**FOR IMMEDIATE RELEASE**

## **Canterbury business breaks 1,000 cleans**

Local businessman, Alan Jarvis, is delighted with his new business, which provides window cleaning & ancillary services to residents and commercial customers in Canterbury and surrounding areas.

Alan, who started his My Window Cleaner franchise in September last year, has just cleaned his 1,000<sup>th</sup> property – An amazing feat!

With the help of his partner Charlotte, they offer outside and inside window cleaning, conservatory valets, gutter clearance and patio/driveway cleaning. Alan said, “I am delighted with the fantastic start we have had and I wish to thank all of our amazing customers for their support”.

Mrs Evans was the lucky customer to have experienced the 1,000<sup>th</sup> clean. To celebrate, Alan and Charlotte presented her with a bottle of bubbly. Mrs Evans said “I never expected this and what a lovely surprise! Alan and Charlotte are wonderful & provide an excellent service. I wish them every success”.

“We are now building on these great foundations and are looking forward to the next stage of our business growth. I really want to be the “go to” window cleaner in Canterbury and hope that we can provide our service to many more customers”.

Alan has just taken on his first member of staff and offers both the revolutionary Reach and Wash pole cleaning system, which uses purified water and the traditional method too.

**About My Window Cleaner**

Founded in 1996, My Window Cleaner is now one of the largest brands in its sector. The new franchise in Canterbury/Aylesham joins company-owned operations in north London, south Hertfordshire & Bournemouth, servicing over 4,500 customers. Operatives arrive in professional liveried vans, which are installed with modern Reach & Wash purified water systems, as well as traditional equipment. The business is technology-led, using systems to keep customers informed about their cleans, backed by a focus on always providing the best service possible. Franchisees use a smart phone APP, so that they can keep the system updated in real time, as well as sending an automated paperless bill to each customer, once the job has been completed.
