Get Ready to Save Energy and Money. Natural Gas is coming to the Lake Shawnee area.

Dear Homeowners,

Thank you for completing our New Jersey Natural Gas (NJNG) survey. The installation of natural gas in Lake Shawnee for phase 1 is now underway. (See attached map with phases and timeline). Once we start, it will take APPROXIMATELY 4 months to complete the installation in this phase, barring inclement weather or poor digging conditions.

Now is the time to save energy and money by **converting your central heating equipment to clean, energy-efficient natural gas**. **Your next step is to obtain an estimate from a heating contractor to replace your heating system**. Remember, NJNG installs the mains and service lines that bring natural gas to your home, and your heating contractor performs all the work from NJNG's meter to the equipment and appliances inside your home.

Once you convert to natural gas, these charges will appear on your NJNG bill:

- \$15 one-time account opening charge on your first bill
- \$100 road opening permit (due at time of application)
- \$8.70 monthly customer charge (after the meter is installed)
- Charges for the natural gas you consumed

Don't forget there are limited-time rebates and incentives now available to make the move to natural gas even more affordable. Visit savegreenproject.com or call 877-455-NJNG (6564) to speak directly to a representative in the Save Green Department about these valuable incentives. You can also use our **Fuel Cost Savings Calculator** to see how much money you'll save by switching to natural gas. Visit www.natgassaves.com. **You'll be amazed at the savings!**

When you are ready to start saving money with natural gas heat, call me at 973-586-4691 to schedule an appointment to complete our new service application. In the meantime, please share this good news with your neighbors in Phase 1 who may also be interested in making the move to natural gas.

I look forward to helping you save energy and money!

Best Regards,

Brian Klinger
