

# OMLED One s5

## Minimalistic design

Delicate conductive suspensions serve as the pendant's current-carrying hanger assembly, making the lamp appear to float like a light surface in a room.

## High quality material

Satin-finished clear glass as "light medium" lends the luminaire an almost floating appearance in a space.

## Excellent light quality

By way of the pure, clear and very natural light of an OLED we achieve an excellent light quality and a very good colour rendering.

## Forward-looking technology

The luminaire's glass case is circuit board and control element in one.
