## Section 1 - Product identification

---

**PACKING:** Carton box with container - collar in a secure metallized paper sachet.

**PRODUCT:** White waterproof collar 49cm or 69cm.

**SPECIES:** Dog.

**INDICATIONS:** Protective band for dog ectoparasites. Against arthropods and dipteran insects (vectors). Acts technically by biomimicry.

**Biomimicry:** The unique capabilities or properties of natural organisms or substances adapted in customized products.

Duration up to five months.

- Prevention of Lice infestations for up to 5 months.
- Prevention of Infestations by ticks for up to four months.
- Prevention of Flea infestation for up to four months.
- Prevention of sandfly bites for up to four months.
- Prevention of mosquito bites for up to four months.

To achieve continuous overall protection, it's recommended the renewal of the collar every 4 months without interruption. It can be used in puppies over 3 months.

**METHOD OF ADMINISTRATION-APPLICATION:** Apply the collar around the dog's neck. Insert collars edge through the buckle and tighten it. Leave 3cm space from the dog's neck. Cut with a scissors the excessive part 4cm after buckle. It is recommended placing the collar before the infectious period or exposure to dangerous, parasite infested environment.

---

## Section 2 - Hazards Identification

---

**PRECAUTIONS:** Do not use in sick or convalescent dogs. Remove the collar in case of side effects. Do not eat, drink or smoke while handling the product. Keep away from food, drinks and anything related to animal feed. Keep of reach of children.

**SIDE EFFECTS:** Caution with sensitive, allergic animals. Can cause reaction.

## Section 3 - Handling and Storage

---

**STORAGE:** P234 Store and transport the product in its original, unopened packaging. Store and carry it in temperatures below 25 ° C (77 ° F). Do not freeze it.

**PRODUCT DISPOSAL:** P501 Dispose of contents/container in accordance with local regulation.

## Section 4 - Composition/Information on Ingredients

---
