

We created the first wakeboard in 1990, are independently run, and some of our owners can do 1080's and one even a 1260. Doesn't matter to you? Only the quality of the product matters to us - sourcing new memory foam in footwear, or a weave of glass better than anything Massi has ever experienced. Ronix is a company surrounded by perfection, with products that take longer to make, and are ridden harder. Thru our search we truly have created a global company - working with material suppliers in 4 continents and 14 countries. It's a more expensive way of doing business for sure, but when you slip into our boots and hit a left-hander at the end of the lake you'll know why we do it.

The Story

Started out strapping into bungees, riding a phaser equipped, directional shape, tri-fin powered special. Thru time - admired, mocked and mimicked - until eventually the market was marketed with confusion. Which leaves us here - a clean slate of friends with a similar sound. A non-venting venture of artists, engineers, riders and believers as owners making riding devices collectively crafted for the imagination of wakeboarding. Our axiom will always be based on products and tales of tomorrow's riding. A chance to make a point, confront the norm, and answer the question why. We hope you enjoy riding the products half as much as we do making them. This is a true labor of love.

The Line

We proudly present to you 40 hot off the press boat boards, and 27 brand spanking new park boards for this upcoming season. Oh yeah we also completely redeveloped our current best fitting award-winning line of footwear for 2019.

What's To Come:

- 18 - Board Tech
 - 22 - Boat Boards
 - 32 - Park Boards
 - 40 - Footwear
 - 52 - Women's Collective
 - 60 - WakeSkates
 - 62 - Flotation
 - 70 - Grip and Tow
 - 74 - Softgoods
-

Lake Ronix

Aquatic Research Center

The Process

Several years ago we set out to streamline the R&D process and created the industry's first year round water office. Our aquatic research center - Lake Ronix is located just outside of Orlando, FL has quickly become the heart and soul of everything we do. A place with glass flat surf and wakeboard water, two different System 2.0's to test the full spectrum of our product categories. Roughly 500 prototypes this past year touched the hands and feet of all of our product engineers and many of our athletes. With our engineers handcrafting products at Radar Lake and testing them at Lake Ronix within hours creates the most streamlined progression of products and information.

The People

Ronix has over 20 owners with over 2 centuries of designing, manufacturing and marketing watersports products. Our founder and industry legend - Herb O'Brien pioneered the way waterskis were built in the 60's and decades later created the first wakeboard, wakesurfer and wakeskate ever produced. He always surrounded himself with smart, passionate, humble people that care about the products the way he did. A philosophy that will never change - we all take so much pride in what we do.

THE TEAM.
THE CREW.
THE FAMILY.

Legends to Rookies. Boat to Cable, Surf to Skate.

We test, travel, compete and shred as one. Together we give Lake Ronix its magic, push the limits of our riding and progress all forms of product development.

BLACK OUT TECH

Classified Innovation and Technology

Unfortunately we can't reveal our secret sauce on this one - but what we can say is that hands down this is the most advanced wakeboard ever created.

- Feels livelier
- Rides faster
- Lands softer
- Flies longer
- Reacts quicker
- Snaps harder

A SUPREME WEEKEND

A modern 3-stage lift Weekend board mixed with some Super Straps on the all new Supreme boots.

RONIX FOOTWEAR

Handcrafted
Excellence

Park Division

All over flex, center flex, tip/tail flex - we have every category a cable rider would ever need.

PARK DIVISION

EXP

DON'T CONFUSE MOVEMENT WITH PROGRESS. WHILE SOME WILL MAKE CHANGES TO APPEAR AS IF THEY ARE ADVANCING, WE MAKE CHANGES THAT WILL SHIFT THE INDUSTRY. WE STRIVE TO DEVELOP PRODUCTS THAT WILL PERFORM AS RIDERS WANT AND NEED, WITHOUT SACRIFICING FUNCTION AND FIT THAT IS UNIQUE TO WAKEBOARDING.

PRESENTING EXP WALKABLE TECHNOLOGY
FEATURED IN THE ALL NEW KINETIK PROJECT BOOT, TRUE PROGRESS.

TECHNOLOGY

We are always trying to push the boundary of lighter, faster, stronger in boat boards - this year's RXT construction will make anybody re-evaluate what is possible on their board. The world of wakeboarding is about to change again - by the people that brought you the original wakeboard.

SHAPES:

Of course we want to redefine designs for the needs of our professional athletes. But first and foremost they have to work even better for the everyday rider.

CORES AND MATERIALS:

We've been sourcing the world's most advanced components for around a half century. Developed to react to all of the various riding styles and abilities out there.

ENGINEERING:

From concept to showroom, the world's leading engineers build year round prototypes on a daily basis.

FORM & FUNCTION:

Yes we create wild, out of the box products - but they were engineered to serve a purpose.

QUALITY CONTROL:

Before a product is ever shipped out - it goes through up to 5 checkpoints to ensure it is made with the correct process.

INTERNAL WORKINGS:

Sometimes its not what's on the outside - but it's what's going on, on the inside. Fused stringers, Springbox and other concepts drastically impact the flex and recoil of a board.

ATTENTION TO DETAIL:

We analyze every nuance of our products - from carefully machining out the most expensive core down to making our fin screws fit flush.

BOARD INGREDIENTS

CONSTRUCTION STYLES

BLACKOUT TECHNOLOGY CORE: /BOAT

Unfortunately we can't talk about what's inside of our new, most advanced core. But what we can say is that your boat riding will never be the same. The most high-end construction ever put in a boat board.

TIMEBOMB: /BOAT

Make every wake jump feel like a double up. The best selling high-end core available.

INTELLIGENT 2 CORE: /BOAT

For the rider that wants a strong connection between their board and the water, effortless energy transfer off the wake, and soft landings. A boat board made with wood and poured urethane running in a parabolic angle to the profile. The result is seamless energy transfer as a rider exits the wake, and lands softer.

NU CORE: /PARK

Wood is good at the park for riders that want a damper feel and a more durable ride. Made from renewable trees - a cable friendly Paulownia timber delivering a snowboard influenced kick and unique ollie and press on rails.

MOD POUR: /BOAT/PARK

An ultra stiff, lightweight, super saucy core - this demanding alternative foam is made from our exclusive blend of atoms. The highest strength to weight ratio we have ever tested - setting the standard of the most refined recipe of poured foam out there.

3-D WOOD: /PARK

New for this year we are introducing cubes of wood bonded together so you can have individualized finite pressure points. More feel than any other wood construction available.

DIRECTIONAL WOOD LAMINATES: /PARK

Several of our boards are made out of a similar wood - but they differ in the grain direction. Sometimes the goal of a board is to have a softer mid section so we have the wood running horizontally vice versa for a stiffer belly. Same goes for the ends of the board. No two wood board series are made with the same grain layout.

SHAPE TECHNOLOGIES

SPRINGBOX: /PARK

A similar design as Flexbox by adding high and low points thru the ends of the board to exaggerate the amount of flex you can add to your press. With Springbox those high points are made out of hollow rods that give a rider more snapback out of their press. A board that can fold over - but will quickly react back.

FLEXBOX: /PARK

We came to a point where not everybody was happy with one traditional flex zone because of their personal riding styles. So we analyzed how a broad range of riders ollie, flex, and release off the water and features. The result was we need to have some boards with pressure points in the center, and others in the tip/tail.

TEE BOX TECHNOLOGY: /BOAT

Parks plays a lot of golf. He is actually pretty good. One day he called us up from the Tee Box and said he wanted to try golf ball dimples on the bottom of his new board. The result is a board that rides looser, higher, and actually has less resistance with the water. Great ideas come from all places.

MATERIALS AND FUNCTION

I-BEAM: /BOAT

A second piece of glass wraps thru the core creating an additional strength point. So you have rigidity, unlike any other core we have made, still with the dampening qualities of fiberglass. The result is the snappiest construction with softer landing than any carbon board out there. The hole shot response of carbon - the feel of fiberglass.

FUSE STRINGERS: /BOAT

The One board's latest innovation for riders that want the ultimate flight pattern. Running vertically thru the length of the board, these stringers enhance the spinal chord for the most explosive take off we have ever designed in our 29 years of building high-end wakeboards.

DIAMOND GLASS: /BOAT

Fiberglass made in the shape of a diamond - helps transfer the energy of the board from the tip to the tail as a rider ollies out of the water, pressing off a feature or boosting off a kicker.

MAGIC CARPET: /BOAT/PARK

We are always sourcing new fiberglass materials trying to find that perfect weave that allows just enough resin to bleed thru and adhere to our Magic Carpet.

MONOCOQUE: /BOAT/PARK

A wrapped glass from the bottom to the top so the flash line is no longer the weak point of the board - and is now the strongest. A more durable construction and a torsionally stiffer ride. Available on an abundance of everything at the Ronix plantation.

SPEEDWALLS: /BOAT/PARK

Vertical poured urethane creates more top water speed and a durable bumper from those floating menaces at a cable park.

KRYPTO CABLE: /BOAT/PARK

Different fibers are brewed up and then woven together to make a stronger compound. The Krypto Cable surrounds the profile of the board and is fused together with our core. Combined with our monocoque laminated glass, this cable makes the sidewalls the strongest part of the board - not the weakest.

SINTERED BASE: /PARK

The most durable non-stick base material we have ever tested on features, and has increased glide speed on the water. Our exclusive base was formulated from a powder by heating the material in a sintering furnace above its melting point until the particles bond to one another. A higher purity compound that preserves its bond overtime. No obstacle is safe at cable parks with our jib friendly base material.

LOW FRICTION BASE: /BOAT

Developed for the most glide speed in high-end boat boards.

M6 INSERTS: /BOAT/PARK

The Euros have it figured out. A higher thread count means more hold on a shallower depth. So now we can go to thinner profiled boards with a shorter insert without sacrificing boot lock down. The result is boards with more feel and contact on the water. Available on every series.

THE ONE
DANNY HARF SIGNATURE PRO MODEL

TIMEBOMB//ATR CONSTRUCTIONS

Two 3-stage rocker boards

that ride so entirely differently.

