Interior Design

DANI LANDSBERG

Interior Design

I have an eclectic and dynamic style. Going from classic to contemporary in a blink. Always prioritizing the real needs and wishes of my clients. But I need to confess, I love when I can create projects that have a bit of everything, showing the unexpected, with a style that reflects my client's personality, especially in business projects.

And I think my background helps me to do that.

I'm graduated in Business Administration and post graduated in Marketing. And after more then ten years as a Project Manager in big companies such as Citibank, Lucent Technologies, Visa, and Telefonica (Corporate), I decided to work with Interior Design. So, I've got a Master in Interior Architecture at European Institute of Design (IED) and an Interior Design and Landscape course from New York Institute of Art+Design. Then, for the last 12 years I've been working with what I love to do: building brands and environments.

MY OFFICE

is conveniently located in Orlando, where I can meet clients by appointment.

My design team is in Brazil though. We work remotely doing Branding development, Graphic Design work pieces and Interior Design Projects.

I work with several licensed professionals in the USA, such as Architect, General Contractor, Electrician, Carpenters, etc. to make all that come to reality.
