

Great Explorations™

Glow in the Dark™

Instructions for all Glow-in-the-Dark stars

1. Expose the star to light for one minute.
2. Turn out the lights and watch the stars glow
3. To adhere stars to the wall or ceiling, apply a very small piece of putty (about the size of a baby pea) to the back of the star.
4. Position the star. Then, push firmly until secure.
5. To remove the star, gently rotate it until it comes free. The putty is safe and reusable, but please do not use it on fresh paint or wallpaper.