The biggest departure in the history of Parks boards.
More freedom, speed, consistency...

The Fun Board

Built For Fun. Any Boat. Any Lake

RXT

MASSI PRO MODEL

RIDING STYLE	CONSTRUCTION	ROCKER	ENERGY
Boat // Advanced	Black Out Technology	Continuous	Instant: 10

We can honestly say the RXT checks every box a high-end rider is looking for with the most feedback and control ever created. Our fastest shape was designed by our R&D team over a 3-year period and is endorsed by Massi. The smoothest shape in wakeboarding built with our most advanced components.

FEATURES

- Continuous Rocker
- Speedwalls
- 4 Fiberglass 1.0" Ramp Fins & .8" Fiberglass Free Agent Fins
- Massi Pro Model
- Everything else about this board is under wraps

SIZE (CM)	HEIGHT (INCHES)	STANCE (INCHES)	CENTER (INCHES)	SURFACE (INCHES)	WEIGHT (LBS RANGE)
136	2.4"	22" - 26"	16.8"	807 Sq In	Up To 185lbs
140	2.5"	23" - 27"	17"	857 Sq In	165lbs and Up
144	2.7"	24" - 28"	17.2"	867 Sq In	175lbs and Up

DARKSIDE

DEAN SMITH DESIGN

RIDING STYLE	CONSTRUCTION	ROCKER	ENERGY
Boat // Advanced/Intermediate	Intelligent 2	3-Stage	Stored: 2

The ultra-smooth, delayed take off counterpart to our other 3 stage series - the One board. This construction has unique dampening qualities for soft landings and an easier time in choppy water. Not every rider wants the least amount of swing weight - this core gives the rider more feel and awareness of where the board is at all times.

FEATURES

- Speedwalls
- Intelligent 2 Core
- Diamond Glass
- The smoothest riding wood board we've ever created
- 4 Fiberglass 1.0" Ramp Fins & .8" Fiberglass Free Agent Fins

SIZE (CM)	HEIGHT (INCHES)	STANCE (INCHES)	CENTER (INCHES)	SURFACE (INCHES)	WEIGHT (LBS RANGE)
136	2.7"	22" - 26"	16.9"	803 Sq In	160lbs and Up
139.5	2.8"	23" - 27"	16.9"	823 Sq In	165lbs and Up
143	2.9"	24" - 28"	17.1"	854 Sq In	170lbs and Up

ONE - TIMEBOMB

DANNY HARF PRO MODEL

RIDING STYLE	CONSTRUCTION	ROCKER	ENERGY
Boat // Advanced	TimeBomb	3-Stage	Instant: 9

The perfect ensemble of instant energy and a classic 3-stage rocker. Our most iconic wakeboard series delivers a quick reaction, and a spoonful of an explosive snap off the wake, while incorporating the most in glide speed, for the least amount of drag on the water.

FEATURES

- Fuse Stringers
- Speedwalls
- 4 Fiberglass 1.0" Ramp Fins & .8" Fiberglass Free Agent Fins

SIZE (CM)	HEIGHT (INCHES)	STANCE (INCHES)	CENTER (INCHES)	SURFACE (INCHES)	WEIGHT (LBS RANGE)
134	2.2"	21.5" - 25.5"	16.6"	763 Sq In	Up To 165lbs
138	2.3"	22.5" - 26.5"	16.8"	799 Sq In	Up To 180lbs
142	2.4"	23.5" - 27.5"	17"	829 Sq In	170lbs and Up
146	2.5"	24" - 28"	17"	854 Sq In	175lbs and Up

PARKS

PARKS BONIFAY PRO MODEL

RIDING STYLE	CONSTRUCTION	ROCKER	ENERGY
Boat // Advanced/Intermediate	Modello	Continuous	Instant: 6

A legendary name in wakeboarding now completes the spectrum of rocker lines with his new signature board. This fresh design features an abrupt continuous rocker line. We leaned on some innovation from the golf industry and covered the entire base of the board with dimples like a golf ball creating lift for a loose, free-flowing feel on the water.

FEATURES

- Increased Sidecut
- G&R Technology
- Concave Bottom
- Variable Rail
- 4 Fiberglass 1.0" Ramp Fins

SIZE (CM)	HEIGHT (INCHES)	STANCE (INCHES)	CENTER (INCHES)	SURFACE (INCHES)	WEIGHT (LBS RANGE)
134	2.4"	21.5" - 25.5"	17"	777 Sq In	Up To 175lbs
139	2.5"	23" - 27"	17.3"	820 Sq In	160lbs and Up
144	2.6"	24" - 28"	17.6"	864 Sq In	170lbs and Up

ONE - A.T.R.

DANNY HARF PRO MODEL

RIDING STYLE	CONSTRUCTION	ROCKER	ENERGY
Boat // Advanced	A.T.R.	3-Stage	Instant: 8

Designed from the same shape as the One Timebomb, and features an iconic 3-stage lift using Fuse Stringers for the most controlled explosive kick available. Danny Harf's latest best-selling freeride inspired shape.

FEATURES

- Fuse Stringers
- Speedwalls
- 4 Fiberglass 1.0" Ramp Fins & .8" Fiberglass Free Agent Fins

SIZE (CM)	HEIGHT (INCHES)	STANCE (INCHES)	CENTER (INCHES)	SURFACE (INCHES)	WEIGHT (LBS RANGE)
134	2.2"	21.5" - 25.5"	16.6"	763 Sq In	Up To 165lbs
138	2.3"	22.5" - 26.5"	16.8"	799 Sq In	Up To 180lbs
142	2.4"	23.5" - 27.5"	17"	829 Sq In	170lbs and Up
146	2.5"	24" - 28"	17"	854 Sq In	175lbs and Up

THE WEEKEND

ENDORSED BY JAKE PELOT

RIDING STYLE	CONSTRUCTION	ROCKER	ENERGY
Boat // Advanced/Intermediate	Modello	3-Stage	Instant: 6

Like the 3-stage rocker amplitude storyline of the Darkside, but would rather have a stripped down all-foam alternative? We proudly present the new Weekend, a lighter, more traditional feel and snap off the wake at a more affordable value. Sits deeper on edge, for a more stable connection between rider, board, and the waterline.

FEATURES

- Increased Sidecut
- G&R Technology
- Concave Bottom
- Variable Rail
- 4 Fiberglass 1.0" Ramp Fins

SIZE (CM)	HEIGHT (INCHES)	STANCE (INCHES)	CENTER (INCHES)	SURFACE (INCHES)	WEIGHT (LBS RANGE)
132	2.5"	21" - 25"	16.7"	773 Sq In	Up To 175lbs

PARK BOARDS DEFINED

ROCKER

Rocker is defined as the curvature of the profile of the board for even more or less contact with the water.

LESS ROCKER

Faster and hard edging

The less rocker the board has the more top water speed it will create. You can now take longer cable rides without having the pull you would normally expect because there is less resistance with the water. Also because more board is touching the surface it naturally will track better - giving a rider a feel of having a built in fin when edging around on the water, without getting hung up on a rail.

MORE ROCKER

Loose and free feeling

A board that will never feel tight or sticky on the water. With so little of the board touching the surface it can instantly break free for more of a mellow freeride cruise.

FLEX

All over flex, center flex, tip/tail flex - we have every category a cable rider would ever need. Our biggest cable line of boards, each with their own unique flex characteristics.

We have a flex testing machine that can gauge the recoil a board: The higher the number - the more the board will want to react back to its original rocker line. While the smaller number means the board will be softer and more compliant on rails.

PRESS - SOFTER TIP/TAIL

(Kinetik SpringBox 2)

The middle of the board doesn't bend nearly as easily so when a rider is on a rail they have to rock into a press. Once locked in on the end of the board having these independent flex zones on the end of the board gives a rider more ability to exaggerate the angle of the press and more side to side movement.

ALL OVER - FLEX THROUGHOUT

(Top Notch)

For years this was the only option, a smoother feeling ride from tip/tail. Usually regarded as a fun board style ride that you can just go play around at the cable and have a chill relaxed ride with.

BEND - SOFTER MID SECTION

(Kinetik FlexBox 1)

The entire middle of the board really bends into a press. The result is the most amount of contact between board and rider when on a rail. Because so much of the board is bending a rider can exaggerate their press higher with this style. This style of board offers more to snap off of for air tricks and kickers too.

PARK BOARDS 101

An easy guide to help understand the different style of cable boards.

KINETIK PROJECT - FLEXBOX 1

DOMINIK HERNLER PRO MODEL

RIDING STYLE	PROFILE	ROCKER	FLEX
Park // Advanced	FlexBox 1	Continuous	Bend: Soft Mid

The cable kingpin is refined for 2019 with a new 3D wood core that runs top to bottom with individualized pressure points for the most in feel on features or on the water, as opposed to the conventional tip to tail, or rail to rail wood layup. A design with less rocker for infinite top water speed, reduced drag and more overall contact. This Kinetik features the exact same core, profile, and rocker as the Springbox 2, but has totally different pressure points.

FEATURES

- Speedwalls
- G&R Technology
- Flexbox profile
- 3D wood
- Sintered base

Softer mid section of the board allows a rider to bend into a press but once in a press still pivot off the feature.

SIZE (CM)	HEIGHT (INCHES)	STANCE (INCHES)	CENTER (INCHES)	SURFACE (INCHES)	WEIGHT (LBS RANGE)
138	2.2"	21" - 27"	16.9"	814 Sq In	Up To 175lbs
144	2.3"	22" - 28"	17.1"	846 Sq In	145lbs and Up
150	2.4"	22" - 28"	16.64"	858 Sq In	150lbs and Up

KINETIK PROJECT - SPRINGBOX 2

DOMINIK HERNLER PRO MODEL

RIDING STYLE	PROFILE	ROCKER	FLEX
Park // Advanced	SpringBox 2	Continuous	Press: Soft Tip/Tail

This Kinetik features the exact same core, profile, and rocker as the Flexbox 1, but has totally different pressure points with Springbox 2. A more rigid mid-section was designed so a rider can rock into a press - then once locked in - a softer end tip/tail section creates the ability to move side to side or just exaggerate the angle of a press and get more spring to their ollie off the water or a feature.

