

# **Great Explorations™**

## **Glowing Night Sky™**

### Instructions

Place your glowing shapes on wall or the ceiling, or apply to objects within your room, such as your dresser. Hang the mobile in one corner of your room and place the glowing stars behind them on the walls so you will have a complete experience of being in outer space. Expose your glowing creations to a light source for one minute, and watch them glow! The adhesive is safe, but do not use on fresh paint or wallpaper.
