

Voting starts today: SINN Power is TOP 10 Nominee in the GreenTec Awards 2018

Press release – November 30, 2017

In the categories “Startup” and “Sustainable Development”, SINN Power is ranked into the TOP 10 of all applicants. The online voting for choosing the finalists starts today. Give wave energy a head start with your vote!

Dr. Dirk Stenkamp, Chairman of TÜV Nord AG and one of the 120 prominent partners of the Awards, describes the GreenTec Awards as “the Oscar for sustainable innovations.” Since 2007, they have become the world’s largest environmental awards.

You can vote for SINN Power in two categories:

**Category “Sustainable Development”:
Supplying an organic shrimp farm with
100% renewable energy**

SINN Power was nominated for its [project on Cape Verde](#) where an organic shrimp farm will be powered by 100% renewable energy. The project will reduce the massive diesel imports to the islands and will create around 60 new jobs.

**Category “Start-up”:
SINN Power as pioneers in making ocean waves the renewable energy of the future**

In the category start-up, SINN Power’s concept stands out as highly scalable: As nearly 60% of the whole world population are living within 80 kilometers of the coast, they all could use the power of waves to generate electricity.

A vertical poster with a dark blue background. At the top, the word 'VOTE!' is written in large, white, bold letters, with a white checkmark inside a square box to the left of the 'V'. Below this, white text reads: 'We are in the TOP 10 of the GreenTec Awards 2018. Vote for us until January 8, 2018, and help us win!'. Underneath is the hashtag '#voteforgreen'. A white rectangular box contains two categories with leaf icons: 'Sustainable Development' and 'Special Prize Start-up'. Below the box, 'SINN Power' is written in bold black text. At the bottom, there is a white leaf icon and the website 'www.greentec-awards.com'.

SINN Power’s team of currently more than 25 felt extremely honored when they learned they were among the TOP 10 in two categories. “We are pioneers in wave energy and that is not always easy. But we have come so far in only 3 years.”, SINN Power CEO Philipp Sinn says.

“Winning the GreenTec Awards 2018 would give a huge push to the team and motivate us further for the development of a new alternative renewable energy source.”

The next step is a public voting where everyone can participate in determining the nominees – please visit www.greentec-awards.com until January 8, 2018, vote for SINN Power and help us to win! We appreciate your support and recommendation. The glamorous award ceremony will take place on May 13, 2018 in Munich.