FEATURES

- Fiberglass Rods
- Speedwalls
- G&R Technology
- Springbox profile
- 3D wood
- Sintered base

Allows the rider to rock into a press on a rail. Once locked in, the soft tip and tail give a rider more ability to exaggerate the press.

SIZE (CM)	HEIGHT (INCHES)	STANCE (INCHES)	CENTER (INCHES)	SURFACE (INCHES)	WEIGHT (LBS RANGE)
138	2.2"	21" - 27"	16.9"	814 Sq In	Up To 175lbs
144	2.3"	22" - 28"	17.1"	846 Sq In	145lbs and Up
150	2.4"	22" - 28"	16.64"	858 Sq In	150lbs and Up

HIGHLIFE

RIDING STYLE	PROFILE	ROCKER	FLEX
Park // Advanced	Flexbox 2	Continuous	Press: Soft Tip/Tail

Designed to get you there bigger and higher. The Highlife has the most amount of rocker and bottom features of any Ronix board and is designed for bigger boost on air tricks and leaving a kicker. A more rigid mid section so a rider can rock into a press - once locked in - a softer end tip/tail section creates more ability to move side-to-side or exaggerate the angle of a press.

FEATURES

- FlexBox 2
- Speedwalls
- G&R Technology
- Vertical wood in the center / horizontal wood in the tip and tail
- Sintered base
- Ridden by members of the Kinetik Crew

Allows the rider to rock into a press on a rail. Once locked in, the soft tip and tail give a rider more ability to exaggerate the press.

SIZE (CM)	HEIGHT (INCHES)	STANCE (INCHES)	CENTER (INCHES)	SURFACE (INCHES)	WEIGHT (LBS RANGE)
130	3.2"	19" - 25"	16.6"	745 Sq In	Up To 160lbs
135	3.3"	20" - 26"	16.7"	779 Sq In	Up To 175lbs
140	3.4"	21" - 27"	16.8"	812 Sq In	Up To 175lbs
145	3.6"	22" - 28"	16.9"	846 Sq In	165lbs and Up

TOP NOTCH

RIDING STYLE	CONSTRUCTION	ROCKER	FLEX
Park // All Levels	Nu Core 2.0	Continuous	All Over Flex

A cable fun board featuring all over flex, a super clean bottom design and a spoonful of added rocker. Every cable lap on the Top Notch feels different than a traditional board with the freedom to break loose and really exaggerate a press from the soft tip to tail layup. A must in any quiver as an alternative board with its loose, skate-like free feeling on the water.

FEATURES

- Speedwalls
- Horizontal wood running through the middle of the board and vertical in the outer tip/tail
- Sintered Base
- A unique funboard shape
- Ridden by members of the Kinetik Krew

Rider has a smooth natural flex that is easy to ride creating a user friendly feel for all styles.

SIZE (CM)	HEIGHT (INCHES)	STANCE (INCHES)	CENTER (INCHES)	SURFACE (INCHES)	WEIGHT (LBS RANGE)
133	2.7"	19" - 25"	16.7"	762 Sq In	Up To 175lbs
138	2.9"	20" - 26"	16.9"	810 Sq In	Up To 185lbs
143	3.0"	21" - 27"	17.1"	844 Sq In	160lbs and Up
148	3.2"	22" - 28"	17.3"	879 Sq In	175lbs and Up

PRESS PLAY

RIDING STYLE	CONSTRUCTION	ROCKER	FLEX
Park // Entry Level To Intermediate	A.T.R.-S	Continuous	Press: Soft Tip/Tail

This shredder proves that not every aspect of a park board has to be soft. The Press Play has a variable flex along the rocker line with a thicker/stiffer belly, then transitions to a super thin profiled, soft tip/tail. A perfect shape for entry level riders to get the feel for riding laps, or mid level riders that like the feel and snap of a foam construction.

FEATURES

- C&R Technology
- Concave Bottom
- Created For the Everyday Rider
- 4 Fiberglass 6" Free Agent Fins
- Ridden by members of the Kinetik Krew

Allows the rider to rock into a press on a rail. Once locked in, the soft tip and tail give a rider more ability to exaggerate the press.

SIZE (CM)	HEIGHT (INCHES)	STANCE (INCHES)	CENTER (INCHES)	SURFACE (INCHES)	WEIGHT (LBS RANGE)
136.3	2.4"	22.5" - 26.5"	17"	818 Sq In	Up To 185lbs
141.1	2.5"	23" - 27"	17.3"	853 Sq In	160lbs and Up
146.3	2.6"	24" - 28"	17.3"	882 Sq In	175lbs and Up

EL VON VIDEL SCHNOOK

KID'S DESIGN

RIDING STYLE	CONSTRUCTION	ROCKER	FLEX
Park // Any Grom	Nu Core 2.0	Continuous	All Over Flex

Welcome to the future of kid specific cable boards. Designed with a fast, flatter rocker, steeper sidewalls, the energetic qualities of paulownia wood, and wrapped in our grom glass so the next generation can get their press on at a park.

FEATURES

- Concave Bottom Tips
- Grom Glass
- C&R Technology
- Wide Tip/Tail
- Sintered Base
- 4 Fiberglass 6" Free Agent Fins
- Ridden By Team Stuckey

Rider has a smooth natural flex that is easy to ride creating a user friendly feel for all styles.

RONIX FOOTWEAR

THE ONLY CUSTOM FIT WAKEBOARD BOOTS

The industry powerhouse in performance, fit, and comfort. The only company offering double lasted, custom moldable construction, delivering a fit like no other. With localized support and a customizable interchange, these boots can be tailored to your preferred riding style.

CELLIANT

Proprietary medical grade material recycles heat generated from the body to increase blood flow and reduce cramping.

FLEXFORM

Automotive grade elastomer designed to withstand extreme tear and tensile strength, while providing flex and movement to the rider.

TECHSKIN +

Our lightest, most low profile shell material employs a molded structure to a high tensile, lightweight textile to achieve a fit only found in this minimalist approach.

FEETBELTS

Pulls your foot back into the pocket, offering the ultimate heel hold. Please fasten your footbelts and enjoy the ride.

BRAINFRAME

Our groundbreaking hardware platform delivers instant response and redefines high end boot fit.

TOTALLY RAD FOAM

Full length footbed impact resistance, so your legs don't get punished for charging hard.

RAD FOAM

Molded in under your feet to stand up to those big landings.

BASELESS HARDWARE

Time tested, rider approved. Our original low profile design delivers superior board control on an ultra-lightweight foundation - often imitated never duplicated.

MAG LOCK BEAMS

Magnesium's amazing strength to weight ratio allows us to cut the parts' weight by 30%. Brainframe models have never been so light.

INTUITION +

The pinnacle of custom fit boots. A heat moldable, custom fit liner, developed in partnership with Intuition. A level of fit and control found exclusively in a Ronix boot.

3D MOLDED TONGUE

Independently molded tongue designed to complement the anatomical shape of the foot, creating superior comfort and support.

AUTOLOCK

Slide to lock, pull to release. Simplistic design with innovative components. Bullet-proof durability with a fully rotational locking wheel, featuring a soft-touch pull handle for easy release.

SUPER FABRIC

This armor plated fabric is the most abrasion resistant material we have ever tested. Applied on the tongue to prevent the laces from cutting and wear.

ECO INNOVATIONS

We eliminated the use of PVC solvents which are potentially hazardous to the surroundings and human health. Instead, we use more costly, higher quality materials that are more sustainable and easier on the environment.

DOUBLE STUFFED FOOTBED

Hard on the outside, soft on the inside, an underfoot combination rivaling milk and cookies. The double stuff footbed allows your foot to naturally cant inward without dictating a specific angle.

One of our most extensive R&D undertakings, the BrainFrame is the first adaptive chassis with a conforming skeleton designed to fit perfectly around your foot as you pull the laces tight. A true footwear breakthrough in fit, function, and performance, the BrainFrame offers an integrated system of unique components designed to enhance the fit of our award winning, heat moldable Intuition liners.

FULL-HEIGHT SKELETON

- Adapts to the anatomical shape of the foot and lower leg. The pliable material selection allows for ultimate comfort and fit.
- Creates instant energy transfer from the laces directly to the board inserts, reducing rider fatigue and energy loss.
- Engineered around our perfect foot last, creating a superior fit every time.
- Accentuated heel pocket allows for improved performance and fit.
- Centers foot over the top of the baseplate. Responsive lower foot support for those big landings.
- Designed for closed toe boots

GASKET

- Cambered shape adds pressure to the heel and toe areas, which preloads the plate for superior response.
- Dampens vibration under foot.
- Protects the deck from scratching.

FEETBELTS

- Pulls your foot back into the pocket, offering the ultimate heel hold. Please fasten your footbelts and enjoy the ride.

BASEPLATE

- Independent component from the skeleton, the rigid material selection allows for ultimate response and connection to the board.
- The baseplate is your gas pedal - the rigid design minimizes heel/toe lift while maximizing board feel.
- Interchangeable components allow you to customize the color of your baseplate.

LOCK BEAMS

- Automotive grade magnesium cast to exact specifications.
- 30% lighter than previous aluminum design.
- Create more heel and toe response with the "U" shaped structure running parallel to the foot.

New for 2019, we are introducing our newest footwear marvel, the MainFrame. Adapting design elements from its BrainFrame counterpart, the MainFrame offers a mid-height skeleton engineered for versatility. Whether you are looking for the most progressive new cable boot, or simply a great fitting open-toe boot - the MainFrame will prove once again why Ronix is the industry leader. Every 2019 model is built with an independent skeleton and plate designed for the most advanced fit in wakeboarding.

BASEPLATE

- Independent component from the skeleton, the rigid material selection allows for ultimate response and connection to the board.
- The baseplate is your gas pedal - the rigid design minimizes heel/toe lift while maximizing board feel.

