness of money won.

To withdraw money a withdraw fee of '_'% is established.
