- _ Outdoor Fabrics
- _ Standard Foam Inner
- _ Batyline Sling

Stainless Steel

If any aesthetic rust or brown spots appear they can be easily cleaned by gently working in the direction of the brushed finish, with a Scotchbrite pad. If these deposits are allowed to build up over time, clean the product more thoroughly with a Stainless Steel Cleaner & Polisher, which restores the new look of stainless steel furniture and creates a surface that repels dirt and water.

Woven Furniture

We recommend that woven furniture is regularly cleaned using a Sling & Woven Cleaner, following the instructions detailed on the label. It is important to use a non-foaming cleaner on woven furniture, as a foaming product will leave residues in the gaps in-between the weave which will then attract dirt. A pressure hose on a low setting is acceptable to use on woven furniture, but avoid any teak components, as the high pressure can damage the surface of the timber.

Teak

We recommend that you allow your teak furniture to weather naturally and simply clean thoroughly once or twice a year with a Teak Cleaner. When storing Teak furniture we advise that it's best stored in a sealed garage or similar. Do not move teak furniture from outside straight into a heated indoor room. Sudden changes in temperature and humidity may cause the wood to split.

To protect teak surfaces from staining, maintain the silver-grey patina on weathered teak, protect the wood against the ingress of moisture, the adhesion of dirt and prevent mildew, we recommend using a Teak Protector.

If you wish to retain the golden-brown colour of new teak we also offer a Teak Protector, Cleaner and Renewer. You will be embarking on a regular maintenance programme as products will regularly need to be re-applied to provide continuous protection.

Powder Coat

Avoid contact with liquids, heat, bird droppings and direct sunlight. Regularly wipe with a damp soft cloth to remove particles which can abrade the surface with wear. Abrasive cleaning products are not recommended.

Porcelain

Porcelain is suitable for internal and external use. Panels are stain resistant, being a non-porous material but normal daily care must be taken to immediately clean up stains. Best method to minimise stubborn stains is to immediately wash away stains such as red wine, food, oils, drinks by using warm water and a soft non-abrasive cloth. Small variations such as pinholes and surface and colour imperfections are characteristics of the porcelain product.

Outdoor Fabrics

Kett Fabric Collections consist of 100% solution-dyed acrylic or olefin fibre; resist fading from the sun, water and general atmospheric agents. Vacuum cushions to remove any surface dust. Most spot stains on fabrics can be cleaned by rubbing with room temperature water and natural soap. Rinse thoroughly with clean water to remove soap. Cushions which are zip-off can be machine washed. Do not wash at greater than 30°C. Cushions should be air dried. Do not steam iron or dry with heating elements. When putting cushion covers back onto foams, do so whilst the covers are still slightly damp to assist forming to the foam inner cushion.

Standard Foam Inner

Cushions should be brought inside over the winter months or if heavy rain is expected to ensure long life. If cushions get very wet, remove the cover and allow the foam to dry separately to prevent mould from developing.

Batyline Sling

Batyline is resistant to fading, mildew, wear & tear, even under the most severe weather conditions, requiring only occasional cleaning with a mild soap and water.

Use a non-foaming cleaner on Batyline, as a foaming product will leave residue in the gaps in-between the weave which will then attract dirt. A pressure hose on a low setting is acceptable to use on sling furniture, but avoid any teak components as the high pressure can damage the surface of the timber.

For long term revitalization, we recommend that sling furniture is cleaned using a Sling & Woven Cleaner from your product retailer, (following the instructions detailed on the label) to keep it looking as good as new.