SHOCK PAD

- Dampens vibration under foot.
- Protects the deck from scratching.

MID-HEIGHT SKELETON

- Adapts to the anatomical shape of the foot. The pliable material selection allows for ultimate comfort and fit.
- Creates instant energy transfer from the laces directly to the board inserts, reducing rider fatigue and energy loss.
- Engineered around our perfect foot last, creating a superior fit every time.
- Accentuated heel pocket allows for improved performance and fit.
- Centers foot over the top of the baseplate. Responsive lower foot support for those big landings.
- Engineered versatility, designed for open-toe and closed-toe boots - with adaption for removable/walkable liners.

SUPER STRAPS

Leverage Meets Elasticity.

LEVERAGE

Low friction, high-strength webbing allows for effortless tightening.

ELASTICITY

High-grade elastomer provides dynamic flex for engagement and release, while accommodating the movement of the rider.

AUTOLOCKS

Slide To Lock, Pull To Release.

RELEASE

LOCK

Slide to lock, pull to release. Simplistic design with innovative components. Bullet-proof durability with a fully rotational locking wheel, featuring a soft-touch pull handle for easy release.

MOBILITY

In a more supportive boot, the rider's energy is transferred more quickly into the board. Others prefer softer boots with more freedom to move over the top of the board.

DOUBLE STUFFED FOOTBED

Hard on the outside, soft on the inside, an underfoot combination rivaling milk and cookies. The double stuff footbed allows your foot to naturally cant inward without dictating a specific angle.

FIRM: More lateral support guides the leg into an athletic position.

SOFT: Medial side is more cushioned to allow inward roll.

RESULT: Intuitive natural riding position.

FOOTBED FEEL

Our unique boot constructions are crafted to deliver a specific kind of ride. Nothing is more important to the response and feel on a board than the foam you are standing on. We have focused on building footbeds that are catered to the functional needs of each model.

1 Marshmallows on your feet. Soft and cush feel with a smooth response and pillowed comfort.

2 Quick on the gas for faster transitions and solid impact protection.

CELLIANT®

ENHANCE YOUR LIFE.

Celliant Acts As A Catalyst. The minerals used in every fiber were selected for their thermo-reactive ability to most effectively convert body heat into infrared energy and reflect it back into the body.

Circulation. Infrared energy boosts the flow of blood to tissue throughout the body, delivering vital nutrients while increasing oxygen levels.

Temperature Regulation. The circulatory system is also the body's heating and cooling regulator. By optimizing blood flow, Celliant makes it easier for the body to maintain its ideal temperature.

CUSTOM FIT

The Pinnacle Of Custom Fit Boots.

Factory Lasted Boot

In Store Molding

Custom Fit Your Feet

Heat Molded Happiness

A heat moldable, custom fit liner, developed in partnership with Intuition. A level of fit and control found exclusively in a Ronix boot.

THE PERFECT LAST

The Ronix perfect fit, allowing you to focus on your ride and not on your feet.

DOUBLE LASTED

INNER LAST:

Our unique process is molding the liner around a last designed to the shape of an athlete's foot. This step ensures the inside of the liner will have a great fit right out of the box.

OUTER LAST:

The second part of our lasting process is molding the inside of the shell, perfecting a liner to shell coupling that eliminates any "dead space" or "hot spots".

JULIA RICK

JULIA RICK PRO MODEL

RIDING STYLE	CONSTRUCTION	ROCKER	FLEX
Park // Advanced	FlexBox 2	Continuous	Press: Soft Tip/Tail

The sport's most dominant women's rider continues to occupy the top spot on the podium, but is also pushing the boundaries of inventing new tricks with her historical video sections. Julia loves the feeling of the Kinetik Project with finite tip/tail pressure points but wanted a considerably lighter version. So we proudly present an all Air Core version that is nearly 2 lbs lighter and has more flex than its wood Kinetik Project counterpart.

- FEATURES**
- Carbon Rods
 - Speedwalls
 - G&R Technology

SIZE (CM)	HEIGHT (INCHES)	STANCE (INCHES)	CENTER (INCHES)	SURFACE (INCHES)	WEIGHT (LBS RANGE)
138	2.7"	21" - 27"	16.9"	814 Sq In	Up To 175lbs

SIGNATURE

RIDING STYLE	CONSTRUCTION	ROCKER	ENERGY
Boat // Advanced/Intermediate	Secret Flex	3-Stage	Neutral: 6

A new women's shape with increased amplitude and a freeride storyline in mind. This 3-stage beauty is built for flight, with our most reactive rockerline we have developed in a female specific shape. Designed with a traditional rail so it sits deeper in the water for added contact and quick reacting turns. Our most progressive women's boat board shape.

- FEATURES**
- 3-Stage Rockerline
 - 4 Fiberglass 1.0" Ramp Fins
 - Team Driven Shape

SIZE (CM)	HEIGHT (INCHES)	STANCE (INCHES)	CENTER (INCHES)	SURFACE (INCHES)	WEIGHT (LBS RANGE)

138	2.9"	20" - 26"	16.9"	810 Sq In	Up To 185lbs

QUARTER 'TIL MIDNIGHT

A BOARD WITHOUT ANY RIDING STYLE

RIDING STYLE	CONSTRUCTION	ROCKER	ENERGY
Boat // Intermediate to Advanced	Secret Flex	3-Stage/Continuous	Neutral: 4

Last year we came up with the new versatile Quarter 'Til Midnight that can be ridden free of any stereotypes. The only women's board that adapts to the rider instead of having the rider change to the board's traits. Touch the sky with a smooth, fast glide on the water and a predictable snap off the wake. An always consistent takeoff and an ever-evolving shape to your style.

- FEATURES**
- Universal Rocker
 - Secret Flex
 - G&R Technology
 - 4 Fiberglass 1.0" Ramp Fins

SIZE (CM)	HEIGHT (INCHES)	STANCE (INCHES)	CENTER (INCHES)	SURFACE (INCHES)	WEIGHT (LBS RANGE)
129	2.4"	18.5" - 24.5"	16.4"	774 Sq In	Up To 175lbs
134	2.5"	19.5" - 25.5"	17.2"	803 Sq In	Up To 185lbs

KRUSH

THE BUILDING BLOCK TO WAKEBOARDING

RIDING STYLE	CONSTRUCTION	ROCKER	ENERGY
Boat // Entry Level to Intermediate	Secret Flex	3-Stage	Neutral: 4

Wakeboarding is the only board sport where your shoulders and hips are not always parallel with each other. This innovative Krush recognizes that your body is crossed up riding toeside, and more inline riding heelside, and every design aspect of this board takes this into consideration for the proper building block of wakeboarding. A thinner profile and lighter glass layup for reduced swing weight means more contact/feel with the water, along with a rockerline that naturally puts you underneath the board in a more centered position.

- FEATURES**
- 3-Stage Rocker
 - Thinner, Sharper Toeside Rail
 - Fuller, Vertical Heelside Rail
 - 2 Fiberglass 1.7" Hook Fins

SIZE (CM)	HEIGHT (INCHES)	STANCE (INCHES)	CENTER (INCHES)	SURFACE (INCHES)	WEIGHT (LBS RANGE)
128	2.3"	18" - 24"	16.4"	745 Sq In	Up To 160lbs
134	2.4"	19.5" - 25.5"	16.5"	781 Sq In	Up To 175lbs

AUGUST

KID'S DESIGN

RIDING STYLE	CONSTRUCTION	ROCKER	ENERGY
Boat // Entry Level to Intermediate	Grom Glass	3-Stage	Neutral: 4

EVERY ASPECT OF THIS BOARD IS DESIGNED FOR THE NEXT BOAT GENERATION
It is easy to take a wakeboard and scale it down in size and say it is a "kid's board". But that is not what the next generation was looking for. Every aspect of the August board was designed with riders 95 lbs. and under in mind. From our unique grom glass, to a wide tip/tail for easy deep water starts and overall stability - we threw it all on into this high-end wake performer.

- FEATURES**
- Wide Tip/Tail
 - Grom Glass
 - 3-Stage Rocker
 - 2 Fiberglass 1.75" Hook Fins
 - 15 Set Sticker Pack Included With Board

SIZE (CM)	HEIGHT (INCHES)	STANCE (INCHES)	CENTER (INCHES)	SURFACE (INCHES)	WEIGHT (LBS RANGE)

HALO

INTRODUCING SUPER STRAPS

PLATFORM	FLEX	FOOTBED FEEL
MainFrame	Symmetrical: 5	Baseless: 2

These one-of-a-kind kicks are styled with a look bringing enough swagger to let your personality shine. We used a women's cut and flex that proves a closed toe design does not define all high-end boots. Built on our new MainFrame and wrapped in Super Straps, these wonders are the best fitting open toe boots to date.

LUXE

PLATFORM	FLEX	FOOTBED FEEL
MainFrame	Symmetrical: 4	Baseless: 1

Affordable luxury never felt so right. Why do you think we called it the Luxe? Built on our MainFrame with ultra-light, ultra-cush, Stage 1 foam, the Luxe is a top-of-the-line universal boot with a price that is easy on the pocket book. Support you would expect from a high-end boot, and ease of entry that will have you finishing that last-minute text while you slip into these cloud machines.

BOOMSTICK

REED HANSEN PRO MODEL

Riding Style
Advanced

CONSTRUCTION
Bi-Level Wood

TOP GRIP
Grip Tape

The heavyweight bi-level Boomstick is composed of a solid, snappy, skatey, eco-friendly, super saucy wood with a smooth concave, making it easier to always land on the bolts. Several dusks and dawns ago, Reed Hansen and the boys sourced some lively materials to throw in a 14 lb. stockier skate, offering more board control, both on the water and leaving it from this added weight. A bi-level shape creates a more consistent, quicker swing weight than a traditional single level skate, yet still has the stability for somebody just taking the drop. Having a top deck separated from the water line means that if a skater is off axis they will have a greater chance of recovery with the 2 decks working independent of one another. Our most advanced technology, ridden by arguably our sport's greatest skater - yet still has the swing weight and balance points that work for first timers. Comes with a lively Paulownia bottom deck, and a stiffer Maple top deck.

