

## **KEYS:**

### ***Compare and Contrast Functionalism and Marxism as Models for the Way Society Operates***

1. Meritocracy (*Functionalists also believe in meritocracy which is if you work harder, you get further*)
2. Social institutions (*Marxist would disagree with this view, they see social institutions being used by the ruling class to control the working class ...*)
3. Value consensus (*... this value consensus is what makes the system work*)
4. Religion, education, media (*These values are transmitted to the proletariat through religion, education and the media*)
5. Surroundings (*... society will evolve and change like a human body evolves to fit their surroundings*)
6. Revolution and conflict (*Marxists believe change in society is caused by revolution and conflict ...*)
