## How long do we spend online?

On average, 24 hours  
a week – and I help  
protect every second.

### £4k-a-year university bursary and £19k degree apprenticeship

Now more than ever, we live our lives online. We shop, chat, read, watch, listen and post. When everything about our world relies on a safe internet, we've got to make sure we defend it – and that's where cyber security comes in. If you've got a passion for tech – even if you don't know how to code yet – this could be the career for you. On our CyberFirst bursary or our degree apprenticeship, you'll get paid, qualified, and find a calling that helps keep our nation safe.