FEATURES

- Hybrid Rocker
- Compression Molding
- Obese Technology
- Sintered Base
- ABS Sidewall
- 2 - .8" Wakeskate Fins

SIZE (CM)	AREA (SQ. INCHES)	HEIGHT (INCHES)	CENTER (INCHES)	ROCKER (ANGLE/ARC)	WEIGHT (LBS RANGE)

CONSTRUCTION
Compression

TOP GRIP
EVA Pad

Created with a smooth, explosive lift similar to the Boomstick, with built-in concave/kicktail for skaters looking for stability and board control. Without being anymore sensationalized than we already are, we think we found a way to bottle the emotion of the "it" factor. An electrifying marine dance that our forefathers could only dream of.

FEATURES

- Hybrid Rocker
- EVA Top Deck
- Moderately Obese Technology
- Two .8" Wakeskate Fins

Compression

TOP GRIP
EVA Pad

Ever wanted to strip everything off a deck, slap some big ol' fins on the back, chuck your boots and just go for a soul turn sesh? More surface area and deeper fins than any of our other skates - giving you the stability of your favorite longboard to shred an effortless cutback. It's not always about the wake - sometimes it's the path you take to get there. Up-shift a gear with the most affordable, fast, and reliable ride in our line. A 3 fin design ready to bury the rail.

FEATURES

- Blended Rocker
- EVA Top Deck
- The Only Skate Of Its Kind
- Made With Good Vibes
- Three .8" Wakeskate Fins

THE MANHATTAN TAILORED FIT

A project that started 3 years ago while combing the streets of NYC. Nobody knows the world of tailors better than them - so we knocked on one of the greatest designer's doors and said how much for your specs, true story this really did happen. They asked us to describe the typical customer. So we told them about the physique of a waterman and so began the Manhattan Blueprint. From there they did all of the scalings of the different sizes. Now, most of our vests are built to their exact specs. The result is - the truest fit from the smallest to the biggest of sizes.

TECHNOLOGY:

We always push the boundaries. Nobody is treating life jackets with the passion for progression the way we are. From the lightest jackets, to advanced water resistant liners, and form fitting foam.

CUSTOM FIT:

Whether it's a BOA dial that you can finely tune to your size, or our signature Super Stretch or Engineered Mesh that does the adapting. You'll find perfect comfort even if you are 1/2 way between sizes.

MOBILITY: SEGMENTING:

We use up to 17 unique segmentations in our vests. Each one of those was designed for a certain movement that a high-end boarder is looking for to progress their riding.

FLOTATION INGREDIENTS

Fit For Your Ride.
Form and Function
For Every Rider.

COAST GUARD APPROVED:

Safety doesn't take a vacation. These jackets push innovation boundaries but still have enough flotation to meet the safety requirements.

4-WAY STRETCH:

A material that moves in any direction when you do.

GLIDESKIN:

We live in a world that likes bling. Glideskin is shiny. Which makes it cool and relevant.

THERMO LINER:

Quite arguably the greatest creation since we came up with the Capella vest. A material that feels extra comfy when you try it on dry, and dries quicker than a standard neoprene material.

CYLINDRICAL CONSTRUCTION:

There is a homie named Capella from back in the day. He knew the earth was round. We ripped off his theories and made our vests round. A cylindrical fit that curves to your body unlike any flat vest.

LONGER TORSO:

Roughly 2" longer than a standard fitting jacket.

IMPACT JACKET:

Riding in close proximity to a shoreline, shallower waters - or just like being one of those water rebels? We have a complete line of extra lightweight, mobile jackets. They aren't approved by the law - but they do get a thumbs up in the added freedom department.

2 WAY STRETCH:

A material that moves side-to-side when you do.

ARMOR FOAM:

A super dense shock absorbing foam to reduce the impact of bails at a cable park. Made with Zote Foam.

PERFORATED ARIAPRENE:

The lightest, most breathable material in our line.

WATER RESISTANT LINER:

You know that annoying face you make when you have to try on your buddy's wet life jacket? Not no more. We created a liner that greatly reduces water seeping into a jacket, and most importantly the weird face.

STANDARD TORSO:

Based around the symmetry of a standard chest size.

THE PERFECT FIT

CGA TO IMPACT. BOAT TO PARK.
We Have The Fit For Your Riding Needs.

DESIGNS FOR A REASON:

We have 4 men's CGA, 4 men's impact jackets, and handful of women's and kid's too. But more importantly each one is designed for a certain torso or ability. Regardless if your skinny and looking for something with freedom, or short, compact and looking for a more solid feel - we have a model to keep you covered.

MOBILITY: ASYM SKIVING:

Custom Fit, Park Fit, Athletic Fit. What ever your riding demands, in the fit of your vest we have a range that will make any rider forget that they are wearing a vest. A fit that let you focus on your personal progression and not worry about what your vest isn't allowing you to accomplish.

COMFORT:

Using lightweight quick dry materials that don't irritate your skin. Ever have that irritating rash on your inner arm? Should have worn a Ronix vest.

THE LOOK:

It's more than a required piece - it's a fashion statement. Our  is hot

CAPELLA 2.0 FIT : CGA LIFE JACKET

A custom tailored fitting version for lengthier torsos. Also improved upon the flex zones with Asymmetrical grooves going opposite the segmentation for the most in mobility. The best fitting longer vest in watersports.

- 1 WATER RESISTANT LINER
- 2 TAILORED FIT
- 3 CGA APPROVED

WEBBING DOCK TIE

FEATURES

- Adjustable in length from 3ft to 6ft

TRAILER BOAT GUIDES

FEATURES

- Endorsed by boaters of The Braille Aquatic Association.
- Available in 3ft and 4ft
- Set of 2

SPINNER ATTACHMENT

FEATURES

- You know what the closest thing is to gum in your hair is? A tangled rope. Fortunately we got a cure for it - the spinner handle zigs when your rope zigs.

**LINKS BACKPACK
PADDED BOARD BAG**
All the same features as the other Links Bag - just the wheels have been substituted for shoulder straps.

- Durable Padded Shell
- Backpack Shoulder Straps
- 2 External And 1 Internal Pockets
- Zippered Pockets
- Fits Any Size Ronix Wakeboard

**BATTALION
PADDED BOARD BAG**
A padded traveling den. Roomy enough to fit all your stash.

- Durable Padded Shell
- Shoulder Strap
- 2 External And 1 Internal Pockets
- Fits Any Size Ronix Wakeboard

**OGIO/RONIX
TRAVEL LUGGAGE**

- Wide Mouth Main Compartment Opening
- Mesh Organization Dividers With Zippered Pockets
- Smooth Ride Urethane Wheels
- Telescoping Pull Handle
- 600D Polyester Pindot

**SQUADRON
HALF PADDED BOARD BAG**
A semi-padded board bag with enough features to leave your board with a smile on her face every time you stash her back in the closet.

- Durable half padded shell
- Shoulder strap
- 2 External pockets
- Fits any size Ronix wakeboard

**LINKS WHEELIE
PADDED BOARD BAG**

- TSA Approved Combination Lock
- Durable Padded Shell
- Wheelie Transportation With Dual End Carry Handles
- 2 External And 1 Internal Pockets
- Zippered Pockets
- Heavy Duty YKK Zipper
- Fits Any Size Ronix Wakeboard

**DAWN
PADDED BOARD BAG**
You wouldn't want your new Signature Collection to get dinged up would you? Scaled to fit any women's boat/boot set up in our line.

- Durable half padded shell
- Shoulder strap
- 2 External pockets
- Fits any size women's Ronix wakeboard

**BULWARK
NEO SLEEVE BOARD BAG**
Think of it as a jimmy for your board. A responsible choice at our most affordable value.

- Prevents Unprotected Traveling Dings
- Shoulder Strap
- 2 Sizes: Up To 136cm / Up To 146cm

**COLLATERAL
NON-PADDED BOARD BAG**
We also have a really nice unpadded board bag at an affordable value.

- Internal Pockets
- Shoulder Strap
- Fits Any Size Ronix Wakeboard

THE SKIMMER // WOMEN'S SPECIFIC

PERFORMANCE	CONSTRUCTION	Profile	Rail
Advanced	Carbon	Skimmer	Hard

Perfect your ollie and session easier shove-its from this skate inspired specific deck. A brand spanking, new hot off the press, traditional skim board that opens up a whole new spectrum of tricks for female surfers. Our thinnest board has a more reactive rail with a lighter design for more contact and feel, constructed in our most responsive Air Core foam wrapped in an all carbon shell.

FEATURES

- Machined EVA concave back pad with arch support and extra tall tail kick
- Silicone front pad for more overall board control and feel
- Ronix exclusive tool-less Fin-S 2 system
- Injected Carbon Epoxy Constructed Fin
- 1 Fiberglass symmetric 2.5" fin
- Handmade by Robots
- Compression Molded
- Liquid Lava High Temp Resin
- Air Vents inserted in the EVA pads

SKIMMER PROFILE
A board designed to sacrifice some top water momentum for a ride that has the most feel with the water.

SIZE (CM)	VOLUME (LITERS)	TIP ROCKER (INCHES)	CENTER WIDTH (INCHES)	WEIGHT RANGE (AVERAGE SIZE/ABILITY/WAKE SIZE)
4'4"	8.7	1.6"	20.2"	Up To 155lbs

POTBELLY ROCKET // WOMEN'S SPECIFIC

PERFORMANCE	CONSTRUCTION	Profile	Rail
Advanced	Naked	Potbelly	Hard

A Women's member of the only series where the thickest part of the board is in the belly. Riding nose high on the water like its cruiser counterpart - this deck just does everything on the water in 5th gear. The Rocket has plenty of drive, response, and a unique riding style more like a traditional surfboard with the tip up. drive, response, and feel unlike any of our other boards. Made with our minimalist naked series featuring a stronger poured urethane rail design.

