# Bonjour! Guten Tag! Hello!

Learning a language can always be a fun process and a source of great satisfaction – for both juniors and parents – due to its practicability that can be tested in so many different circumstances.

At Languages.lu, the language programmes for kids were conceived for my nephew, Alex, who used to spend all summer holidays in Luxembourg with me. I really wanted Alex to improve his language skills by playing and having fun with other kids, because I was convinced that this would be a great strength for his future. Meanwhile it was a fantastic way for him to spend the school holidays, make new friends and have fun.

Today, Alex is more than 20 years old and sometimes still participates in the language programmes during the summer holidays... however, not as a student because he is perfectly fluent in English and French, but as a team leader in charge of supervising the children and assisting the teachers.

If you are interested in investing in your children's future by providing them with a total immersion experience in French, German or English, Languages.lu in Luxembourg is the perfect choice because we take care of your children as if they were ours!

I look forward to personally welcoming you to our school!

**Daniela Clara Moraru,**  
Founder & Director

# LANGUAGE HOLIDAY CAMPS

From 6 to 18 years old

## Our concept and methodology

Over the years Languages.lu has built its reputation with an innovative and unique approach to teaching. We do not recreate the stressful and competitive school environment, but rather allow the juniors to advance at their own pace.

Although it appears to be a contradiction to the development in recent years of the means of communication, our children now have less time and fewer opportunities to play and communicate with each other. This situation has created an increasing burden of homework, more time spent in front of their TV, iPads and other IT gadgets. Our generation of children devotes less and less time to each other and this means that, sometimes, they don't develop some of the fundamental communication skills.

**Therefore, our language camps place the emphasis on natural and spontaneous communication which helps the children:**

- ✓ Acquire and revise vocabulary and grammar, improve their oral expression and interaction
- ✓ Discover the practical side of the language through creative, musical and cultural activities, which are adapted to and incorporate the students' passions and interests
- ✓ Gain confidence and communicate better
- ✓ Meet and interact with other children from different countries and cultures, make new friends, have fun together while learning, practicing a foreign language and developing their communication skills in a different language than their mother tongue.

In addition, all our language programmes are developed with the greatest attention to the prerequisites outlined by the European Common Reference Framework for Languages, which are valid in all European countries.

# Activities

Our camps are not the equivalent of school tutoring\*. The discovery of the language is made through activities that are fun, interesting, educational and practical, and which are adapted to the group's age and language level. The activities may include:

- ✓ Cooking activities to learn the fruits and vegetables vocabulary and to introduce international recipes from each other's country
- ✓ Different handicrafts such as masks, jewellery and origami creations
- ✓ Roleplay
- ✓ Birthday parties
- ✓ Write and act out short plays or soap-opera episodes
- ✓ Watch and comment on suitable movies
- ✓ Play outdoor games that encourage both team spirit and communication skills in the acquired language
- ✓ Children could learn about the 7 wonders of the world
- ✓ Teenagers could learn and debate about leadership, cultural resemblances and differences, importance of self-confidence, etc.

\*Should your child have specific problems in school with grammar rules, pronunciation etc, we recommend you to register him in our individual school tutoring programme. See page 16.
