

## Bill of Materials.

This is one example we have used and this can be modified if required.

## Create Production Job.

The product to create has a standard BOM/Recipe that is copied to amend.

A screenshot of a dialog box titled 'Insert Production Run'. The dialog box has a blue title bar with a close button (X) on the right. The main area contains several fields: 'Description:' with the text 'Test for KVar Correct'; 'Product to Create' with a dropdown menu showing '1.8MWARDROBE' and icons for a list and a filter; 'Quantity to Create' with a numeric input field containing '5' and up/down arrows; 'Location Code' with a dropdown menu showing 'AKL' and icons for a list and a filter; and 'Date Required' with a date input field showing '30/09/2011' and a calendar icon. At the bottom of the dialog box are two buttons: 'OK' with a green checkmark icon and 'Cancel' with a red X icon.

This creates a new job

You can create the batch for actual usage at this point if you wish, or create later.
