Smart Data Capture

Allow for quick invoice and bill data entry into Accredo using smart technology to 'scrape' data

SKU:

- **Save on time and money by streamlining your workload**
- **Email PDF's and other documents to a special email address Zeal sets up and attached documents will have their data extracted and input straight into Accredo**
- **Quick and easy to use, high reliability, little verification needed**

What is Smart Data Capture?

A document such as an invoice is "scraped" and automatically "keyed" into Accredo, with invoice PFD's attached. The document can be reviewed/edited and then saved.

How does it work?

A document is received via an email, scanner, or drag n drop and is then processed.

I've Seen Other Systems – What's Different?

It's "inside" Accredo, rather than being an external system.
Therefore, you benefit from:
- Quicker to learn as Accredo.
- Quicker to set up 1-2 hours, not months.
- Cheaper - base version free*.
- Allows areas usually difficult for external system. ie shipments with products, matching purchase orders, incorporating custom fields or unique business rules within Accredo.
- AP invoices, AP shipments, CB transactions, PO matching and others

How Long Does It Take to Install?

Our Accredo Qualified Service People can get the system up and running within 1-2 hours

How Good is it?

We have seen many "scraping engines and solutions," and are happy to use any engine. Our main thing is it is within Accredo rather than an expensive and limited add-on and therefore quick and easy to setup and use.

Scraping from what we watch is not perfect, but it's still approximately 60-80% of documents you are saving time on. We have many users performing 4000-5000 document captures a month.

Pricing (all pricing excludes GST)

Setup Fee

	AP Invoice	Electronic Filing	Cashbook Transactions	AP Shipments	PO Matching	Custom Requirements	Price
Silver	☑	☑					**Free**
Gold	☑	☑	☑				**$200**
Custom	☑	☑	☑	☑	☑		**$500**
Custom	☑	☑	☑	☑	☑	*Debtors, assets, integrations, front end changes etc.*	**POA**

Document Processing Fee - using Xtracta Scraping Engine

Monthly Fee
        < 50   Free
        Various tiers from $65 - $390 + GST per month depending on document volume.

In addition, you can buy blocks of documents that last for one year to cover irregular usage peaks

Training and Support

Usually the above setup will cover this as the system is easy to use.
Training or development Assistance beyond this is separate and will incur usual support fees