FEATURES

- Machined EVA concave pads with arch support and extra tall tail kick
- Ronix exclusive tool-less Fin-S 2 system
- Injected Fiberglass Epoxy Constructed Fins
- 2 - 4.5" Asymmetric Fins and 1 - 4.0" Symmetric Fin
- Handmade by Robots
- Compression Molded
- Liquid Lava High Temp Resin
- Air Vents inserted in the EVA pads

POTBELLY PROFILE
The first of its kind with more volume in the center of the board.

SIZE (CM)	VOLUME (LITERS)	TIP ROCKER (INCHES)	CENTER WIDTH (INCHES)	WEIGHT RANGE (AVERAGE SIZE/ABILITY/WAKE SIZE)
4'3"	21.6	2.4"	21.5"	125lbs and Up

KOAL FISH // WOMEN'S SPECIFIC

PERFORMANCE	CONSTRUCTION	Profile	Rail
All Levels	Technora	Standard	Full

This 4'5" shape is the premier fast gliding, surf constructed women's edition for us freshies. We went into the "blue room" and shaped a women's spin-off from our most classic high-end surfer for the ultimate female performer. Our many moons of designing wake surfboards has resulted in a refined version of our versatile Koal Fish. This speedy shape rides higher on the water with a full profile and a thicker, more buoyant surf constructed core. Inspired by our favorite fish profiled board, named after our favorite black sand beach, and has only one function - do anything you want. Made with the added response of Technora - a material that helps create a more reactive overall women's surfboard.

FEATURES

- Machined EVA concave pads with arch support and extra tall tail kick
- Ronix exclusive tool-less Fin-S 2 system
- Injected Fiberglass Epoxy Constructed Fins
- 2 - 4.0" Asymmetric Fins and 1 - 3.0" Molded Symmetric Fin
- Handmade by Robots
- Vacuum bagged with epoxy resin

STANDARD PROFILE
This thickness is for a rider that wants the classic feel of a traditional wakesurf cross section.

SIZE (CM)	VOLUME (LITERS)	TIP ROCKER (INCHES)	CENTER WIDTH (INCHES)	WEIGHT RANGE (AVERAGE SIZE/ABILITY/WAKE SIZE)
4'5"	14.2	3.7"	20.6"	Up To 170lbs

SUPER SONIC SPACE ODYSSEY SKIMMER // KID'S SPECIFIC

PERFORMANCE	CONSTRUCTION	Profile	Rail
Intermediate	Super Sonic	Skimmer	Hard

A new kid's specific skim shape. Perfect your ollie and session easier shove-its from this skate inspired deck. A brand spanking new, hot off the press, traditional skim board that opens up a whole new spectrum of tricks.

FEATURES

- Machined EVA concave top deck
- Grom Design
- 1 - 2.3 Hook Fin
- Compression Molded
- Liquid Lava High Temp Surf Resin
- Air Vents inserted in the EVA pads

SKIMMER PROFILE
A board designed to sacrifice some top water momentum for a ride that has the most feel with the water.

SIZE (CM)	VOLUME (LITERS)	TIP ROCKER (INCHES)	CENTER WIDTH (INCHES)	WEIGHT RANGE (AVERAGE SIZE/ABILITY/WAKE SIZE)
3'11"	11.0	2.6"	19.6"	Up To 80lbs

SUPER SONIC SPACE ODYSSEY POWERTAIL // KID'S SPECIFIC

PERFORMANCE	CONSTRUCTION	Profile	Rail
Entry Level	Super Sonic	Drive	Full

Combining the stable aspects of a longboard, the bottom turn drive of a thruster, and the ability to air out like no other kid's board out there. There has never been a board with this much surface area in the tail for bigger airs off the top deck, that can easily be ridden behind smaller size boat wakes.

FEATURES

- Machined EVA concave top deck
- Grom Design
- 2 - 1.5" & 1 - 2.3 Hook Fins
- Compression Molded
- Liquid Lava High Temp Surf Resin
- Air Vents inserted in the EVA pads

DRIVE PROFILE
A fast push feeling but with a thinner tip profile so the board will feel more stable in and out of a turn.

SIZE (CM)	VOLUME (LITERS)	TIP ROCKER (INCHES)	CENTER WIDTH (INCHES)	WEIGHT RANGE (AVERAGE SIZE/ABILITY/WAKE SIZE)
3'9"	12.0	3.1"	17.6"	Up To 100lbs

SUPER SONIC SPACE ODYSSEY FISH // KID'S SPECIFIC

PERFORMANCE	CONSTRUCTION	Profile	Rail
Entry Level	Super Sonic	Standard	Full

Not sure if your grom needs something loose and skatey, extra reactive, or Sunday cruise mellow, and just want an overall fun shape? A fish profiled "fun" board with a deep swallow tail that can easily break free on the top of the lip, yet has the bottom turn drive to get you there quickly.

FEATURES

- Machined EVA concave top deck
- Grom Design
- 2 - 1.5" & 1 - 2.3 Hook Fins
- Compression Molded
- Liquid Lava High Temp Surf Resin
- Air Vents inserted in the EVA pads

STANDARD PROFILE
This thickness is for a rider that wants the classic feel of a traditional wakesurf cross section.

SIZE (CM)	VOLUME (LITERS)	TIP ROCKER (INCHES)	CENTER WIDTH (INCHES)	WEIGHT RANGE (AVERAGE SIZE/ABILITY/WAKE SIZE)
3'9"	11.6	3.1"	17.3"	Up To 90lbs

KOAL FISH

PERFORMANCE	CONSTRUCTION	Profile	Rail
All Levels	Classic	Standard	Full

Our longest running high-end surfers. Not sure if you need something loose and skatey, extra reactive, or a mellow Sunday cruise - and just want an overall fun shape? This Koal Fish profiled "fun" board with a deep swallow tail that can easily break free on the top of the lip, yet has the bottom turn drive to get you there quickly. A versatile swallowtail design for toes on the nose stability, frontside airs off the lip performance, and big cutbacks on the wake. New for this year, we added a wider more stable nose design, and a faster rockerline. This speedy shape rides high on the water with a full rail and our exclusive machined core creating more glide speed. Available in 3 lengths covering the spectrum of riders and wake sizes. The Koal's shape and construction is a perfect ride for us inlanders with wake slashing versatility. Our most universal surfer using bits and pieces of bits and pieces of most of our other boards.

FEATURES

- Machined EVA concave pads with arch support and extra tall tail kick
- Ronix exclusive tool-less Fin-S 2 system
- 2 - 4" and 1 - 3" symmetric fins
- Handmade by Robots
- Vacuum bagged with epoxy resin
- Liquid Lava High Temp Surf Resin
- Air Vents inserted in the EVA pads

SIZE (CM)	VOLUME (LITERS)	TIP ROCKER (INCHES)	CENTER WIDTH (INCHES)	WEIGHT RANGE (AVERAGE SIZE/ABILITY/WAKE SIZE)
4'6"	16.8	4.0"	20.6"	Up To 175lbs
5'	19.6	4.0"	21.6"	Up To 205lbs
5'6"	21.6	4.0"	21.6"	160lbs and Up

THUMBTAIL +

PERFORMANCE	CONSTRUCTION	Profile	Rail
Advanced/Intermediate	Koal Surface	Drive	Full

Danny Harf's signature deck combines the skate like feel of a skimboard with the rail design of a classic surfboard - pressed in our new Surface Skin Exterior. Experience easier shove-its from this skate inspired profile and concave top deck. Designed to be ridden both switch and regular with a semi twin outline, a machined pad covering the entire top deck. The Thumbtail has a standard thickness in the nose area for solid contact with the water, then gradually gets thicker thru the center to the tail of the board delivering more top water speed than a traditional surf profile. A thicker profiled higher top speed shape blending a looser feel for easier 360's and the extra speed to air off the face of the wake. Endorsed by X Games royalty - Danny Harf.

FEATURES

- Machined EVA concave pads with arch support and extra tall tail kick
- 1 symmetrical 2.9" fin
- Compression Molded
- Liquid Lava High Temp Surf Resin
- Air Vents inserted in the EVA pads

SIZE (CM)	VOLUME (LITERS)	TIP ROCKER (INCHES)	CENTER WIDTH (INCHES)	WEIGHT RANGE (AVERAGE SIZE/ABILITY/WAKE SIZE)
4'4"	23.6	1.8"	19.9"	Up To 170lbs
4'10"	27.2	2.0"	20.2"	Up To 205lbs

MARSH "MELLOW" THRASHER

PERFORMANCE	CONSTRUCTION	Profile	Rail
Intermediate/Entry Level	Marsh "Mellow"	Standard	Hard

A soft top construction combines the best elements of speed, weight and durability. Made with a similar core to our other more expensive surfers - this Thrasher has a unique glass lay up and a soft top exterior. The result is our most advanced recreational core to date with most of the performance and weight aspects of our surf constructed decks, the durability of a soft top, yet produced for surfers on a budget. Your board accidentally slams into the boat? No worries, its soft exterior won't chip or ding your gel coat the way other traditional constructed decks will. We don't want to play favorites - but if you're reading this right now - this top water traveling, speedy, lightweight, durable series has a little soft spot in our engineer's hearts. We spent four seasons developing this adjustable fin configuration, rope-less water device.

FEATURES

- Machined EVA top deck with kick tail
- 2 - 2.3" & 1 - 2.9" Black Polycarbonate fins
- Compression Molded
- Liquid Lava High Temp Surf Resin
- Air Vents inserted in the EVA pads

SIZE (CM)	VOLUME (LITERS)	TIP ROCKER (INCHES)	CENTER WIDTH (INCHES)	WEIGHT RANGE (AVERAGE SIZE/ABILITY/WAKE SIZE)
4'8"	16.0	3.8"	20.0"	Up To 175lbs
5'2"	20.2	4.2"	20.5"	Up To 205lbs

STUB FISH

PERFORMANCE	CONSTRUCTION	Profile	Rail
Entry Level/Intermediate	Modello	Standard	Blended

We think this series would do really well on that dance competition show. Reason why? Every time we rode this in testing, the board was always in unison with the rider. It never pushes in front of the rider driving up the wake, falls behind in the bottom turn, and pretty much predicts when you're about to shift your weight for a new slaysh. She just brings out a certain inner harmony most only get while doing the salsa to La 33 performing Pantera Mambo - now that's a rhythm song. And oh yeah it is a lighter layup of our signature wakeboard durability construction. The Stub Fish shape has a longboard feel to it, but with the added release of a Koal Fish. Did we already mention how much rhythm this crossover longboard/fun board has? Last but not least - our most affordable value.

