30.06.2015 No GP Clinical Update (Trainers' Summer Workshop)				
07.07.2016 Feedback & End of Term Celebration				

HOW GP CLINICAL UPDATE WORKS

Updates will be researched by GPST1, GPST2 & GPST3 and supported by the GP Trainer. **The GPST in blue and marked with an asterisk will lead on the topic.** There will be a case-based discussion and, with relevant specialty Consultants, the latest evidence based and NICE guidelines will be shared. Topics will cover the RCGP Curriculum Statement for GP Revalidation. Please see right for details. We encourage all GP Trainees giving presentations to map their topic to the RCGP Curriculum Statements, in particular the learning outcomes. Please see the RCGP website (www.rcgp.org.uk) for further details.

GP Clinical Update Programme 2015-2016

The Competence Framework

What are the competences which form the framework for WPBA?

The competences which form the framework for WPBA are derived from the first Curriculum Statement, 'Being a GP'. All Trainers should have received a printed copy of this Statement from their Deanery.

The competence framework is set out below:

- Communication & Consultation Skills:** This competence is about communication with patients and the use of recognised consultation techniques.
- Practising Holistically:** The ability of the doctor to operate in physical, psychological, socio-economic and cultural dimensions, taking into account feelings as well as thoughts.
- Date Gathering & Interpretation:** The gathering and use of data for clinical judgement, the choice of physical examination and investigations and their interpretation.
- Making a Diagnosis & Making Decisions:** This competence is about a conscious, structured approach to decision making.
- Clinical Management:** The recognition and management of common medical conditions in primary care.
- Managing Medical Complexity & Promoting Health:** Aspects of care beyond managing straightforward problems, including the management of co-morbidity, uncertainty, risk and the approach to health rather than just illness.
- Primary Care Administration & IMT:** The appropriate use of Primary Care administration systems, effective record-keeping and information technology for the benefit of patient care.
- Working with Colleagues & In Teams:** Working effectively with other professionals to ensure patient care, including the sharing of information with colleagues.
- Community Orientation:** The management of the health and social care of the practice population and local community.
- Maintaining Performance, Learning & Teaching:** Maintaining performance and effective continuing professional development of oneself and others.
- Maintaining an Ethical Approach to Practice:** Practising ethically with integrity and a respect for diversity.
- Fitness to Practice:** A doctors' awareness of when his/her own performance, conduct or health, or that of others, might put patients at risk and the action taken to protect patients.
