

CAREERS

#CyberFirst
ncsc.gov.uk/new-talent

How long do we spend watching video and streaming services?

Around 89 minutes a day – and I help protect every second.

£4k-a-year university bursary and £19k degree apprenticeship

We use our tech to document our modern world, from TV and film to live streaming and GIFs. But with so much now stored online, we've got to make sure all that footage is protected – and that's where cyber security comes in. If you've got a passion for tech – even if you don't know how to code yet – this could be the career for you. On our CyberFirst bursary or our degree apprenticeship, you'll get paid, qualified, and find a calling that helps keep our nation safe.

Visit ncsc.gov.uk/new-talent to find out more.

This is a
CyberFirst world.
Train for it.
