

# *The Real Revolution*

ETHOASIS

## Why Ethoasis

The opportunities to profit in the cryptocurrency market at the moment are sheer endless, but won't last forever. Our teams working every day to keep our software up to date with the occurring market and foresee upcoming trading opportunities without being fooled by fake news and people who are trying to manipulate the market. We all do this every single day so you don't have to worry about all of this.

WE ARE PASSIONATE TO CREATE COMMUNITY WHICH WILL HELP YOU EVERY STEP OF THE WAY. WE WILL BE THERE FOR YOU.

ETHOASIS

## Ethoasis Features

Ethoasis will release a total of 5,000,000 Token. the method with which the platform functions is similar to any economic system that is based on diflacion and with increasing currency supply. however, the is the major difference cryptocurrency and fiat currency while demand is high, the amount of token will remain the same. As a resultat, the price of the token will increase over time. Spesificacion of our platform include

### Fast Send/Receive

Transfer money real time whenever and wherever.

### Private

Data is secured from payment to personally identifying information.

### Blockchain Technology

Blockchain mean transparent with Ethereum ERC20.

### Fast Payment

Fast and simple payment integration.

### Low Fees

Extremely low fees.

### Easy Convert

Easily convert to your currency of choice.

# Initial Coin Offering (ICO)

## Benefit Program

Our benefits program is a smart investment system better than lending program because you will get your capital back daily + benefits (fixed daily interest according to your investment package). All our packages end between 60 and 90 days.

Example: you invest 1000 USD you will get (2,60%) = 26 USD for 80 days.

Amount	Monthly Interest	Daily Interest	Fin Contract
10-999	60 % Monthly + 0.6 %	2 % Daily + 0.02 %	90 Days
1000-4999	75 % Monthly + 3 %	2.5 % Daily + 0.10 %	80 Days
5000-9999	95 % Monthly + 3.6 %	3.6 % Daily + 0.12 %	70 Days
10000-49999	120 % Monthly + 4.5 %	4 % Daily + 0.15 %	60 Days

# Staking Program

You can simple Stake your Ethoasis Token in your wallet web Staking to earn new Token.

In the blockchain there exists something called Proof of Stake (PoS). That means, if you just leave your token. Because you leave them with us, we from Ethoasis are now able to use them as leverage on high speed trade. There is never just one trade goine one, but always multiple hundreds of them. That guaranties you that you will never loose your (PoS) Token in your wallet. This is a great of making passive income. by keeping a spesific amount of Token in your wallet, you provide security and stability to our system.

Period	Daily Interest
First Year	10 % Monthly
Second Year	6 % Monthly
Third Year	5 % Monthly

# Saving Program

You can save ETHO Token to earn daily Interest.

**How does this work?** Save your ETHO Token for periods 15,30,45 days and ear daily interest (USD). This is a grat way of making passive income, by keeping a spesific amount of token. At the end of the period you get your ETHO back.

Period	Daily Interest
15 Days	0,2 % Daily
30 Days	0,3 % Daily
45 Days	0,5 % Daily

## Mining Program

The Ethoasis mining program is a service of cloud mining, to mine different cryptocurrency. Let's start with the following: Bitcoin, Ethereum, Bitcoin Cash, Litecoin, Zcash, Monero. The contracts are for 6, 12 and 36 months. The payments are daily to your wallet.

**Note: we only accept payment with ETHO Token.**

## Trading

Another great feature of the Ethoasis token is that user can also benefit from any downward movement that cloud occur. Trading the cryptocurrency works to users advantage in the instance. The Ethoasis utilises the script algorithm, meaning that its calculations are much more serialised than those of other currencies, like bitcoin.

Ethoasis does have a finite number of token, limited to 5,000,000 altogether. just 2,000,000 of these will be available via the Initial Coin Offering (ICO). This limited number of token ensures that there will be a constant appreciation od sush.

Tradin Etoasis token allows users to buy sush at a lower price and sell them at a highr price, therebe pocketing the price different between these valeus. This is beneficial as you get to retain all of the profit made between buying and selling. if users want to invest in the Trading option, they will need to own Ethoasis token to begin with. they simply need to buy thes fron the exchange via one of the accepted currencies and then sell them when the time is right. This is entirely in the hands of the users, so buying and selling time are entirely their choice.

The chart below displays the price prediction for Ethoasis, starting out at \$0.4 in february 2017 and eventtually rising to over \$20 in june 2018. again, as more demand for cryptocurrency occurs. the interest on coin held by current user will flourish This is why it's quite a key point for investors to take advantage of the ICO and profit from the price increase from the start on.

# Prediction Price

# Wallet

## Desktop Wallet

Windows, Mac, Linux.

## Web Wallet

<https://www.ethoasis.io>  
<https://www.ethoasis.co>

## Mobile Wallet

For Android IOS and Windows Phone, our wallet are designed to be secure, trustworthy and very easy to use. There will be a training to help you with using the wallet safely.

# Token Buy Back Program

We realize that many of our investors will simply want to buy and hold/stake the tokens and we expect that the value of the token will increase quite quickly after the ICO and exchange opening.

The ICO price of the token is well below what we truly believe is the real value of our tokens but to further increase the value of our tokens, we will run a token buyback program.

At the end of every month, a large percentage of our profits will be used to buy and burn tokens. This reduces the supply and increases the price of the token , to return profits to investors.

## Our Robotrader

Our groundbreaking robotrader is in full time development. This trading bot uses proprietary algorithms to measure sentiment analysis, it can read the "feel" of the market based on social media posts, comments and links. it can scan press releases and news articles. cryptocurrency market can be heavily swayed based in market feel.

# Fund Management

Our fund management team consists of seasoned traders across the globe. We are well vered in the ICO and investment world, haven taken part in so many over the last 5 years. We are trades of high level, massively successful crypto project who come to us with the konwledge of both what works, and what doesn't. They are mindful of the shortcomings of the lending platforms, and have their own proprietary algorithms. Our funds management have the acces to developers and reputation built in the community. We are beyond thrilled to have a team of +30 working closely together in countries around the world.

**THANK YOU**