FEATURES

- Concave top deck with kick tail
- New rear and front pad design
- 1 - 2.9" Black Polycarbonate fin
- Lightweight wakeboard construction
- Liquid Lava High Temp Wake Resin

SIZE (CM)	VOLUME (LITERS)	TIP ROCKER (INCHES)	CENTER WIDTH (INCHES)	WEIGHT RANGE (AVERAGE SIZE/ABILITY/WAKE SIZE)
4'8"	14.1	3.5"	21.5"	Up To 185lbs

FISH SKIN// WITH STRAPS

PERFORMANCE	CONSTRUCTION	Profile	Rail
Entry Level/Intermediate	Modello	Standard	Hard

The goal of this shape is to create a more affordable, more durable, rhythm like nothing you've ever ridden with the feel of a fish/fun surfer, mixed with a skate-like feel of a skimboard. The creators of the first ever compression molded surfer - proudly present our most performance oriented Modello surfer, now with the option of straps for effortless deep-water starts, or wakeboard inspired tricks. Lightweight overall surf performance combined with the durability of a board you typically would mount boots to. Who says you can't make a high-end surfer out of wakeboard technology?

FEATURES

- Concave top deck with kick tail
- New rear and front pad design
- 2 - 2.3" Polycarbonate fins and 1 - 2.9" Polycarbonate fins
- Lightweight wakeboard construction
- Compression Molded
- Liquid Lava High Temp Wake Resin

SIZE (CM)	VOLUME (LITERS)	TIP ROCKER (INCHES)	CENTER WIDTH (INCHES)	WEIGHT RANGE (AVERAGE SIZE/ABILITY/WAKE SIZE)
4'9"	13.8	2.2"	20.5"	Up To 185lbs

POWERFISH +

PERFORMANCE	CONSTRUCTION	Profile	Rail
Advanced	Technora	Drive	Blended

Our longest running surfer is a fish design - usually referred to as a funboard with its deep swallowtail that allows a rider to break free quicker and easier than most surfers, but still giving you a decent spoonful of bottom turn drive. One of our best selling surfers has been the Powertail +. A thicker profile, wider platform creating the ability to build up speed unlike any other surfer we have ever tested. For 2018 we created the Powerfish + that has the best attributes of both of these shapes. Unrivaled drive and speed - but yet can still easily cut loose off the lip. Another new reason to chase the endless summer.

FEATURES

- Machined EVA concave pads with arch support and extra tall tail kick
- Ronix exclusive tool-less Fin-S 2 system
- 2 - 4.0" Epoxy Molded Asymmetrical Fins and 1 - 3.5" Epoxy Molded Symmetrical Fin
- Liquid Lava High Temp Surf Resin
- Air Vents inserted in the EVA pads
- Handmade by Robots
- Compression Molded

SIZE (CM)	VOLUME (LITERS)	TIP ROCKER (INCHES)	CENTER WIDTH (INCHES)	WEIGHT RANGE (AVERAGE SIZE/ABILITY/WAKE SIZE)
4'5"	25.6	2.5"	22.0"	120lbs and Up
4'10"	27.9	2.5"	22.0"	150lbs and Up
5'3"	30.3	2.5"	22.0"	180lbs and Up

POWERTAIL +

PERFORMANCE	CONSTRUCTION	Profile	Rail
Advanced	TechNora	Drive	Full

In wake surfing there is a movement towards thicker profiled boards. This makes the board ride higher on the water, creating infinitely more drive on the water and up the wake, and an easier ability to air off the lip. We took our best selling shape and stayed with the standard thickness in the nose area for greater contact with the water, then gradually went thicker thru the center to the tail of the board creating the most amount of top water speed. With a wide stable platform with a high end kick, the Powertail shape combines the stable aspects of a longboard, aspects of the bottom turn drive of The Conductor, and the ability to air out like no other board you have ridden. The perfect option for riders looking for a stable shape that has the speed needed even with smaller boat wakes, and a new school shape for those high-end riders looking for added drive while on and leaving the water.

FEATURES

- Machined EVA concave pads with arch support and extra tall tail kick
- Ronix exclusive tool-less Fin-S 2 System
- Fiberglass cupped asymmetrical fins
- 1 symmetric 3.5" and 2 asymmetric 4.5" Fins
- Liquid Lava High Temp Surf Resin
- Air Vents inserted in the EVA pads
- Handmade by Robots
- Compression Molded

SIZE (CM)	VOLUME (LITERS)	TIP ROCKER (INCHES)	CENTER WIDTH (INCHES)	WEIGHT RANGE (AVERAGE SIZE/ABILITY/WAKE SIZE)
4'5"	26.37	3.2"	20.0"	125lbs and Up
4'11"	28.6	3.6"	22.0"	155lbs and Up

CROSSOVER

PERFORMANCE	CONSTRUCTION	Profile	Rail
Advanced/Intermediate	Technora	Standard	Blended

Toes on the nose stability, with the agility of your favorite short board. Packed down to either a 4'5" and 4'11" size capable of doing cut-backs of any modern day responsive shape, yet has the profile that would make the great waterman Duke proud.

FEATURES

- Machined EVA concave back pad with arch support and extra tall tail kick
- Silicone front pad for more overall board control and feel
- Ronix exclusive tool-less Fin-S 2 system
- Injected Fiberglass Epoxy Constructed Fins
- 1 symmetric 3" and 2 asymmetric 3.5"
- Handmade by Robots
- Vacuum bagged with epoxy resin
- Liquid Lava High Temp Surf Resin

SIZE (CM)	VOLUME (LITERS)	TIP ROCKER (INCHES)	CENTER WIDTH (INCHES)	WEIGHT RANGE (AVERAGE SIZE/ABILITY/WAKE SIZE)
4'5"	15.7	2.0"	21.4"	Up to 205lbs
4'11"	17.5	2.3"	21.5"	120lbs and Up

POTBELLY ROCKET

PERFORMANCE	CONSTRUCTION	Profile	Rail
Advanced	Naked	Potbelly	Hard

A member of the only series where the thickest part of the board is in the belly. Riding nose high on the water like its Cruiser counterpart - this deck does everything on the water in 5th gear. The Rocket has plenty of drive, response, and a unique riding style more like a traditional surfboard with the tip up. Drive, response, and feel unlike any of our other boards. Made with our minimalist naked construction featuring a stronger poured urethane rail design.

FEATURES

- Machined EVA concave back pad with arch support and extra tall tail kick
- Silicone front pad for more overall board control and feel
- Ronix exclusive tool-less Fin-S 2 system
- Injected Fiberglass Epoxy Constructed Fins
- 2 - 4.5" Asymmetric Fins and 1 - 4.0" Symmetric Fin
- Handmade by Robots
- Compression Molded

SIZE (CM)	VOLUME (LITERS)	TIP ROCKER (INCHES)	CENTER WIDTH (INCHES)	WEIGHT RANGE (AVERAGE SIZE/ABILITY/WAKE SIZE)
4'3"	21.6	2.4"	21.5"	125lbs and Up
4'8"	23.7	2.4"	21.8"	155lbs and Up

POTBELLY CRUISER

PERFORMANCE	CONSTRUCTION	Profile	Rail
Advanced/Intermediate	Naked	Potbelly	Blended

The 2nd gear alternative to the wide open Potbelly Rocket. There is no doubt that there is a trend going towards thicker boards - this means more momentum for the surfer, and allows you to ride with a shorter board. Typically these styles of boards go from a thick tail and gradually get thinner as you get to the nose. With the Potbelly series the thickest part is in the center (like a pig - see what we did there) so you still have a ton of speed - but this series allows the tip of the board to ride higher on the water like an ocean surfboard. This particular Cruiser model does everything at a smoother, mellower longboard style pace. Made with our minimalist naked construction featuring a stronger poured urethane rail design.

FEATURES

- Machined EVA concave back pad with arch support and extra tall tail kick
- Silicone front pad for more overall board control and feel
- Ronix exclusive tool-less Fin-S 2 system
- Injected Fiberglass Epoxy Constructed Fins
- 2 - 4.0" Asymmetric Fins and 1 - 3.5" Molded Symmetric Fin
- Handmade by Robots
- Compression Molded
- Liquid Lava High Temp Surf Resin
- Air Vents inserted in the EVA pads

SIZE (CM)	VOLUME (LITERS)	TIP ROCKER (INCHES)	CENTER WIDTH (INCHES)	WEIGHT RANGE (AVERAGE SIZE/ABILITY/WAKE SIZE)
4'6"	24.0	2.4"	20.7"	125lbs and Up
4'11"	26.2	2.4"	20.7"	150lbs and Up

KOAL LONGBOARD

PERFORMANCE	CONSTRUCTION	Profile	Rail
All Levels	Classic	Standard	Full

Let's hit the E-brake on the 21st century hustle. Sometimes you need to quit updating your social media site, replying to the "what did you do last night?" text, and on August 12th, our self proclaimed go ride day, even school and work should be taking a rain check. Sometimes we need those days and a product to remind us all of why there is no feeling like riding sideways on the water. The thickest, most buoyant surf constructed board in our range has a full rail with a forgiving soft bevel. The result is our most stable, easy going, soul turn special that is even more forgiving for a Sunday afternoon cruise. Grab a couple of your favorite chums, regardless of the surfer's size or boat wake, and experience the endless wave of this design.

