

**Decoline DL-TM-MN-FR** is a slim discreet trimless aluminium anodised profile. At 13.3mm deep, the profile has a compact design to recess easily into walls or ceilings with a thin layer of plaster. This minimalist linear solution has been designed to sit flush with the surface to give a sleek appearance. The profile has been engineered to frame our Nova linear series.

Available with frosted diffuser (DL-TM-MN-FR) to produce an even spread of light.

Supplied in set lengths of 2 metres or bespoke lengths with Ecoled's tailor-made service.
