Luxury Office Christmas Tree Hire

WORKPLACE has selected a beautiful range of Christmas decorations, enabling you to choose from a range of styles that will compliment your company's brand identity.

We supply both real and artificial trees - from 5ft for a small reception area to 15ft trees for business parks and Head Office locations.

Our festive services includes delivery, decoration, removal and recycling of your office Christmas tree.

We will deliver your Nordmann Fir (non-drop premium tree) or artificial Christmas tree to your office, hand decorate it with hundreds of white lights and luxury glass baubles and shapes, then remove and recycle it in January.

Premium Nordmann Fir or Artificial Tree?

At WORKPLACE, we always recommend having a real tree, which is why we only used the highest quality live trees that will not drop their needles, even after they have dried out.

Real trees are also almost completely carbon neutral, and any waste will be broken down and re-used via our collection & recycling program.

However; we understand that sometimes a real tree is not always practical for your workplace, so we also invest in high quality artificial trees up to 10 foot, which come complete with stand and are fully decorated.

What size Christmas Tree do I need?

WORKPLACE offer artificial trees from 6-10 foot, and real trees from 5-15 foot.

We would always recommend measuring the height of you workplace, but most of our clients find a 7-8 foot tree fits nicely.

We can provide interior and exterior trees for the real wow factor for your staff and visitors.

Please review our variable price list and contact us for an exact quote.

We offer discounts for multiple orders, as well as early orders.