FEATURES

- Machined EVA concave pads with arch support and extra tall tail kick
- Ronix exclusive tool-less Fin-S 2 system
- Injected Fiberglass Epoxy Constructed Fin
- 1 symmetric 4.5" Fin
- Liquid Lava High Temp Surf Resin
- Air Vents inserted in the EVA pads
- Handmade by Robots
- Vacuum bag with epoxy resin

Typically a surfboard has both a gas and a brake pedal. You put more weight on the front of the board to jump on the throttle, and lean back to slow your board down. The Conductor is the first of its kind that has the ability to generate speed and then maintain it in a more controlled manner. So you can spend less time worrying about where you are in relation to the peak of the wave, and more time thinking about where you want to take it. Conductor - a maestro of your aquatic wave displacement.

FEATURES

- Machined EVA concave back pad with arch support and extra tall tail kick
- Silicone front pad for more overall board control and feel
- Ronix exclusive tool-less Fin-S 2 system
- Injected Fiberglass Epoxy Constructed Fins
- 1 symmetric 3" and 2 asymmetric 3.5" Fins
- Handmade by Robots
- Compression Molded

Carbon Air Core 3

Profile

Skimmer

Rail

Hard

A skim style profile combined with the response of the Potbelly Rocket one of our most popular boards. Skim + Rocket = Sprocket. This stealth new creation comes with a sharper rail, bevel and bottom channels - the result is high speed maneuverability. This electric board is hands down the most responsive surfer out there with more bite in your bottom turn and a quicker release off the peak - riding like a skim style version of our popular Pot Belly Rocket. Our most reactive layup we have ever built in our many swells of producing surfers.

FEATURES

- Machined EVA concave pads with arch support and extra tall tail kick
- Ronix exclusive tool-less Fin-S 2 system
- Injected Fiberglass Epoxy Constructed Fins
- 1 symmetric 3.5" and 2 asymmetric 4"
- Liquid Lava High Temp Surf Resin
- Air Vents inserted in the EVA pads
- Handmade by Robots
- Compression Molded

TECHNOLOGY

A tradition of eminence awaits your water travels over the next couple of pages.

SHAPES:

No 2 boards ride the same, or for that matter remotely similar. The only point in having a quiver is to make sure they each go in uncharted waters.

MATERIALS:

Why would a wakesurf company be based outside of Seattle, WA? Advanced aerospace composites are always at your doorstep.

TRACTION:

Machined EVA. Formed EVA, a new material that feels like corduroy and a clear pad that feels like wax. Can't have a race car without the appropriate seat for your feet.

FIN-S:

We have used all of the "major" fin systems - and in our honest opinion nothing comes close to Fin-S.

RAIL THICKNESSES:

We have boards that range in thickness by nearly 2". More buoyancy vs. added feel.

BOX IN A BOX

Might not seem like much - but the last thing you want is a floating fin plug when your boards made. With box in a box every fin plug is set to the exact depth of each board. Perfect fit and cleanliness every time.

LAVA RESIN:

A high temperature resin used on all of our surfers, built to withstand mother nature's extreme heat.

CONSTRUCTION // FEEL THE DIFFERENCE

From a smooth flow, to strong contact with the water, to warp speed reaction - we have 8 unique constructions for varying styles of surfers. The most diverse range of cores to help highlight the board's intended riding style.

CARBON AIR CORE 3:

The most responsive construction we have ever tested. Made out of a mold, and then wrapped in carbon for a torsionally stiff layup unlike any other.

NAKED:

Less is more. These cores are designed with a minimalist approach, keeping the purest form of surf in mind.

MODELLO:

Hip swaggering rhythm between rider and board meets our most rock solid construction. Less prone to dings, and more connection to the water than most of our surfers.

HEX SHELL 2.0:

A new construction using a machined Rhino Core spine down the middle, and a traditional surf foam on the outside. The result is response where you want it, and feedback where you need it.

KOAL CLASSIC:

The building block to a surf constructed surfer. Made with the same process and ingredients as your favorite saltwater brethren. A lightweight high end core.

MARSH"MELOW":

The feel of a traditional surfer - the durability of a wakeboard. Using a similar core as our Koal boards, but then wrapped with a soft exterior deck material.

KOAL TECHNORA:

Wrapped in a woven stringer laminate to create a more reactive overall surfboard than a traditional fiberglass construction. A blend between our classic Koal construction and our ultra responsive Hex Shell.

KOAL SURFACE:

A new construction for 2019 incorporating the core of our high-end Koal Technora, molded similar to our Modello boards, and wrapped in our new Surface Skin. In short, the lightweight feel of your favorite high end surfer, the durability of your wakeboard, and a new skin that breaks up the water for a more free flowing feel on the water.

FEEL

RESPONSE

THICKNESS // THE MOST COMPLETE LINE OF CROSS SECTIONS IN WAKESURFING

Of course constructions and profiles play a massive roll in altering how a surfer rides - but this past off season we spent a lot of time on the cross section thickness. We have surfers ranging as thin as .7" all the way up to over 2" thick. Discover the amount of water stability you can get from a thin profiled board, to the increased push from a thicker platform and anywhere in between. We grouped our surfers into 4 different cross sections each catering to a unique approach on the water.

SKIMMER:

A board designed to sacrifice some top water momentum for a board that has the most in feel with the water. Allowing the rider to surf more like they are on a wakeskate, either using a shallow fin, or no fin at all because the board has so much natural grip.

STANDARD:

This thickness is for a rider that just wants the classic feel of a traditional wakesurf cross section - not too thick - not too thin. It has greater feel for the water than its thicker counterparts, but also has more topwater speed than a skimmer.

DRIVE:

A fast push feeling but with a thinner tip profile the board will feel more stable in and out of a turn. As thick of a tail design for a rider that wants to jump on the gas and get back into the sweet spot of the wake easily - but still has a thin enough front half for it to feel more reliable.

POTBELLY:

The first of it's kind with more volume in the center of the board giving the surfer more push down the line of the wave with the stability/sweet spot of a long board.

THINNER

THICKER

RAILS

POWERFUL CUTBACK TO MELLOW TRANSITIONS

3 different rail designs ranging from riders that like to bury the rail with a stronger cutback - to a design more suited for a chill water sesh.

HARD RAIL:

High speed carves for riders that like to jump on the gas pedal.

- AVAILABLE ON:
- Carbon Skimmer (Men's/Women's)
 - Carbon Sprocket
 - Marsh"Mellow" Thrasher
 - Potbelly Rocket
 - Modello Fish Skim

BLENDED RAIL:

Accelerated turns combined with a Sunday afternoon cruise rail design.

- AVAILABLE ON:
- Hex Shell Conductor
 - Modello Stubbyfish
 - Potbelly Cruiser
 - Koal Technora Powerfish+
 - Koal Technora Crossover

FULL RAIL:

Smooth, predictable arcs for a classic surf feel.

- AVAILABLE ON:
- Koal Technora Powertail+
 - Koal Surface Thumbtail+
 - Koal Classic Longboard
 - Koal Classic Fish
 - Koal Technora Women's Fish

WHAT BOARD IS RIGHT FOR YOU? LET'S FIND OUT

BY ANSWERING 3 SIMPLE QUESTIONS, YOU CAN FILTER FROM 36 BOARDS TO 1 OR 2 THAT WILL COMPLETE YOUR QUIVER.

1 ARE YOU READY TO ROCK THE ENDLESS SUMMER?

YES

LET'S DIG DEEPER AND DEFINE YOUR STYLE A BIT MORE:

NO

JUST WANT TO DO IT A COUPLE OF TIMES

YOU SHOULD CHECKOUT THESE ALL AROUND SHREDDERS:

This chart can be defined differently depending on your ability or style.

2 ARE YOU LOOKING FOR MORE CONTROL OR MORE TOP WATER SPEED?

A MORE CONTROL

B MORE TOP WATER SPEED

C COMBINATION

3

WHAT STYLE OF TURN DO YOU PREFER?

A HAIRPIN MANEUVERING

B MELLOW FREERIDE FEEL

C COMBINATION

WHERE DO YOU FALL?

NOW THAT WE'VE DETERMINED THAT, LET'S MOVE ON

NOW THAT YOU HAVE DETERMINED YOUR BOARD:

IF YOU ARE RIDING BEHIND A SMALL-MID MASS WAVE, PICK A LONGER BOARD - RIDING ON A LARGE MASS WAVE, PICK A SHORTER BOARD.

The Soul Of Surfing

Sure we see a lot of Made In China tags on our personal devices these days - but what makes them unique? Within the Ronix range we are sourcing materials from all over the world. Truly creating products made with special materials that make a tangible difference. Sometimes its visible - in most cases it isn't. In our surfer range alone, we get our fin boxes from Florida, surf traction pads that are designed and made in Hawaii, carbons from Indiana, and a handful of our cores come from Canada, others Australia.

Enjoy the difference.

Fin - S 2.0 System - We have partnered with Fin - S on the most simplistic tool-less fin attachment out there. Using proven Spring Lock Technology, with an intuitive 2-stage engagement and removal for the most secure, lightweight setup available.

(R)

Hand shaped by Jason, engineered by Tim. With over a $\frac{1}{2}$ century of working together creating thousands of prototypes, Jason and Tim are the heart and soul of what any company should strive for in innovation. They are responsible for having made the first in so many categories over the years, including the first wakesurf board sold at retail. This year marks their biggest advancement in surfers with 5 new shapes and 2 new constructions. If it has the Ronix name on it you know it was created by 2 people that really understand every aspect of what surfers are truly looking for.

Does it get any better than a boat full of mates weighted down to a crispy delight of waist high curls? We proudly present to you a complete quiver that just makes sense regardless of your need for speed, control, turning style or wake size. This 2019 range is comprised of 8 different constructions, 14 men's series, 3 women's, 3 kid's, and a total of 20 different surfers. We recognize that there are so many styles of riding out there these days, and have catered to a complete spectrum of riding styles and abilities. Oh yeah - we also have the easiest to use, performance driven, tool-less fin system available with Fin-S 2.
