

Decoline DL-S8-S-FR is an ultra-slim discreet surface mounted anodised aluminium profile. At 8.4mm high and 17.1mm wide, this super-low linear solution has been designed to suit installations with restricted depth applications such as under cabinets and bookcases. The profile has been engineered to frame our Nova linear LED series.

Available with clear (DL-S8-S-CL) and frosted (DL-S8-S-FR) diffusers to produce an even spread of light.

Supplied in set lengths of 2 metres or bespoke lengths with Ecoled's tailor-made service.

Note: this product can be recessed if routed professionally.

PERFORMANCE SUMMARY

Physical construction

Materials - PROFILE: Anodised Aluminium DIFFUSER: Polycarbonate Frosted

Length - 2 metre standard lengths

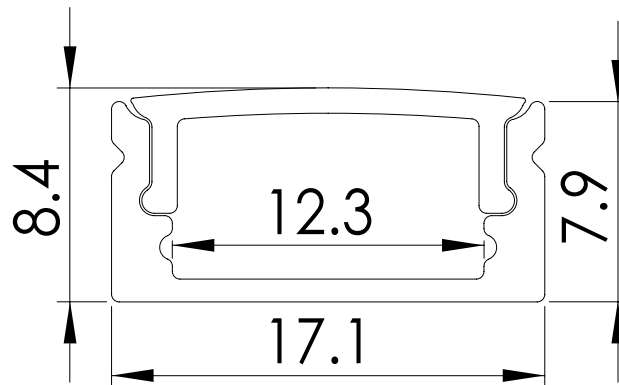

Width - 17.1 mm

Height - 8.4 mm

Fittings/Installations:

Extrusions can be fixed into place using countersink screws, straight into the extrusion. Or purchase fixing brackets that can be screwed/nailed into place, and the extrusion then clipped onto them.
