Approved Vinegar Treatment Statement

Hard Water Residue / Shiny Residue

Thank you for your request for additional information regarding the care of your Cambria. Maintaining your Cambria is easy. Simply wash with a soft cotton cloth and warm water, use a mild soap if desired.

Occasionally Cambria has hard water residue around the base of the faucet, or a shiny residue can appear on a counter top. This residue can usually be removed with the guidelines described below.

CAUTION: Care should be taken to avoid vinegar or other product, coming into contact with fixtures. Some metallic surfaces may be damaged. Mask or tape (use low tack tape) the faucet and other fixtures, to protect these surfaces.

Cleaning Guidelines for Hard Water Residue / Shiny Residue on the Surface of Cambria:

1. Pour vinegar on the residue.
 - a. It may be helpful to soak a cloth with vinegar and place it over the residue. This will assure the vinegar doesn't flow away and to keep the area saturated.
2. Let sit for 30 minutes.
3. Scrub vigorously with a cotton cloth.
4. Rinse thoroughly with clean water.
5. Dry and examine the area to see if the residue was removed.
6. Repeat as necessary.
7. For complete removal of a shiny residue, wipe surface with Denatured Alcohol and cotton cloth.

Remove masking and any adhesive residue from fixtures. Rinse thoroughly with clean water.

Note: If residue remains due to heavy buildup, repeat until removed.

We appreciate you being a Cambria customer and look forward to helping you in the future. If you have any additional questions, please visit CambriaUSA.com, or call toll free to speak to one of our Cambria Customer Care representatives at 1-866-CAMBRIA (226-2742).
