HEALTH AS A HUMAN RIGHT

Lack of Resources:
- Behavioral & Mental Health (i.e., historical trauma, violence, substance abuse)
- Water & food access
- Identifying signs of health risks

Inadequate Health Systems:
- Underscored rights to traditional medicine
- Misguided policies
- Wait times – Customer service
- Retention/Turnover
- Lack of funding

Cultural Preservation:
- Promote traditional medicine
- K’é cultural/traditional framework
- Building off commonalities from different cultures
- Connecting health back to the land

Community Driven Solutions:
- Keep health workers here – building trust
- Policy changes – Evaluation of laws
- Partnerships (i.e., non-profits, research groups, agencies)
- Infrastructure Development (i.e., housing, trainings/programs in schools, health centers)
- Listen to & educate in schools, homes, and communities
- Hands on workshops – job development, recruitment, social opportunities
- Data collection – Youth & professionals
