

## **Role**

Dive Techs are responsible for working at the direction of Dive Leads in four-person teams to accomplish our waterfront restoration work. Dive Techs will dive for two to six hours per day at depths of around 10 feet to remove milfoil and other invasive species from their roots in lake floors. Teams consist of two divers and two dive tenders, who provide surface support. While job duties are shared, dive techs take pride in providing efficient, clean, quality service.

## **Duties**

- Day planning with dive team lead
- Gear set-up and testing
- Site preparation
- Milfoil removal with the aid of scuba gear
- Answering questions from customer
- Cleaning of site
- Waste disposal
- Record keeping
- Construction of bottom barriers
- Placement of bottom barriers
- Cleaning of Dive Gear

## **Requirements**

- PADI or NAUI certified
- First Aid/CPR trained (Basic course)
- Valid driver's Licence
- Physically fit to dive & carry 40-80 lb bags of milfoil, potentially upstairs.
- Past customer service experience preferred
- Love for working outside in the sun
- Entrepreneurial
