Il nuovo App Catalog consente agli amministratori IT di ottenere le informazioni necessarie per abilitare con sicurezza le app dall'interfaccia di amministrazione di Microsoft Teams.

Il catalogo fornisce agli amministratori dettagli quali nome, descrizione, stato di certificazione e altri dettagli

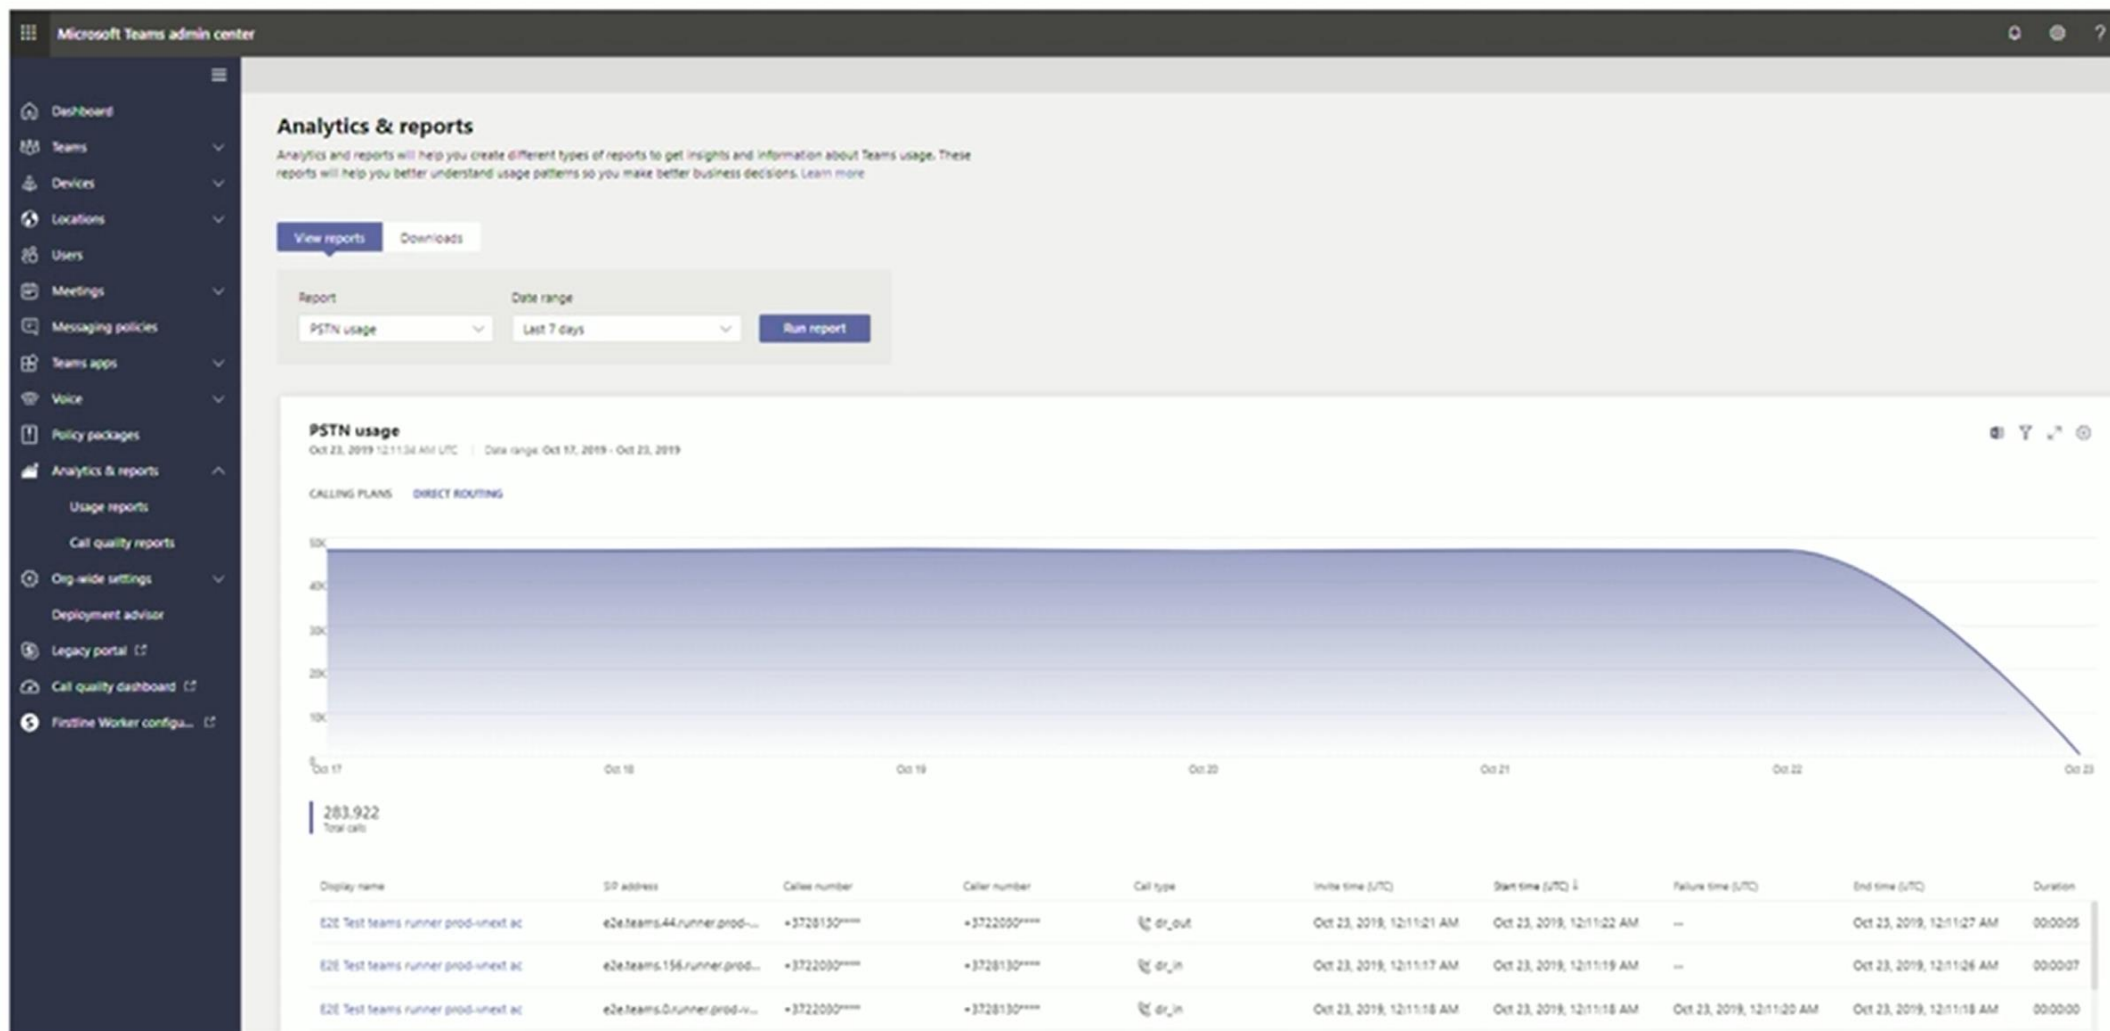

Lo stato di certificazione all'interno del catalogo riguarda un programma a 2 livelli: l'auto-attestazione dello sviluppatore e una rigorosa certificazione Microsoft 365.

Disponibile entro la fine di quest'anno

The screenshot shows the 'Manage apps' page in the Microsoft Teams admin center. The left sidebar contains navigation options: Dashboard, Teams, Devices, Locations, Users, Meetings, Messaging policies, Teams apps (selected), Manage apps (highlighted), Permission policies, Setup policies, Voice, Policy packages, Analytics & reports, and Org-wide settings. The main content area is titled 'Manage apps' and includes a description: 'When you are managing apps for your organization, you are controlling what apps are available to users in your organization's app store. You can then use app permission and app setup policies to configure what apps will be available for specific users.' Below this, there is a table of installed apps. The table has columns for Name, Certification, Categories, Publisher, App status, Custom app, and Version. The table shows 321 items in total, with a search bar and filters for 'Upload new app', 'Allow', and 'Block'.

Name	Certification	Categories	Publisher	App status	Custom app	Version
