

SPIRIT OF SUTTERBY

Metal Smithing, an illustrated talk by Dr Duncan Wright

Thursday 17th May 2018, 1930hrs, Sausthorpe Village Hall

The evening began with Dave Start updating us with upcoming events, he then introduced the speaker Dr Duncan Wright, Senior Lecturer in Archaeology at the Bishop Grosseteste University, Lincoln.

Duncan explained that metal smithing included working with iron to make tools and weapons, also precious metals to make jewellery etc. This could be carried out by men and women alike and is often steeped in folklore.

As is usual the Artisan bakery of Firsby supplied a topical themed cake in the form of an anvil.

Both the talk and the cake were very well received by all in attendance.

Many thanks to Duncan and we all look forward to his return.

Duncan Wright
