Advantages of Fall Burndown

For optimum weed control for your farm, Tri-Ag Products presents all the options available in the market, the correct timing, and best ROI. It is recommended for control of winter annuals to apply herbicides any time after the first frost. Applying herbicides in fall results in a weed free seedbeds well into spring that allows for maximum soil warming and drying, greatest ease of tillage and planting, and the most consistently effective winter annual weed control. Fall treatments help take the pressure off of spring herbicide programs in a year when spring weather is less than ideal. Some winter annual weeds also serve as a host for soybean cyst nematode and other insects in late-fall and/or spring. The adoption of fall herbicide treatments resolves many of these issues.

PRODUCT	Size	RATE	Comments
BEAN PROGRAMS			
Barrage	2x2.5	18 oz	Equivalent to 51.8% 2,4-D Acid or 4.7 lb./gal. MSO and Surfactant already in product.
Generic Dicamba (Banvel, Diablo)	2x2.5	8 oz	Systemic Herbicide with activity on many broadleaves, specially marestail best in combination of 2,4-D.
Agri-Dex	2x2.5	2 Qt/100	High Load Crop oil that improves burndown at lower rate
2,4-D Ester LV4 (NO RETURNS)	2x2.5	32 oz	Equivalent to 44.6% 2,4-D ester or 3.84 lb./gal. Need Crop oil and is best on winter annuals in combination with Dicamba
Generic Dicamba (Banvel, Diablo)	2x2.5	8 oz	Systemic Herbicide with activity on many broadleaves, specially marestail best in combination of 2,4-D.
Agri-Dex	2x2.5	2 Qt/100	High Load Crop oil that improves burndown at lower rate
Generic Dicamba (Banvel, Diablo)	2x2.5	8 oz	Systemic Herbicide with activity on many broadleaves, specially marestail best in combination of 2,4-D.
Agri-Dex	2x2.5	2 Qt/100	High Load Crop oil that improves burndown at lower rate
Outlaw	2x2.5	32 oz	Equivalent to: 12.18% Dicamba Acid, 1.09 lbs./gal, 16.10% 2,4-D Acid or 1.45 lbs./gal, MSO already in product
Weedmaster/Rangestar	2x2.5	32 oz	Equivalent to: 10.3% Dicamba Acid, 1.00 lb./gal and, 29.6% 2,4-D ester or 2.87 lbs./gal
Agri-Dex	2x2.5	2 Qt/100	High Load Crop oil that improves burndown at lower rate
Fire-Zone (Hot Surfactant)	2x2.5	16 oz	Optimized for use in burn-down and desiccation applications, hotter than MSO
2,4-D LV 6	2x2.5	24 oz	Equivalent to 57.9% 2,4-D ester or 5.5 lb./gal. Need Crop oil and is best on winter annuals in combination with Dicamba
Generic Metribuzin DF	2x10	4 oz	Herbicide with activity on many broadleaves, specially marestail best in combination of 2,4-D and Dicamba
