

PRECISE QUALITY POLICY

PRECISE TOOL AND MANUFACTURING is dedicated to achieving excellence through quality products and quality services. This can only be achieved through the continuous improvement of all aspects of our business.

The quality of our products, processes, and service are the result of a commitment of PRECISE TOOL AND MANUFACTURING to the following quality principles:

Quality is consistency, and is achieved through the reduction of variability about a given target.

Quality is the result of innovation and the continuous improvement efforts of all employees.

Quality is achieved by using the latest available technology and methods; by processes that are well maintained, in control, and are capable; and by trained, skilled employees that are dedicated to achieving quality.

Quality is dependent on the teamwork and cooperation of every individual, every department, and every division.

Quality results in customer satisfaction through performance, which creates superior value in terms of product quality, cost, delivery, technical support, and customer service.
